CONTENTS

LETTERS TO THE EDITOR.....4 <i>Readers comment on such diverse subjects as the plight of imprisoned economist Martin Armstrong, the Freeman on the Land concept, the cover-up on vaccine risks, a Brown's Gas project, UFO reporting by iPhone, and more.</i>	JOURNEY THROUGH THE LIGHT AND BACK.....53 <i>By Mellen-Thomas Benedict. This account of a profound life-after-death-and-return experience inspires us to realise that we are all one with the universal Source and have the power to allow it to expand itself through us.</i>
GLOBAL NEWS.....6 <i>We report on toxic effects of nanoparticles, a proposed asteroid defence system, weather modification in China, flawed DNA analysis, the CIA's LSD experiment in France in 1951, America's unmanned drone wars, and more.</i>	THE MARINE LIGHTWHEEL PHENOMENON.....59 <i>By Kris Sherwood. In April 2009, a US Navy ship's crew witnessed an astonishing light show at sea, featuring bioluminescent organisms that responded to energy discharges appearing as spiralling vortices.</i>
RISKS FROM CORN AND AGAVE SWEETENERS.....11 <i>By Sally Fallon Morell & Ramiel Nagel. Recent studies show that refined sweeteners like high-fructose corn syrup and agave "nectar" are neither safe nor natural and are more damaging to our health than is ordinary sugar.</i>	THE TWILIGHT ZONE.....65 <i>We reprint a summary of amazing coincidences from the 19th century to recent years, covering the simultaneous deaths of twins, Edgar Allan Poe's prophetic maritime novel, historical synchronicities and more.</i>
THE HUMAN MICROCHIPPING AGENDA.....17 <i>By Gregory Nikolettos & Timothy Wiseman. Big Brother corporations have already developed implantable microchips for humans and are conditioning the public to accept that being chipped is inevitable and desirable.</i>	REVIEWS—Books.....69 <i>"Dark Intrusions" by Louis Proud "Sounding the Mind of God" by Lyz Cooper "The Rife Handbook of Frequency Therapy" by Nenah Sylver, PhD "Cancer is Not a Disease..." by Andreas Moritz "Contactees: A History..." by Nick Redfern "Yetis, Sasquatch & Hairy Giants" by David Hatcher Childress "The 8 Calendars of the Maya" by Hunbatz Men "2012: Science or Superstition" by Alexandra Bruce "ESP Induction through...Self-Hypnosis" by Richard Alan Miller "Patterns of Eternity" by Malcolm Stewart "Shadow Masters" by Daniel Estulin "Spontaneous Evolution" by Bruce Lipton, PhD, & Steve Bhaerman "Global Warming False Alarm" by Ralph B. Alexander "The Real Global Warming Disaster" by Christopher Booker</i>
IMMORTAL HeLa CELLS AND VIRAL VODOO.....25 <i>By Dr Alan Cantwell. Cancer cells taken from Henrietta Lacks nearly 60 years ago have contaminated hundreds of human tissue cell culture lines and ruined decades of experimental research at enormous cost.</i>	REVIEWS—DVDs.....76 <i>"Architects of Control" by Michael Tsarion and Blue Fire Film "Crossing the Event Horizon" by Nassim Hamein</i>
EARTH EXPANSION TECTONICS—Part 1.....33 <i>By Dr James Maxlow. As shown in the magnetic striping and age-dating of oceanic bedrock, the Earth's radius has been growing throughout its geological history. The theory of Plate Tectonics is overdue for review.</i>	REVIEWS—Music.....77 <i>"Le Marigot Club Dakar" by Daby Balde "Fela: The Best of The Black President" by Fela Kuti "Fanfare Ciocarlia Live" by Fanfare Ciocarlia "Songhai Blues: Homage to Ali Farka Touré", by Samba Touré</i>
ESP INDUCTION THROUGH SELF-HYPNOSIS.....41 <i>By Richard Alan Miller. The determined and patient student of parapsysics can draw on this theoretical model and practical, tried-and-tested self-hypnosis technique for inducing extrasensory perception.</i>	NEXUS BOOKS, VIDEOS, ADS, SUBS.....87-96
SCIENCE NEWS.....49 <i>This edition we give an overview of Steorn Limited's over-unity demonstrations in Ireland, and Silicon Valley-based Bloom Energy Corporation's launch of an advanced, energy-saving fuel cell technology.</i>

STATEMENT OF PURPOSE

NEXUS recognises that humanity is undergoing a massive transformation. With this in mind, NEXUS seeks to provide 'hard-to-get' information so as to assist people through these changes. NEXUS is not linked to any religious, philosophical or political ideology or organisation.

PERMISSION-TO-REPRODUCE POLICY

While reproduction and dissemination of the information in NEXUS is actively encouraged, anyone caught making a buck out of it, without our express permission, will be in trouble when we catch them!

Editorial

Wow, 2010 is already screeching towards 2011 at full speed. Surely it is not just me? Time itself seems to be getting faster. But what is "time"? We are told by the new religion on the block (science) that we exist within a space-time continuum, inside which a Big Bang occurred a long time ago. We are told that first there was "nothing"; then that "nothing" exploded and formed tiny particles of "something", which we call "matter".

Next we are told that these tiny, inanimate particles became attracted to each other due to gravity, and that these clumps formed suns and then planets. We are then told, in another extraordinary leap of faith, that some of these inanimate particles suddenly decided that they wanted to reproduce. Yes, folks; after all this pure science, suddenly a bunch of atoms and molecules, with not a care in the world (save for various of Newton's laws), suddenly decided to become complex cellular life-forms so that they could reproduce.

So, if you are a rational, logical person who believes that life is the product of scientific laws in a mechanistic universe with no meaning—which is what they teach you to think in Western schools—you believe essentially that everything you see around you created itself out of nothing for no reason! Think about that for a minute... Apart from being scientifically illogical, what a bleak and miserable concept for immortal spiritual beings to submit themselves to!

And since I am running out of both time and space for this editorial, I had better move right along...

On the health front, we have an important article exposing the health risks of high-fructose corn syrup as well as agave "nectar", which is marketed to health-conscious consumers as a safe sweetener. Plus, we have a fascinating paper about the "immortal" human cancer cells that have contaminated hundreds of cell lines in cancer and vaccine labs around the world.

Do we all have psychic powers? Physicist Richard Alan Miller says we do, and in his article he explains how we can develop these innate ESP abilities.

We also have an update on the Expanding Earth hypothesis. I like this idea because it overcomes many inconsistencies in Plate Tectonics theory. And as more scientific measurements come in regarding the ages of rocks and ocean beds, the more this Expansion Tectonics theory is the only one to account for how the continents got to be where they are now. If you are interested in lost continents of the past or in Earth changes in the future, I suggest you examine the Expanding Earth hypothesis.

The article on an extraordinary near-death experience was selected for several reasons. First, it is positive. Second, it reminds us not to become overwhelmed by toxic information that makes us depressed or feel disdain or hatred for mankind. Third, because many of our regular readers die each edition, I thought it might be of some comfort to those about to make the transition or who are left behind. Fourth, it has the same basic message that most near-death experiences have, so we should take heed.

On a final note, we are holding our NEXUS Conference in Australia on 24–25–26 July at the Novotel Twin Waters Resort on the beautiful Sunshine Coast, southeast Queensland. See our website and ads in this issue and the next for more details. I hope to see and meet as many of you there as possible. Until then, expand your horizons with this latest NEXUS offering.

Duncan

NEXUS CONFERENCE 2010

**Saturday 24th—Sunday 25th—Monday 26th July 2010
Novotel Twin Waters Resort, Sunshine Coast, Qld, Australia**

Information & Analysis on:

- the true structure of the Earth: how it expands, and what we can expect in the future
 - the electrical nature of the cosmos: how this helps us understand the solar system, ancient cataclysms and solar changes
 - the hidden ancient history of the Earth and its vanished civilisations: strange prehistoric artefacts that suggest advanced technologies
 - roots of Christianity: lies in the written word, corruption of the hierarchy, control of the masses
 - UFOs, ETs and the future: efforts to encourage government disclosure
 - sacred geometry, quantum physics, consciousness and the fabric of reality
 - communication with animals: how you can learn
 - vibrational healing and rejuvenation technology
 - solutions for exposure to EM fields and dirty electricity; how to balance our pH levels
 - 9/11, World War III, secret control groups and world government agendas
- + so much more...
- + dozens of new exhibits & stalls
- + quality time to meet each other and the speakers, all at a beautiful beachside resort on the Sunshine Coast!

Confirmed Presenters:

Jim Marrs (USA): Award-winning author and investigative journalist in the fields of UFOs, JFK, 9/11, remote viewing and secret control groups.

Stephen Bassett (USA): Leading advocate for ending government secrecy about an extraterrestrial presence engaging the human race.

Klaus Dona (Austria): Art exhibition curator who travels the world in search of unusual artefacts, evidence that proves mankind's true heritage.

Dr Kathy Forti (USA): Came back from a near-death experience with the blueprint for a new technology.

Nassim Hamein (USA): Physicist presenting new concepts of information linking Einstein's field equations with quantum physics and consciousness.

Trisha McCagh (Australia): Animal communication expert on how to interact intuitively with our pets.

Ian Ross Vayro (Australia): Author of *God Save Us From Religion, They Lied to Us in Sunday School* and *Tears in Heaven*.

Donna Fisher (Australia): Author and investigator of the links between ill health, EMFs and dirty electricity.

James Maxlow (Australia): Geologist and leading advocate of the Expanding Earth hypothesis.

Wal Thornhill (Australia): Key researcher and lecturer on the *electric* nature of the cosmos.

Sherrill Sellman (USA): Author and researcher who specialises in the role of hormones in our health.

+ more speakers to be announced...

Letters to the Editor ...

Martin Armstrong's Plight

Hi Duncan: I am a first-time writer but have enjoyed your magazine since the mid-1990s.

The reason I have decided to write is to bring your attention to the plight of Mr Martin Armstrong. An economics expert, he is currently incarcerated in the US without charge or fair trial. Apparently Martin developed a software program called the Pi Cycle Economics Confidence Model, which is able to accurately predict economic trends from real estate and commodity prices right down to trends in individual countries. Having refused to surrender the source code to the CIA, he was denied his constitutional rights and locked up.

Now I cannot verify the validity of these claims but, if they're true, this may be the biggest cover-up since Roswell. Maybe even bigger. Martin may have discovered an algorithm that can decode almost anything, or maybe even the holy grail of science—the true unified field formula.

I know this is the kind of story that NEXUS readers love, and hopefully we can get some support for Martin from your US readers.

For more information, please visit the website www.princetonomics.blogspot.com.

Kiwiboy, New Zealand

[Dear Kiwiboy: Several issues ago (16/06) we ran a letter about Martin Armstrong by Mike N. of the USA. We thought we'd publish yours because it covers additional points and it's a timely reminder about Martin, his work and his plight. Ed.]

ET Disclosure Issue

I see there is another article concerning the government unveiling the secrets of extraterrestrial visitation [17/01]. What makes anyone believe, after so many years of cover-ups, lies and disinformation, that the information released would not be lies also?

It is just as easy to forge lies that appear as truth as it is to completely mislead. And as a matter of fact, how would anyone know what the complete truth is?

I absolutely enjoy this magazine and read as much as I can to try to draw my own conclusions. You have always tried to give unbiased, intelligent articles to your reading public, but I truly believe the ET issue is something that cannot and will not be solved by releasing government papers.

Reka, USA

UFO Sighting Coincidence

Hi! The reason for this letter comes through my own experience of what I believe to be a UFO sighting over the city of New Plymouth, where I live in New Zealand.

This took place during the week leading up to and on Christmas Day 2009. The sighting made front-page news in the local newspaper.

I am 52 years old, have four children and work in the dairy industry here in the province of Taranaki, and I would like to say that it has changed my life somewhat.

A friend at work gave me a book to read relating to the sightings I had seen; that book is *Harmonic 33* by Captain Bruce Cathie. What intrigues me in the book is

the sighting witnessed by people in various locations around New Zealand one night in 1968: most importantly, the sighting viewed off New Plymouth was at 9.45 pm—exactly the same time as my sighting a few weeks ago, only 42 years later.

Regards,

Matt C., New Plymouth, New Zealand

A Freeman on the Land

A recent Letter to the Editor (vol. 17, no. 1), "Freedom From Taxation", opens up a conversation on the Freeman on the Land concept.

Having been increasingly interested in this concept for a number of years now, I'd like to express my interest in seeing more coverage of this topic in future issues of NEXUS.

I was initially introduced to this topic through a Melbourne organisation called Upmart, with which you and many of your readers will be familiar.

We, in this country, seem to be increasingly taxed to death. The relationship between taxation and representation seems to be increasingly inverse, i.e., more tax, fewer rights and less representation.

Aaron B., Wavell Heights, Queensland, Australia

Bloom Energy Box

Dear Duncan: I would like to bring news of the Bloom Box to your attention, as it may be of interest to you and your readers.

It is capable of powering an average home 24 hours a day, 365 days a year. It's a small device that could

easily be incorporated into our homes, and at present is being used by corporations such as eBay, FedEx, Coca-Cola, San Francisco Airport, Wal-Mart, Google and more. It is reported to cost only US\$3,000 per box.

What I would like to know is: why can't the Australian federal government consider adopting this new technology in our businesses, homes, schools, etc., as it is already being used by some of the biggest corporations in the world? All Australians could have access to this very affordable, clean technology.

I am definitely going to look into it...even if it means getting it from the US. I may have to save a few pennies for a long while, but it's worth it.

Cheers,

Meegan N., Hidden Valley, Victoria, Australia

[Dear Meegan: You make some good points, and thanks for bringing attention to Bloom Energy's technologies. We have an item about them in this issue's Science News. Ed.]

Cover-up on Vaccine Risks

Dear Duncan: It's not surprising to find that six members of the World Health Organization's vaccine advisory panel are currently under investigation for financial ties to the pharmaceutical industries.

Well-known vaccine researcher Dr Gary Null was shocked to find that there has not been a single study on the dangers of combining vaccines!

An article in the June 2000 *Rolling Stone* magazine, by Robert F. Kennedy, Jr, exposed US government scientists, health professionals, CDC

... more Letters to the Editor

NB: Please keep letters to approx. 150 to 250 words in length. Ed.

officials, the FDA, WHO vaccine experts and reps from every major pharmaceutical company for hiding the dangers of and links between thimerosal (mercury) in childhood vaccines and autism.

This group stated that the original data had been lost, and they handed over their remaining data to a private company which excluded the public from accessing it via the Freedom of Information Act.

They still believe it's a "coincidence" that the Amish, who refuse all vaccinations, have zero autism rates.

The swine flu vaccine contains squalene. Your body recognises squalene as a molecule native to the body and found throughout the nervous system and brain.

Yours truly,
Jovan, Broken Hill, NSW, Australia

Brown's Gas Revisited

Dear Duncan: I have been a reader of NEXUS since its earliest days. I congratulate you on the part you have played in highlighting the many interesting stories that would not otherwise have seen the light of day.

In particular, I compliment you on the part you have played in nurturing little-known inventors the world over. Without the spotlight you have shone on them, these deserving individuals would have remained unknown, their work forgotten.

With the above comments in mind, may I recommend the website of an Irish inventor whom I have

recently come across? George Wiseman is an electrician of some 30 years' standing. His invention seems to make novel use of Brown's Gas.

As you know, George Wiseman gave a talk on this enigmatic gas at one of the NEXUS conferences a few years ago. He has put the technical drawings and measurements on his website, www.su92.com.

With best wishes,
Liam M., Ireland
[Dear Liam: Thanks for the heads-up on the SU92 website. For your info, George Wiseman gave his presentation at the 2007 NEXUS Conference on the Sunshine Coast, Queensland, Australia. Ed.]

Da Vinci Prophecies

Dear Duncan: I am a fan of your fantastic magazine, as are all my family, too. You have great courage to go against the mainstream trend and propose alternative views.

The reason I write is also that I would like to have more information on the Leonardo da Vinci prophecies [NEXUS 16/05]. The article seems to be missing the website where you can find more about it.

Also, in the article where it reads "The dead will be seen carrying the alive ones, in cars and boats in many places", this possibly means cars and boats driven by robots, in the sense that the robots will be made to look like people—and, for Leonardo da Vinci, they will be "dead people".

Kind regards,
Silvia
[Dear Silvia: Thanks for pointing out the missing website.

Unfortunately, on some editions, the line with the website address dropped off. The website is www.prophezeiung.net. Ed.]

UFO Reporting by iPhone

A friend of mine, Jason Martell, just released an app for the iPhone that allows you to record a UFO sighting (or paranormal event) in real time. With a large enough user base, it could be a very useful verification tool. Here is how it works...

If you spot a UFO, you report it on your iPhone. All such reports show up as data points on a map on your phone and on the website. If the map shows only one data point (you), then you do not have verification. If the map shows multiple data points for the surrounding area, then the sighting has been verified.

There are still a few bugs to be worked out, but here is the website address: www.UFOsocial.com.

Anon.

"Man in Black" is Back!

I read your latest issue with some interest. You published a letter I wrote several years ago about my participation in what I believed to be the MIB program, if that is what it was [see "Testimony from a 'Man in Black'", Twilight Zone, 17/01].

In the unedited letter, I wrote of being an insurance agent in New Mexico as well as the fact that the 533i BMW was burgundy in colour, not black (as in your edited version). Makes a bit of a better story being black, but I was trying to give you guys the real story, as

straight as I could recall it.

I also forgot to mention that they gave me a bunch of black Montblanc pens to use, as well—again, with no explanation.

The reason I am writing is because of some stuff, ancillary to the story. I did not turn in all the photos I took. I turned in all the stuff I shot for them, but I took some shots of my own, as well. There is some strangeness in those photos. They have never been published anywhere or seen by anyone else (that I am aware of).

The photos don't prove the existence of [extra]terrestrial visitors, although in my declining years I have come to believe that such aliens existed. Whether they are here now is still up in the air.

Twal Dad (The Woods Are Lovely, Dark and Deep)

Solar Cells and EMFs

Hi Duncan: I must first thank you for such interesting articles that stimulate the imagination and help make some sort of sense of all the madness that seems to be around us at this point in time.

I am thinking of getting solar panels in the future to run the lights and power points. I have read articles about electromagnetic frequency, etc. and I can't help but wonder if having these solar cells on the roof could be harmful to health/well-being also. Do you have any information around this?

Thanks,
Deb
[Dear Deb: For a start, you could check the Discussion Forum at www.wind-sun.com. Ed.]

NANOPARTICLES CAUSE TOXICITY IN FISH

In a Purdue University study, nanosilver suspended in solution was tested on fathead minnows (an organism often used to test the effects of toxicity on aquatic life) and proved toxic and even lethal to the minnows. When the nanosilver was allowed to settle, the solution became several times less toxic but still caused malformations in the minnows.

"Silver nitrate is a lot more toxic than nanosilver, but when nanosilver was sonicated, or suspended, its toxicity increased tenfold," said Maria Sepúlveda, an assistant professor of forestry and natural resources whose findings have been published in *Ecotoxicology* [2010; 19(1):185]. "There is reason to be concerned."

Using electron microscopy, Sepúlveda was able to detect nanosilver particles measuring 30 nanometres or less inside minnow embryos. Thirty nanometres is more than 3,000 times smaller than the diameter of a human hair.

"These nanosilver particles are so

small they are able to cross the egg membranes and move into the fish embryos in less than a day," Sepúlveda said.

Nanosilver is growing in popularity as a component of many products. It is used to kill bacteria in products such as odour-control clothing, countertops, cutting boards and detergents. Currently, there are few regulations for nanosilver's applications in products.

PANEL CALLS FOR GLOBAL "ASTEROID DEFENCE AGENCY"

A US National Research Council panel has recommended setting up an international body that would be prepared to spring into action and defend the planet if an asteroid were discovered on a likely impact course.

There are huge numbers of asteroids that come close to Earth's orbit, called near-Earth asteroids (NEAs). Millions of them are large enough to do serious damage in an impact, including the asteroid

Apophis, which has a small chance of hitting Earth in 2036.

The international body would be "composed of representatives of nations concerned with this problem and willing to invest in preparedness for a damaging collision," the panel's report states.

The report also found that existing surveys are incapable of finding 90 per cent of near-Earth asteroids that are 140 metres across or larger by 2020, a goal set by Congress in 2005. (Source: *New Scientist*, 10 January 2010, <http://tinyurl.com/ygk4a3k>)

DEMAND RISING IN CHINA FOR WEATHER MODIFICATION

China will step up weather modification in key regions to help relieve drought, the director of the China Meteorological Administration has said.

As drought and hailstorms pose severe threats to rural income and food supply, there is a rising demand for technology to cushion the impact, Zheng Guoguang told *China Daily*.

Modifying weather involves seeding clouds with grains of dry ice (frozen carbon dioxide) or tiny particles of silver iodide to stimulate rainfall or dissipate clouds. It is also used to help prevent or control

... GLOBAL NEWS ...

forest fires and ease acute water shortages in some areas, he said.

The annual grain output is around 500 million tons. Zheng said he expects weather modification projects will contribute to the country's efforts to increase grain production capacity by 50 million tons annually.

Last year, officials used artillery, rockets or planes to induce precipitation for wheat-producing areas and some other regions.

In all, a record 840 flights were made to increase rain last year for areas spanning 3.6 million square kilometres, or roughly one-third of China's territory. At least 116,000 rockets and 890,000 artillery shells were fired to alter atmospheric phenomena.

Nationwide, weather modification projects cost 910 million yuan in 2009 but helped generate output 30 times that amount, according to statistics from the administration's Weather Modification Center.

The technology was used to ensure clear skies for the grand parade of the National Day celebration last year, when the country marked the 60th anniversary of the founding of New China. It also was used to ensure rainless days for the opening and closing ceremonies of the 2008 Beijing Olympic Games, Zheng said.

The China Meteorological Administration is gearing up for weather services for the Shanghai World Expo, which opens in May, and for November's Asian Games in Guangzhou, he said. The Shanghai event will be a challenge, as it lasts 184 days and may be affected by monsoons and high temperatures.

Weather manipulation is still a developing discipline that holds great potential, Zheng said. China began modifying the weather on a local or regional scale in 1958.

DNA EVIDENCE MAY BE FAULTY

A new revelation casts doubt on certain verdicts in the US justice system delivered since the mid-1990s. It stems from an important finding made by a team co-led by Nickolas Papadopoulos, a Johns Hopkins University geneticist.

The team discovered that DNA from tiny symbiotic bacterial descendants called mitochondria, which live in our cells and give them energy, varies from tissue to tissue in the human body.

The finding is significant, as mitochondrial DNA analysis was considered a proven enough technique that US law enforcement has been using it as a tool to identify criminals since the mid-1990s.

The new results, set to be published in the 4 March edition of the prestigious journal *Nature*, indicate that the possibility of false negatives might be much higher than previously thought. Furthermore, the chance of two people having the same mitochondrial DNA goes up as well.

If the results are validated, this could lead to a major shake-up in the field of forensics.

MONSANTO FAKED DATA, CLAIMS ITS EX-CHIEF IN INDIA

The former managing director of Monsanto India, Tiruvadi Jagadisan, is the latest to join the critics of Bt brinjal and perhaps is the first industry insider to do so.

Bt brinjal is a transgenic eggplant which has the gene from the soil bacterium *Bacillus thuringiensis* inserted into it.

Jagadisan, who worked with Monsanto for nearly two decades, including eight years as the managing director of India operations, spoke against the new variety, and later he elaborated by saying that the company "used to fake scientific data" submitted to government regulatory agencies to get commercial approvals for its products in India.

The former Monsanto boss said government regulatory agencies which the company used to deal with in the 1980s simply depended on data supplied by the company while giving approvals to herbicides.

On 9 February 2010, the Indian Environment Minister, Jairam Ramesh, imposed a moratorium on the cultivation of Bt brinjal.

... GLOBAL NEWS ...

FORMER PFIZER ASSOCIATE CHARGED WITH FRAUD

Dr Scott S. Reuben, a former member of Pfizer Inc.'s speakers' bureau accused last year of perpetrating one of the biggest research frauds in medical history, was charged in a federal court in Boston with falsifying medical research studies.

Reuben, formerly chief of acute pain at Baystate Medical Center in Springfield, Massachusetts, faces up to 10 years in prison and a US\$250,000 fine.

US attorney Carmen M. Ortiz accused Reuben of accepting a \$75,000 grant from Pfizer to research the effectiveness of pain medication Celebrex® for a 2005 study in which no patients were actually enrolled.

Prosecutors allege that Reuben made up the data, which he subsequently had published in the medical journal *Anesthesia & Analgesia*.

The journal later had to retract 10 papers written by Reuben, and medical experts at the time said that at least 21 journal articles by the anaesthesiologist appeared to be fabricated.

(Source: *TheDay.com*, 15 January 2010, <http://tinyurl.com/ykr70aa>; also see *Global News*, NEXUS 16/04)

NANOTECHNOLOGY MAY TAP INTO YOUR MIND

Telecommunications researchers in Japan are attempting to create electronic sensors that can not only receive information from the brain, but could manipulate our neural pathways. The new sensors, built using nanotechnology, could read and write information directly into the brain.

While the concept might conjure images of half-human, half-machine cyborgs, Dr Keiichi Torimitsu of Nippon Telegraph and Telephone (NTT) said the research is more likely to help sufferers of Parkinson's disease and stroke.

Torimitsu presented his team's work on the development of bionic, or biomimetic, brain sensors at this week's International Conference on Nanoscience and Nanotechnology (ICONN) in Sydney.

"To develop some kind of devices or interfaces with the brain that would make it possible to transmit our information, sending it through the telecommunication pathways to another person or device such as a computer—that is the goal," said Torimitsu, who heads NTT's Molecular and Bioscience Group.

(Source: *Discovery.com*, 25 February 2010, <http://tinyurl.com/y18hkfr>)

ONE IN FOUR GERMANS HAPPY ABOUT MICROCHIPS

A recent poll has revealed that nearly one in four Germans would be happy to have a microchip implanted in their body.

The survey, by German IT industry lobby group BITKOM, was intended to show how the division between real life and the virtual world is increasingly coming down.

In all, 23 per cent of around 1,000 respondents in the survey said they would be prepared to have a chip inserted under their skin "for certain benefits".

FRENCH BREAD SPIKED WITH LSD IN CIA EXPERIMENT

On 16 August 1951, the inhabitants of Pont-Saint-Esprit, a quiet, picturesque village in the Gard region of southeastern France, were suddenly racked with frightful hallucinations of terrifying beasts and fire. At least five people died, dozens were interned in asylums and hundreds were afflicted.

For decades it was assumed that the local bread had been unwittingly poisoned with a psychedelic mould.

Now, however, the American investigative journalist H. P. Albarelli, Jr, has uncovered evidence suggesting that the US Central Intelligence Agency (CIA) peppered local food with the hallucinogenic drug LSD as part of a mind-control experiment at the height of the Cold War.

One man tried to drown himself, screaming that his belly was being eaten by snakes. An 11-year-old tried to strangle his grandmother. Another man shouted "I am a plane" before jumping out of a second-floor window, breaking his legs; he then got up and carried on for 50 yards [~46 metres]. Another saw his heart escaping through his feet, and begged a doctor to put it back. Many were taken to the local asylum in straitjackets.

"Just not quite the same since they digitised sunsets."

... GLOBAL NEWS ...

TIME magazine wrote at the time: "Among the stricken, delirium rose: patients thrashed wildly on their beds, screaming that red flowers were blossoming from their bodies, that their heads had turned to molten lead."

Albarelli claims that the outbreak resulted from a covert experiment directed by the CIA and the US Army's top-secret Special Operations Division (SOD) at Fort Detrick, Maryland.

He came across CIA documents while investigating the suspicious suicide of Frank Olson, a biochemist working for the SOD who fell from a 13th-floor window two years after the "Cursed Bread" (*Le Pain Maudit*) incident. One note transcribes a conversation between a CIA agent and a Sandoz official who mentions the "secret of Pont-Saint-Esprit" and explains that it was not "at all" caused by mould but by diethylamide, the D in LSD.

While compiling his book, *A Terrible Mistake: The Murder of Frank Olson and the CIA's Secret Cold War Experiments*, Albarelli spoke to former colleagues of Olson, two of whom told him that the Pont-Saint-Esprit incident was part of a mind-control experiment run by the CIA and the US Army. Scientists at Fort Detrick told him that agents had sprayed LSD into the air and also contaminated "local foot products".

Albarelli said that the real "smoking gun" was a White House document sent to members of the 1975 Rockefeller Commission, formed to investigate CIA abuses. It contained the names of a number of French nationals who had been secretly employed by the CIA, and it made direct reference to the "Pont-Saint-Esprit incident".

In its quest to research LSD as an offensive weapon, Albarelli claims, the US Army also drugged over 5,700 unwitting American servicemen between 1953 and 1965.

DECADE OF THE DRONES: AMERICA'S AERIAL ASSASSINS

The year 2010 marks the 10th consecutive year of the United States' war in Afghanistan and in the 15-nation area of responsibility subsumed under *Operation Enduring Freedom*. It is also the 10th and deadliest year in Washington's use of unmanned aerial vehicles (drones) for targeted assassinations and untargeted "collateral damage".

Originally designed for battlefield surveillance and reconnaissance, albeit often to call in lethal military strikes, drones have been employed by the US since 2001 to identify and kill human targets. The Predator and its successor, the Reaper, capable of carrying 15 times more weaponry and flying at three times the speed, have been used for deadly attacks in Afghanistan, Iraq, Yemen, Somalia and with particularly murderous effect in Pakistan since the autumn of 2008. They are equipped with cameras connected by satellite links to bases in the United States. US drone missile strikes on both sides of the Afghanistan-Pakistan border have been increased by 50 per cent since the Obama administration took over the White House on 20 January 2009.

Pakistan's influential Dawn.com news service published an account of what that policy has meant to Pakistanis. In the 2 January 2010 article titled "Over 700 killed in 44 drone strikes in 2009", the source, quoting Pakistani government statistics, wrote: "Of the 44 Predator strikes carried out by US drones in the tribal areas of Pakistan over the past 12 months, only five were able to hit their actual targets, killing five key Al-Qaeda and Taliban leaders, but at the cost of over 700 innocent civilians." For each alleged Al-Qaeda and Taliban member killed by missiles fired from US drones, "140 innocent Pakistanis also had to die".

Drone missile attacks are increasingly becoming the weapon of choice of the US Central Intelligence Agency (as in Pakistan, Afghanistan and Iraq), the Joint Special Operations Command (in Yemen) and the Air Force, which as of last year had 195 Predators and 28 Reapers. All indications are that they will soon have more. This year, the Obama administration has sought from Congress \$33 billion more for the wars in Afghanistan and Iraq "on top of a record request for \$708 billion for the Defense Department next year" [Associated Press, 12 January 2010].

The US conducted 11 deadly Predator attacks on Iraq in April 2008. *USA Today* [29 April 2008] reported at the time: "Commanders are expected to rely more on unmanned systems as 30,000 US troops sent last year are withdrawn. The military has dozens of Predators in Iraq and Afghanistan. In all, it operates 5,000 drones, 25 times more than it had in 2001."

In December 2009, the government of Venezuela called on the world community to condemn incursions into its airspace by US military drones operating from Aruba and from Curaçao in the Netherlands Antilles. The types of drones that flew for several days over Venezuelan territory weren't specified, but under both bilateral and NATO military obligations the Netherlands would not refuse the US the right to station Predator and Reaper drones on bases in their Caribbean island colonies.

The United States has not only increased its arsenal of unmanned aerial vehicles by 25 times over the past decade, it has massively increased the range and lethality of its hunter-killer drones.

A recent report on *Wired.com* [5 January 2010] disclosed that, in 2008, the Air Force Research Laboratory started to "build the ultimate assassination robot", described as "a tiny, armed drone for US special forces to employ in terminating 'high-value targets'".

The Ringing Cedars - a stunning series of books from Russia

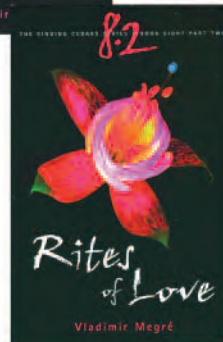

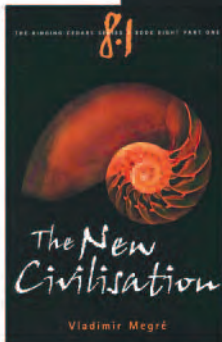

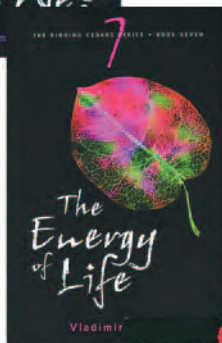

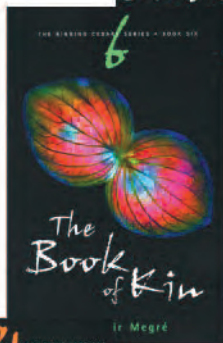

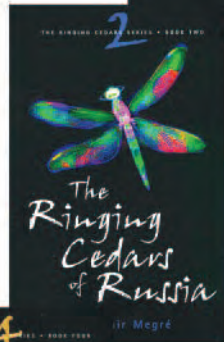

In 1994 a Siberian elder told the entrepreneur Vladimir Megré a fascinating story about the “ringing cedars” - trees respected from Biblical times for their curative powers and the capacity to reconnect human beings with the Divine. The elder told him where such a ringing cedar was growing in the Siberian backwoods.

Vladimir Megré set out on an expedition to find the tree. But his encounter with the elder’s granddaughter, Anastasia transformed him so deeply that he abandoned his commercial plans and, penniless went to Moscow to write a book about what she shared with him.

What happened next thrilled and inspired millions with the series selling over 10 million copies in

Russian alone. Translated into 20 languages, these highly unusual books provide extraordinary insights into dozens of subjects, from natural child rearing to the production of high-energy, healing foods, from natural child rearing to the amazing potential that awaits every one of us, extraterrestrial civilisations, from ancient megalithic science to the vital importance of breast feeding, and from sacred sexuality to the hidden history of world religions.

- Volume 1: Anastasia
- Volume 2: The Ringing Cedars of Russia
- Volume 3: The Space of Love
- Volume 4: Co-creation
- Volume 5: Who Are We?
- Volume 6: The Book of Kin

THE HEALTH RISKS FROM CORN AND AGAVE SWEETENERS

Recent studies show that refined sweeteners like high-fructose corn syrup and agave "nectar" are neither safe nor natural alternatives to ordinary sugar and are more damaging to your health.

We-Thought.html](http://www.westonaprice.org/Agave-Nectar-Worse-Than-We-Thought.html)

The Lowdown on High-Fructose Corn Syrup

High-fructose corn syrup (HFCS) entered the marketplace in the early 1970s and within 20 years accounted for over half the refined sweeteners used in the US food supply. Produced mainly by the two food-processing giants Archer Daniels Midland and Cargill, it is the main sweetener in soft drinks and is increasingly replacing sugar in baked goods, bread, cereals, canned fruits, jams and jellies, dairy desserts and flavoured yoghurts. Sweeter and less expensive than sugar, HFCS represents the major change in the American diet over the last 40 years. Although the food industry made this change very quietly, consumers are beginning to ask a lot of loud questions about this sweetener as research accumulates to indicate that it is much worse for us than we thought.

Although the corn industry claims that HFCS received GRAS (Generally Recognized as Safe) status when it filed for it in 1983, the US Food and Drug Administration (FDA) did not grant GRAS status until 1996 after considerable pressure from the industry, which was becoming nervous with the publication of negative research findings described in the first anti-HFCS articles.¹

Growing consumer resistance to HFCS is the likely explanation for a recent industry campaign to put the new sweetener in a favourable light. Ads run on television and in popular magazines portray HFCS as benign and its critics as bossy, overbearing, unqualified and misinformed. For example, a full-page ad in *Better Homes and Gardens* portrays a man and a woman engaged in the following conversation. He states: "My dry cleaner says high fructose corn syrup is loaded with calories." Her reply: "A registered dietitian presses your shirts?" Then comes the official statement: "There's a lot of misinformation out there about sugars made from corn. Truth is, high fructose corn syrup is nutritionally the same as table sugar. The same number of calories, too. As registered dietitians recommend, keep enjoying the foods you love, just do it in moderation. We welcome a healthy discussion. Get the facts. You're in for a sweet surprise. www.SweetSurprise.com"²

On the surface, the official statement is true. Both HFCS and sugar, which are refined carbohydrates, have approximately the same number of calories, and both are virtually devoid of vitamins and minerals. For this latter reason alone, HFCS should be strictly avoided. Since refined carbohydrates, sugar and HFCS included, tend to be addictive, it is difficult to follow the platitudinous advice of registered dietitians who urge us to consume them in moderation. In fact, the entire food industry has succeeded very well over the past 30 years in getting Americans to consume far more than moderate amounts of refined sweeteners, particularly high-fructose corn syrup. Between 1970 and 2000, the per-capita consumption of HFCS in the US increased from less than one pound [0.45 kilograms] per person to over 60 pounds [27 kg] yearly.³

There can be no debate about the fact that both sugar and HFCS, with

their empty, depleting, addictive calories, are bad for you. But the real question is whether HFCS is actually *worse* for you—more depleting and more damaging—than ordinary sugar. The research indicates that it is.

The Obesity Debate

The public became aware of the possible downside of HFCS with the publication of a paper in the April 2004 edition of *The American Journal of Clinical Nutrition*.⁴ Authors Bray and others noted the parallel increase in obesity and HFCS consumption in the US, and a number of columnists publicised his theory that, calorie for calorie, HFCS is more likely to cause weight gain than sugar.

The Bray paper provides an explanation for the mechanism whereby fructose would be more fattening. Sugar is a disaccharide that breaks down into two monosaccharides—glucose and fructose—in the intestinal tract. After absorption, fructose must pass through the liver. Small amounts of fructose added to glucose in the diet increase the production of glycogen (stored sugar) and reduce the release of glucose into the bloodstream, an outcome that is theoretically helpful to those suffering from type 2 diabetes. However, large amounts of fructose in the diet rapidly turn into fatty acids—a process called *de novo lipogenesis*—which are then stored as fat or released into the bloodstream as triglycerides.

Small amounts of L-fructose—the type of fructose that human beings have traditionally consumed in fruit—can actually be beneficial to diabetics because L-fructose does not stimulate insulin secretion. However, research indicates that insulin concentrations in the central nervous system have a direct inhibitory effect on food intake: when insulin secretions increase, food consumption declines. Furthermore, insulin increases the release of leptin, a hormone that also inhibits food intake. Individuals who are genetically unable to produce leptin are massively obese; low leptin concentrations are associated with increased hunger and gains in body fat.

Thus, to the extent that fructose inhibits insulin and leptin levels, one would expect an increase in food intake in a diet that includes HFCS. Bray *et al.* cite a 2002 study by Teff and others, published in *Diabetes*, in which consumption of high-fructose meals reduced 24-hour plasma insulin and leptin concentrations and increased triglyceride levels in women.⁵ (Although published in a major medical journal, this study does not appear in a MEDLINE search.) According to the Bray paper: "Because insulin and leptin act as key afferent signals in the regulation of food intake and

body weight, this suggests that dietary fructose may contribute to increased energy intake and weight gain."⁶

There is another difference between fructose and glucose metabolism: glucose enters the cells through the action of insulin; fructose enters the cells through the action of something called a GLUT5 transporter, which does not depend on insulin. This transporter is absent from pancreatic B-cells and the brain, which indicates limited entry of fructose into these tissues. Glucose provides "satiety" signals to the brain that fructose cannot provide because it is not transported into the brain. Once inside the cells, fructose facilitates the formation of triglycerides more efficiently than does glucose.

The Bray paper references a study by Bantle and others in which a diet containing 17 per cent fructose (very typical of today's consumer) caused a highly significant increase of 32 per cent triglyceride levels in the blood in male subjects, although not in female subjects.⁷ The

paper also discusses the fact that sweetened beverages in general, as compared to sweeteners added to solid foods, have a greater tendency to cause weight gain, citing a randomised, double-blind European study by Rabin and others which found that drinking calorically sweetened beverages resulted in greater weight gain over the 10-week study than did drinking diet drinks.⁸ Since the beverages in this study were sweetened with sucrose, Bray *et al.* called for a

second randomised controlled study to compare sucrose- and HFCS-sweetened beverages.

Industry Response

But instead of providing support for such a study, the industry responded with a wallop of damage control in the form of a report by the University of Maryland's Center for Food, Nutrition and Agriculture Policy (CFNAP),⁹ aided by a gift from British sweetener company Tate & Lyle PLC.

The magnitude of the deleterious effects of fructose varies depending on such factors as age, sex, baseline glucose, insulin and triglyceride concentrations, the presence of insulin resistance and the amount of dietary fructose consumed.¹⁰ Some are more sensitive to fructose than others: people who are hypertensive, hyperinsulinaemic or hypertriglyceridaemic; non-insulin dependent diabetics; people with functional bowel disease; and postmenopausal women.¹¹ The CFNAP expert panel was able to confuse the issue by citing studies carried out with individuals known to be less sensitive to fructose. Conspicuously absent in its review are the Teff, Bantle and Rabin studies cited by Bray and others. The report dismisses both the epidemiological correlation and the large amount of research showing

Thus, to the extent that fructose inhibits insulin and leptin levels, one would expect an increase in food intake in a diet that includes HFCS.

that HFCS is metabolised differently from sucrose. It also dismisses the fact that US fructose consumption has increased over 30 per cent since 1970, claiming instead that the fructose to glucose ratio (F:G) in the US food supply has not appreciably changed since the introduction of HFCS in the 1960s—an amazing claim, given that the HFCS used in sodas has an F:G ratio of 55:45 and the HFCS in diet foods has a F:G ratio of 90:10.

While admitting that "studies analyzing the differences between HFCS and sucrose consumption and their contributions to weight gain do not exist", the authors do not join Bray *et al.* in calling for such a study. Instead, they conclude that HFCS "does not appear to contribute to overweight and obesity any differently than do other energy sources".

The Big Dirty Secret About HFCS

Many researchers have pointed out that the fructose in HFCS is free, unbound fructose, which is not the same as the fructose in fruit, which is bound to other sugars and is part of a complex that includes fibre, fatty acids, vitamins and minerals.

Leaving this obvious difference aside, the industry would have the public believe that the fructose in fruit and in HFCS are chemically identical. However, most of the fructose in fruit is in the form of L-fructose or levulose, but the fructose in HFCS is a different isomer, D-fructose. Small amounts of D-fructose do occur in fruit, but the D-fructose in HFCS has the reversed isomerisation and polarity of a refined fructose molecule.¹²

As explained by Russ Bianchi, Managing Director and CEO of Adept Solutions, Inc., a globally recognised food and beverage development company, the fructose in HFCS is therefore not recognised in the human Krebs cycle for primary conversion to blood glucose in any significant quantity, and therefore cannot be used for energy utilisation.¹³ Instead, these refined fructose sweeteners are primarily converted into triglycerides and adipose tissue (body fat). In fact, a recent study by Teff and others, published in *The Journal of Clinical Endocrinology and Metabolism* (2009; 94[5]:1562-69), found that obese people who drank a fructose-sweetened beverage with a meal had triglyceride levels almost 200 per cent higher than obese people who drank a glucose-sweetened beverage with a meal.¹⁴

Chronic high-triglyceride levels translate into increased insulin resistance, inflammation and heart disease. Thus, according to Bianchi, HFCS is a recipe

for obesity, lack of energy and metabolic syndrome—the very portrait of the modern American addicted to a diet of HFCS-sweetened sodas.

Agave "Nectar" to the Rescue?

As the educated public has shied away from foods containing HFCS, the industry has brought a new sweetener onto the scene—one used especially in foods aimed at the health-conscious consumer: agave "nectar". Agave nectar is advertised as a "diabetic friendly", "raw" and "100% natural sweetener". Yet it is none of these. Agave nectar is found on the shelves of health food stores primarily under the labels "Agave Nectar 100% Natural Sweetener" and "Organic Raw Blue Agave Nectar". It can also be found in foods labelled as organic or raw, including ketchup, ice cream, chocolate and health food bars.

Its name, along with the pictures and descriptions on the product labels, creates the impression that agave is an unrefined sweetener that has been used for millennia by native people in central Mexico. "For thousands of years, natives to central Mexico used different species of agave plants for medicine, as well as for building shelter." Thus reads the copy on an agave package. And it is true that natives would also allow the

sweet sap or liquid of one species of agave to ferment naturally, which created a mildly alcoholic beverage with a very pungent flavour, known as *pulque*. They also made a traditional sweetener, called *miel de agave*, from the agave sap or juice by simply boiling it for several hours. But, as one agave seller explains, the agave nectar purchased in stores is neither of these traditional foods: "Agave nectar is a newly created

sweetener, having been developed during the 1990s."³³

The Big Dirty Secret About Agave

In spite of manufacturers' claims, agave "nectar" is not made from the sap of the agave or yucca plant but from the starch of its giant pineapple-shaped root bulb. The principal constituents of the agave root are starch, similar to the starch in corn or rice, and a complex carbohydrate called inulin, which is made up of chains of fructose molecules. Technically, this highly indigestible fibre, inulin, which does not taste sweet, comprises about half the carbohydrate content of agave.³⁴

The process by which agave glucose and inulin are converted into "nectar" is similar to the process by

In spite of manufacturers' claims, agave "nectar" is not made from the sap of the agave or yucca plant but from the starch of its giant pineapple-shaped root bulb.

which corn starch is converted into HFCS.³⁵ The agave starch is subjected to an enzymatic and chemical process that converts the starch into a fructose-rich syrup—anywhere from 70 per cent fructose and higher, according to the agave nectar chemical profiles posted on agave nectar websites.³⁶ (One agave manufacturer claims that his product is made with "natural" enzymes.) That's right; the refined fructose in agave nectar is much more concentrated than the fructose in HFCS. For comparison, the high-fructose corn syrup used in sodas is 55 per cent refined fructose. (A natural agave product does exist in Mexico: a molasses-type syrup from concentrated plant nectar, but its availability is limited and it is expensive to produce.)

According to Bianchi, agave "nectar" and HFCS "...are indeed made the same way, using a highly chemical process with genetically modified enzymes. They are also using caustic acids, clarifiers, filtration chemicals and so forth in the conversion of agave starches." The result is a high level of highly refined fructose in the remaining syrup, along with some remaining inulin.

In a confidential letter dated 15 May 2000, Dr Martin Stutsman of the FDA explained the FDA's food labelling codes relating to HFCS and agave nectar: corn syrup treated with enzymes to enhance the fructose levels should be labelled as "high fructose corn syrup", and agave sweetener requires the label "hydrolyzed inulin syrup".³⁷ Even though, like corn, agave is a starch and fibre food processed with enzymes, it does not have to be labelled as "high fructose agave syrup", which would make it clearer for consumers. "Agave nectar" is a misnomer; at the very least, it should be labelled "agave syrup".

Agave syrup comes in two colours: clear or light, and amber. What is this difference? Russ Bianchi explains: "Due to poor quality control in the agave processing plants in Mexico, sometimes the fructose gets burned after being heated above 140 degrees Fahrenheit, thus creating a darker, or amber color." However, the labels create the impression of an artisan product—like light or amber beer. As consumers are learning about problems with agave syrup, the label "chicory syrup" is beginning to appear as a non-conforming word for the product. Consumers beware!

The Saponins Problem

Yucca species are known to contain large quantities of saponins. The industry describes saponins in agave syrup as beneficial: "Agave's rich density of saponins increases hydration as the soapy, surfactant nature of saponins change[s] the wetting angle of water it

contacts. This eases and accelerates cellular water uptake, especially when used with a high-quality salt."³⁸

However, the truth is that the saponins found in many varieties of agave plants are toxic steroid derivatives, capable of disrupting red blood cells and producing diarrhoea and vomiting.³⁹ They are to be avoided during pregnancy or breastfeeding because they might cause or contribute to miscarriage by stimulating blood flow to the uterus.⁴⁰ At the very least, agave products should carry a warning label indicating that the product may cause miscarriage.

Just Say No to Agave

Since the FDA makes no effort to enforce food-labelling laws, consumers cannot be certain that what they are eating is what the label says it is. New sweeteners like agave syrup were introduced into the market to make a profit, not to make consumers healthy. Clever marketing has led many consumers to believe that the high level of fructose in agave syrup makes it a safe and a natural sweetener. Agave syrup labels do not conform to FDA labelling requirements, thus deepening the false illusion of an unprocessed product. As we have demonstrated here, if a sweetener contains manufactured fructose, it is neither safe nor natural, especially at levels up to 70 per cent.

Agave syrup is a man-made sweetener which has been through a complicated chemical refining process of enzymatic digestion that converts the starch and fibre into the unbound, man-made chemical, fructose. While high-fructose agave syrup won't spike your blood glucose levels, the fructose in it may cause mineral depletion, liver inflammation, hardening of the arteries, insulin resistance leading to diabetes, high blood pressure, cardiovascular disease and obesity.

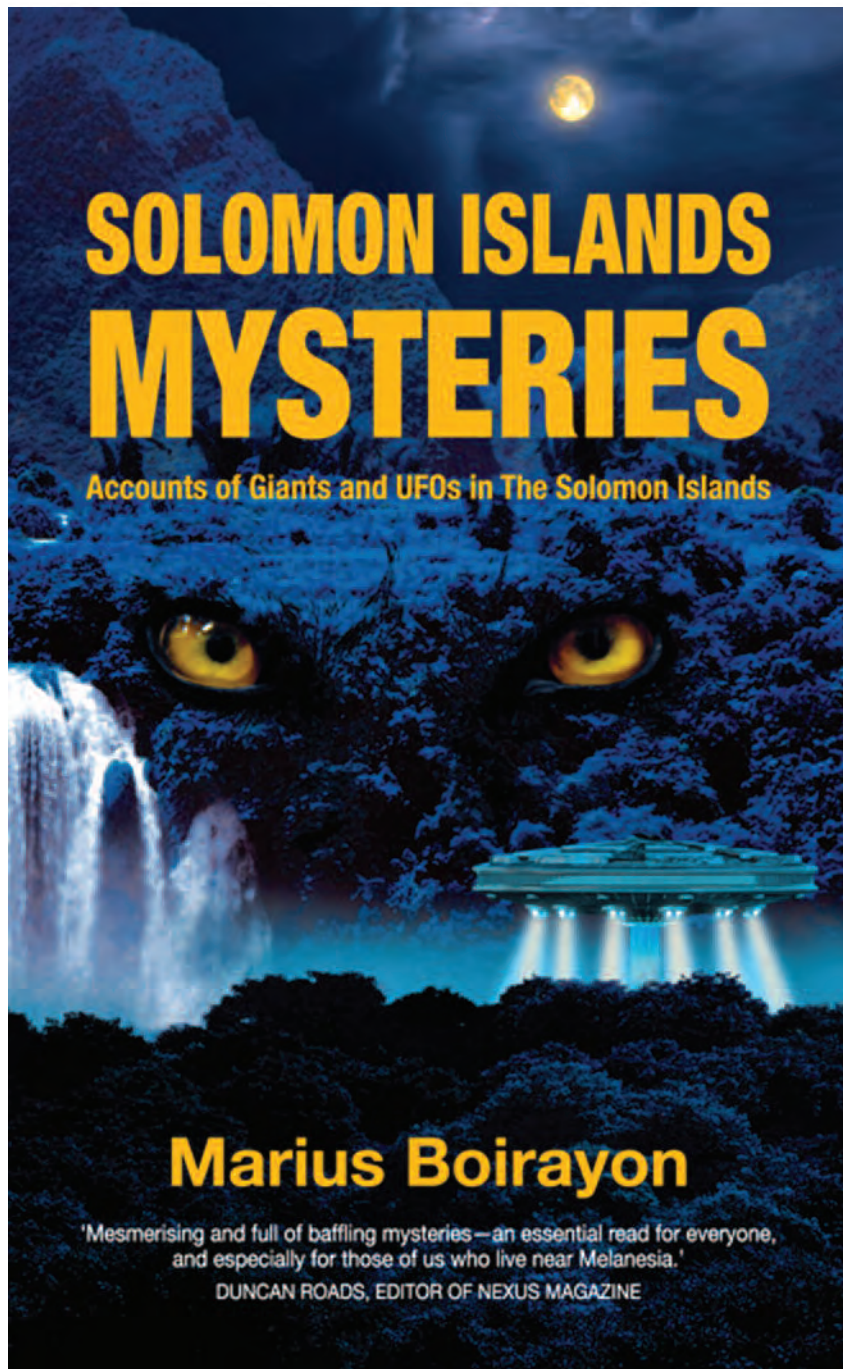

If you want something sweet, eat a piece of fruit, not a candy bar labelled as a "health food". If you want to create something sweet, use sweeteners that are known to be safer. For uncooked dishes, unheated raw honey and dates work well. For cooked dishes or sweet drinks, a good organic maple syrup or even freshly juiced apple or orange juice can provide delicious and relatively safe sweetness; dehydrated cane sugar juice or maple sugar may be used in moderation in cookies and desserts that contain nutritious ingredients and good fats such as butter, egg yolks and nuts.

However, to be healthy, you cannot eat sugar all day, no matter how natural the form. You should limit total sweetener consumption to less than five per cent of daily

The agave starch is subjected to an enzymatic and chemical process that converts the starch into a fructose-rich syrup—anywhere from 70 per cent fructose and higher...

WAKING UP TO THE HUMAN MICROCHIP AGENDA

Big Brother corporations have already developed implantable microchip technology for humans and are trying hard to condition the public to accept that being microchipped is both inevitable and desirable.

by Gregory Nikolettos and
Timothy Wiseman
© 2010

Website:
[http://www.wethepeople
willnotbechipped.com](http://www.wethepeoplewillnotbechipped.com)

People have very busy lives these days, working extra hard to keep roofs over their heads and food on their tables. And those are the lucky ones, or so we are led to believe. This anti-human system we collectively choose to maintain focuses on the perpetual need for money so as to avoid becoming homeless and destitute, rather than working *for* humanity and focusing on the ability of human beings to work together for the benefit of all, great or small.

It also tolerates the kind of doublethink foreseen by George Orwell whereby liars and criminals in government can ignore public opinion and keep secrets—for the sake of "national security", apparently—whilst making outrageous claims about openness and honesty, and patting themselves on the back for the wonderful service they are doing humanity by exporting "democracy" to the Middle East. And we ain't seen nothing yet.

The New World Order and Global Control

Unfortunately, people who have been misleadingly labelled "conspiracy theorists" for the last few decades as a reflex response to their warnings about the upcoming New World Order were right. Even Fox News Channel had a momentarily lapse of purpose and admitted as much,¹ as the politicians and technocrats openly use the term New World Order.²

Nowadays, the term is being used so regularly and so brazenly that one has to question the sanity of people who still refuse to believe that an unprecedented global system of control—or New World Order—has been planned for us all.

An obvious question that springs to the mind of a concerned human being is: what are the differences between systems of control in the 21st century and systems of control in previous centuries? One obvious difference is the technology available to the controllers, which is far superior today—not that the technological capabilities of previous centuries were not sufficient to facilitate the most heinous crimes. It might surprise some to hear that in the 20th century there were approximately 262 million cases of what Professor R. J. Rummel of the University of Hawaii calls "democide", i.e., the killing of people by their own government. The countries in which these killings were carried out had widely different cultures, languages and geography, but Rummel found that they all shared one common feature: excessive government power.⁶

Incidentally, despite the fact that the theory of man-made global warming—or "climate change", as it must now be called—has been proven to be A Convenient Non-truth, word got out that there existed an agenda to create a world government out of the recent United Nations conference on climate change in Copenhagen, justified by the hysterical catastrophism surrounding the discredited theory. The recent "Climategate" scandal proved that "scientists" promoting the theory of man-made global warming—a worldwide confidence trick—are more than willing to fudge their data and even to

prevent genuine scientists with legitimate Freedom of Information requests from checking the data or observing any information that might challenge the new religion. We cannot accurately call it science if scientists are denied access to the scientific data. But even more revealing is the fact that international think-tank the Club of Rome admitted in its book *The First Global Revolution* (1993) that this gigantic global scam is its own invention: "In searching for a new enemy to unite us, we suggested that pollution, the threat of global warming, water shortages, famine and the like would fit the bill."⁸

Eye-Beam

One company commands more than a passing mention in any discussion of technology as a means to control people (and infinitely worse)—namely, International Business Machines Corporation, or IBM. Its Hollerith punch card enabled a quick and easy large-scale information collection process. Individuals could be associated with cross-tabulated information about their background, profession, religion, membership of organisations, etc.—basically, anything for which data could be collected. Information could be stored in the holes that were punched into rows and columns by an IBM punch-card system. Then the card passed through a reader which found the information encoded therein.⁹ This could be done at the rate of 64,000 cards per hour, quickly identifying and locating people who fell into one or more specific categories, whatever they may be.

IBM technology was used to organise nearly everything in Nazi Germany and then Europe, from the identification of the Jews in censuses, registrations and ancestral tracing programs to the running of railway lines and the organisation of concentration camp slave labour.¹⁰

Chipping Away At Our Freedom

Today IBM is closely associated with the implantable microchip company VeriChip Corporation, or, as it's now calling itself, PositiveID—an inspired piece of marketing genius which cunningly removes the possibility of associating the company with any kind of negativity.⁹

Not content with playing Big Brother to the con-artist formerly known as VeriChip by writing off a loan of US \$60 million, IBM is also intent on playing Big Brother to the rest of us by promoting its dream of a global "smart system" of total and constant surveillance of everything and everybody, expertly marketed as harmless *über*-efficiency, as one would expect.¹¹ In reality, what little remains of our freedom is under attack here.

Interestingly, the "contest-ants" on the Spanish version

of the "reality" television "program" *Big Brother* were called on to promote the introduction in March 2004 of the VIP VeriChip at Barcelona's Baja Beach Club.¹² The idea is that once have a microchip implanted in your arm, you can access the VIP area and never again will you be dragged down to the level of having to deal with the monstrous inconvenience of carrying around money or a credit card. People, nay VIPs, can choose to pay for their drinks with implanted microchips instead. There is another Baja Beach Club in Rotterdam, the Netherlands, playing the same fiddle. Managing director Jo van Galen said he believes that in 20 years' time it will be normal to be chipped at birth.¹⁴ Conrad Chase, owner of the Baja Beach Clubs, allegedly worked for the US National Security Agency for years,¹⁵ but that little snippet doesn't make it into the promotional TV specials.

It seems that many people are more interested in the latest gadget or fashion accessory than their rights and their freedom. The vision of the New World Order doesn't involve leaving us alone to get on with our lives. It's about dictating to us what is no longer permissible, i.e., how we will be allowed to live our lives and, eventually, *whether* we will be allowed to live our lives at all.¹⁶

The right to walk around without a microchip implant seems pretty safe right now, but would that still be the case if

people without implants somehow came to be in the minority, or if the infrastructure of the entire planet ever came to be based on the assumption that people do have microchip implants?

Indeed, that seems to be the direction in which Kevin Haggerty, writing for the *Toronto Sun* (10 December 2006), sees the system moving. Haggerty explained how he believes the microchipping agenda will unfold, predicting a number of interesting scenarios—one of which is that "having a chip will be a precondition for engaging in the main dynamics of modern life, such as shopping, voting, and driving".¹⁷

It would be prudent to introduce preventive legislation, worldwide, to avoid ever being obliged to accept a microchip implant.

"Time Is On My Side, Yes It Is"

VeriChip Corporation, or PositiveID, has been known to be less than honest in its relatively short history,^{9, 18} but CEO Scott Silverman dabbled in a bit of truth in the following exchange from an appearance on NBC News:¹⁹

News anchor Lester Holt: "You hear the sound of the background, people saying 'Big Brother, too much information, a little scary'. How do you respond to that?"

Scott Silverman: "Well, you know, it's interesting; I

...IBM is also intent on playing Big Brother to the rest of us by promoting its dream of a global "smart system" of total and constant surveillance...

used to get that question a lot two years ago. Today, we've gotten it a lot less. In fact, the Attorney General of Mexico and some of his staff have received this chip for security purposes. And when the acceptance rate of the product goes up significantly like it has, some of the privacy concerns go down. But to answer your question directly, Lester, what most people are concerned with is the invasiveness of this; that it goes in your body. And as we know with pacemakers and other medical devices, that when people accept it for its applications and for its ability is when it'll work its way into society. It won't be tomorrow, it won't be next week. But two, three, five years from now, slowly but surely it'll work its way into the mainstream."

In this fine-tuned performance, Silverman is talking about gradualism. He is revealing a strategy of long-term thinking based upon achieving the gradual normalisation of what at first appears, correctly, to be a diabolical attempt to reduce each and every human being to a "component in a massive human inventory"¹⁷—a mere vessel for the VeriChip, to be used in conjunction with an anti-human global "smart system" from Nazi war-crime facilitator IBM.

The bad news is that the process of "slowly but surely working its way into the mainstream" took a big step recently, as the implantable chips were marketed as a one-size-fits-all solution to a hypothetical problem involving some sort of inability to access medical information *sans* implant.²⁰ The recent activity of VeriChip/PositiveID seems to reveal an ambition far beyond that which Silverman is willing to admit to publicly (consistently, that is):

- The acquisitions of Steel Vault Corporation (to form PositiveID Corporation) and NationalCreditReport.com provide the company with a connection to the worlds of identity theft and credit monitoring.

- Links to Google Health and Microsoft HealthVault connect the company to electronic health records.

- The company's development partner RECEPTORS LLC—which manufactures a Virus Triage Detection System for the H1N1 virus—connects the company to the World Health Organization's recent flu "pandemic" performance, and potentially to similar incidents in the future.

- The expansion of the company's HealthID division with a range of products—including an implantable RFID (radio-frequency identification) microchip in phase-two

development which can detect glucose levels in the body—connects the company to healthcare in general and specifically to diabetic patients.

- The company announced it is working closely with HealthScreenDirect, which offers screening for diabetes and high cholesterol. If there were to be a cholesterol sensor announcement via the VeriChip/RECEPTORS alliance, as wethepeoplewillnotbechipped.com predicts, this could encourage the company to see dollar signs in the bodies of the 106 million Americans who suffer from high cholesterol.

- The company formed VeriGreen Energy Corporation to invest in the clean and alternative energy sector. Following the recently signed stimulus package, which invested \$79 billion in renewable energy, the company

has created a synergy between their new marketing company Gibraltar, the stimulus bill, cap and trade, the global warming agenda and the human implantable microchip.

All of this is in addition to existing relationships between the company corporation and ELCAN (Raytheon Microelectronics España), the fifth-largest defence government contractor and manufacturer of the VeriChip/PositiveID chip. And of course, VeriChip/PositiveID includes the VeriPay System which is designed to be used as a swipe-and-go payment method for cash and credit-card transactions. This links "scan and go" electronic payments with the implantable microchip.

So we can see that the company has fingers in lots of pies, and various different branches all seem to be converging, heading in one direction: offering microchip implants as the solution to life's problems.

Nevertheless, in December 2009, CEO Scott Silverman assured the public: "Using the chip to relate to the credit-reporting services of NationalCreditReport.com, or even using it for financial transactions...has not been a part of our business model for five years or more, since Sullivan's been gone, and is not part of our business model moving forward". (This refers to Richard Sullivan, former CEO of Applied Digital, which then owned VeriChip.) Silverman went on to announce: "I can tell you that...putting [the chips] into children and immigrants for identification purposes, or putting them into people, especially unwillingly, for financial transactions, has [not] been and never will be the intent of this company as long I'm the chairman and CEO." (See interview at http://www.wired.com/threatlevel/2009/12/positive_id/.)

The bad news is that the process of "slowly but surely working its way into the mainstream" took a big step recently, as the implantable chips were marketed as a one-size-fits-all solution...

However, in 2004, Silverman told the Broward–Palm Beach *New Times* that the VeriChip could be used as a credit card in the near future. And in 2006, he appeared on *Fox & friends*, promoting the chipping of immigrant guest workers to track them and monitor their tax records. Given the discrepancies with Silverman's more recent assurances, whenever we hear such denials from this man—or from any other spokesperson for this company—we know that we can never be sure that we are being told the truth.

Captain Cyborg

Meanwhile, on the other side of the Pond lives Professor Kevin Warwick, of The University of Reading in England. Warwick often appears on TV or in the newspapers promoting himself and his beloved microchip implants.²¹ He even turns up in the extra features of a *Doctor Who* DVD, promoting the idea of a world inhabited by cyborgs²²—an interesting avenue of self-promotion, given the evil nature of the *Doctor Who* baddies known as the Cybermen.

Longing to be perceived as a courageous pioneer of biblical importance, Warwick seems dangerously keen on using his own work with microchip implants as a stepping stone to a national, nay international, chipping program.

Indeed, in the UK in 2002, electronics expert Bernard Albrecht felt compelled to report Warwick to the General Medical Council, the local social services and the police,²³ arguing that there was a possible case for assault in the event of an operation "without medical basis" being carried out on a child, i.e., implanting a microchip. But such problems tend to disappear for those people whose work is in perfect alignment with pre-existing agendas of the "powers that be".

Warwick went on to appear in a Channel 4 documentary in the UK in April 2008, openly encouraging a frightened young mother to chip her children.²¹ The woman had been terrified by the unprecedented mainstream media coverage of the search for poor little Madeleine McCann. The young mother's enthusiasm for Professor Warwick's script was such that we were left with the impression that she might have kept her little girl locked up in a darkened room until the age of twenty-one if a man with a suitably impressive job title had suggested it.

It was also noticeable that Professor Warwick chose not to share with the little girl's mother the fact that microchip implants have been linked to tumours in

research animals. Parents who want to know more about the potential risks that such implants would pose to their children, and to themselves, can start by looking at Dr Katherine Albrecht's websites.²⁵

The Public Are Told What They Want

As we have already seen, there is a disturbing move towards chipping the population—fronted largely by a couple of prominent mouthpieces, so far. There is a fascinating interview with the late filmmaker Aaron Russo, in which he discusses the friendship he once had with Nicholas Rockefeller of the banking dynasty. Among several astonishing revelations is the admission by Rockefeller, according to Russo, that "the ultimate goal is to get everybody in this world chipped with an RFID chip,

and have all money be on those chips and everything on those chips, and if anybody wants to protest what we do or violate what we want, we just turn off their chip".²⁶

So that's where they want to take us. The question is, how do they intend to take us there? The answer is simple: propaganda. There are various different kinds of propaganda coming at us from all angles: in movies, in TV shows, in the adverts between the TV shows, in books and magazines, in music, in fashion—basically, in every corner of what Oscar-winning actress

Susan Sarandon once referred to as the "culture creation industry".²⁷

Edward Bernays, the nephew of Sigmund Freud, was a giant amongst propagandists.

This was a man who, for example, helped the American Tobacco Corporation turn the existing social norms of the 1920s upside-down by tempting women to believe that smoking cigarettes was a sign of their independence and their move away from being

perceived as second-class citizens.²⁸ In his 1928 book entitled *Propaganda*, Bernays wrote:

"The conscious and intelligent manipulation of the organized habits and opinions of the masses is an important element in democratic society. Those who manipulate this unseen mechanism of society constitute an invisible government, which is the true ruling power of our country... We are governed, our minds are molded, our tastes formed, our ideas suggested, largely by men that we have never heard of...we are dominated by the relatively small number of persons...who understand the mental processes and social patterns of the masses. It is they who pull the wires which control the public mind, who harness old social forces and contrive new ways to

It was also noticeable that Professor Warwick chose not to share with the little girl's mother the fact that microchip implants have been linked to tumours in research animals.

bind and guide the world."³⁰

Keep in mind that we're not talking about marketing cigarettes here, or increasing the sales of a particular brand of washing powder. This is about persuading the public to accept the idea of sticking a microchip inside their bodies, indefinitely. And ideally—from the perspective of the propagandists (and their masters)—the public will be made to *want* to be chipped. That is a huge task even for the Bernays and co. of this generation. That would require long-term strategies. Minds would have to be prepared for that, well in advance.

Predictive Programming

When it comes to such preparation of the mind, one important technique is to influence how people perceive the future, and thus what they expect from the future and how they will think and behave in that future. It's called predictive programming.

Basically, a fictional story set in the future (or perhaps in a galaxy far, far away) incorporates ideas and/or technologies that are actually planned to take place in reality—by the people who plan these things—so that in real life when these events are close to transpiring, it all seems familiar to the programmed audience. There is a feeling of inevitability that would not have existed had it not been for the predictive programming. The victims feel less inclined to object because it's designed to appear as though it's all unfolding naturally, uncoordinated and unscripted. This manipulation of the mind is carried out by the best perception-builders that money can buy.

As Alan Watt of www.cuttingthroughthematrix.com explains, we are effectively being farmed:

"First of all, they know where they want to grow in this field, the crop they want to grow, and how high, and how many. And they first prepare the land. They cut the brush. They plough it. They harrow it. They do all the necessary groundwork. And then they sow the seed and watch it grow...and cultivate it.

"Well that's what they do with your mind, in preparation for every major event that will happen in your life. You'll see it all through movies, especially in this day and age... In the 20th century it was primarily novels, stage plays and music halls, etc., but today it's in everybody's TV... They program it right into you for entertainment, and then you see it happening in your life and you think 'I guess that's okay; it's sort of natural, isn't it', and you don't think any more beyond that. Where did the idea come from in the first place? It's marketed to you through entertainment, and that's the prime reason for entertainment."³¹

This technique of predictive programming is being used to condition us to accept the idea of microchip implants as inevitable, even desirable, and it has been going on for decades.

There are many examples of predictive programming for the microchip implant agenda, some more subtle than others. If you watch movies at all, it is likely that you've been exposed to some predictive programming yourself. Here are a few examples:

- The opening scene of *Logan's Run* (1976) shows a newborn baby with a crystal implant in the palm of his hand. Later in the movie, the implant begins to flash when somebody reaches the age of thirty, when it is time for their "renewal". Incidentally, a re-make of this movie is scheduled for release in 2012.

- In *Fortress* (1992), each prisoner has an "intestinator" implanted—a device designed to inflict severe pain or death for any violation of the prison rules. An article from May 2009 carrying the headline "Saudi 'Killer Chip' Implant Would Track, Eliminate Undesirables" suggests that the intestinator is here.³²

- In *Demolition Man* (1993) "San Angeles" 2032 is a highly ordered society in which everything that has been categorised as bad for you (e.g., salt, smoking cigarettes) has

become illegal. Every citizen has a microchip implant, including the freshly thawed John Spartan (Sylvester Stallone) who had been frozen and reprogrammed in a cryogenic prison.³³

- In the BBC drama *The Last Enemy* (2008), the British Home Secretary reveals her own microchip implant: "[I]ts content and function can be adapted to suit my needs. It can be my credit card, it can be door key, my car keys—I'll never lose them again. Eventually it will become universal. Starting at school age, a tag for life."³⁵ Another notable sound bite is the assertion that the microchip implant will "give back to the honest ordinary citizen freedom of movement", i.e., this particular freedom had previously been taken away.

- In the opening scene of *Conspiracy Theory* (1997), taxi-driver Jerry Fletcher (Mel Gibson) talks to his passengers about various conspiracies and happens to include a mention of George H. W. Bush's famous New World Order speech. At one point, he is talking to a lady with a dog about the chipping of pets for identification and tracking purposes. He goes on to make the point: "I mean, it's only a small logical step till they start putting it in us and our children. And then before we know it, my God! They'll probably come with the pretext..." It cuts to another conversation with a different passenger before that particular sentence is completed.

This technique of predictive programming is being used to condition us to accept the idea of microchip implants as inevitable, even desirable...

In the movie, Fletcher is made out to be a kook in a number of ways, despite the fact that he is actually a victim of a (very real) CIA mind-control program called MK-ULTRA.³⁹ Perhaps the most obvious tactic used to make the lead character appear kooky is the title of the movie itself—a derogatory label repeatedly used by the media to describe (and hence to ridicule) any hypothesis which contradicts the authorised version of events, whether or not the authorised version has been proven to be false, and whether or not the alternative hypothesis is based on verifiable facts.

What Happens Next?

The list of examples of mind-farming given above is not exhaustive. It doesn't include the various TV news items, for example, which are essentially advertisements disguised as pseudo-debate on behalf of the viewer/consumer. We can expect more of the same from an increasing number of sources as the invisible government attempts to persuade us first that being chipped is desirable, and then "normal". This would also increasingly imply that *not* to be chipped is to be abnormal, which can be unbearable for some people.

The more that people agree to be chipped, the more likely it is that the economic and technological infrastructure of the world will eventually operate on the assumption that citizens are chipped. At the time of writing, people can go to certain clubs and pay for things with an implanted chip, which is the first step. The obvious next step is simply a gradual increase in the number of places that accept this method of payment, and then we are potentially moving towards the troubling situation of *only* having the option of using an implanted chip to pay for goods and services.

The introduction of a cashless society would clearly be another unwelcome milestone to look out for, and some recent articles from different countries suggest that it could well be on its way.⁴⁶

Power To The People

We have all managed to land in a critical period in history, and our actions will affect the outcome. It can be easy to forget that all of us do actually have power, when we are constantly reminded that we have no say in the machinations of the New World Order. But we do. This agenda is not my agenda and it is not your agenda. In fact, almost everybody who could be affected by this agenda will never meet the people who are responsible for it, or even know their names. But to pull off this agenda, they need us to go along with it.

The successful implementation of the human microchipping agenda—like every other aspect of our increasingly apparent enslavement—necessitates the acquiescence of the majority. The powers-that-be need the people to comply. And legally speaking, silence connotes consent. We must not be silent. Every one of us has an individual voice to claim back and to utilise.

As political activist Mario Savio said on the Sproul Hall steps at the University of California, Berkeley, on 2 December 1964:

"There's a time when the operation of the machine becomes so odious, makes you so sick at heart, that you can't take part. You can't even passively take part. You've got to put your bodies upon the gears and upon the wheels, upon the levers, upon all the apparatus, and you've got to make it stop. And you've got to indicate to the people who run it, to the people who own it, that unless you're free, the machine will be prevented from working at all."⁴⁷ ∞

The obvious next step is simply a gradual increase in the number of places that accept this method of payment...

About the Authors:

• **Gregory Nikolettos** is the founder of the We The People Will Not Be Chipped organisation, an international movement dedicated to introducing preventive human-chipping legislation worldwide. A successful entrepreneur, Greg has a background in information technology. Having worked for *Fortune* 500 companies including Apple and Xerox, he has a keen

understanding of technology and how it relates to the global human-microchipping agenda. Based in Australia, Greg is a contributor to the worldwide alternative news press and a guest on radio programs in the UK and USA.

• **Timothy Wiseman** completed a degree in psychology at the time he began researching various agendas of the so-called New World Order—including the plan to microchip humans, which he strongly opposes. Through his membership of the We The People Will Not Be Chipped movement, he contributes to raising awareness of and opposition to this very serious agenda. Tim is based in the UK.

clean Water

Hydros water distiller

- Kills bacteria, cysts and viruses
- Removes heavy metals, chemicals & pesticides, including fluoride
- Hydros water enhances flavour in beverages & soups
- Stainless steel boiler and condensor
- Distills approx 3.2 Litres per 4.5hrs

\$30 OFF

***Buy a Stainless Steel Hydros for the same price as a White Hydros**

*limited time only

2 year warranty

save \$100

2 year warranty

clean Food

Compact living juicer/processor

- Juices all fruits, vegetables and grasses
- Comes with a bonus separate mincing attachment
- Uses the cold press method retaining live enzymes
- Recommended by Dr Sandra Cabot, author of "Raw Juices Can Save Your Life."

clean Air

Ion-70 air purifier

- Removes more pollutants more quickly utilising more functions than any comparable purifier
- May be beneficial for sufferers of asthma, sinus, respiratory and bronchial problems
- Purifies air over a huge 70m² area, harnessing nine of the latest purification technologies

TEN machines in ONE

save \$100

Lifetime motor warranty

IMMORTAL HELa CELLS AND VIRAL VODOO

Cancer cells taken from Henrietta Lacks nearly 60 years ago and distributed to cancer and vaccine laboratories around the world have contaminated hundreds of human tissue cell culture lines and ruined decades of experimental research at enormous cost.

by Alan Cantwell, MD © 2010

<http://www.ariesrisingpress.com>

The new microbiology of the human body

One of the most remarkable recent discoveries about the human body is that most of our cells are not human cells, but germ cells. Unbelievably, there are 10 times as many bacterial cells in the body as there are human cells. In addition, much of our DNA is composed of viral remnants, as reported by *New Scientist* writer Frank Ryan in "I, virus: Why you're only half human" (29 January 2010).

In health, the relationship between microbes and the body is symbiotic (that is, microbial and human cells benignly co-existing for the benefit of both). However, when the delicate balance between microbes and man becomes disturbed, illness may result. There is also growing evidence that the germs we carry may be implicated in cancer and chronic diseases. Despite all this new research, most physicians don't believe that symbiotic bacteria play any role in the development of chronic disease and cancer.

What has all this to do with cancer and vaccine research conducted over the last half-century? The answer is a series of questions. Could cancer virus and vaccine experimentation, which utilises live cells of human and animal origin, be spreading viruses and bacteria between various species? Could such experimentation be related to new, emerging diseases and viruses that are erupting in man? Or to the increasing concern and controversy over vaccine-induced human illness? Or to contamination with "HeLa" (pronounced "hee-lah") cells, the widely used experimental cancer cells that grow in cancer and vaccine laboratories like weeds?

The "witch's brew" origin of "immortal" HeLa cells

The history of human tissue cell culture began with Henrietta Lacks, a young black woman from Baltimore who died in 1951 from a highly malignant cervical cancer. Despite radiation and surgery, her tumour spread rapidly. Within eight months she was dead, at age thirty-one. But part of Henrietta's cancer remained alive. A few pieces of her tumour were taken during surgery and subsequently were donated to a laboratory specialising in tissue cell culture. In those days, this was a frustrating business. Most attempts to grow human cells outside the body failed. Rarely, a few cells would thrive for a while and then die off.

Henrietta's cells were kept alive by being fed with a concoction more like a "witch's brew" than a lab recipe for cell culture. Nevertheless, the success of the recipe heralded a new age of modern virology. As chronicled by Michael Gold in *A Conspiracy of Cells* (1986), the laboratory concoction consisted of:

1. Blood from a human placenta. (The placenta, which nurtures the developing foetus, contains powerful hormones and a host of viruses and bacteria as yet not fully investigated.)
2. Beef cattle embryo extract (the ground-up remains of a three-week-old unborn cattle embryo).

3. Fresh chicken plasma obtained from the blood of a live chicken heart.

For some unknown reason, Henrietta's cancer cells continued to grow vigorously. The cells did not age. Instead, if fed properly, they could live and multiply indefinitely. Amazingly, her new tissue culture "cell line" proved to be "immortal". These malignant cells became the first successful human tissue culture cell line in medical history—the now famous HeLa cell line commemorating the legendary HENrietta LACKs.

Gold claims that the cell line brought revolutionary changes (as well as havoc) into the field of cancer virus research. Viruses could now be seeded onto glass tubes containing sheets of live cells, and for the first time virologists could directly observe the effects of viral infection on living cells.

But what about all those known and unknown viruses and bacteria that were incorporated into Henrietta's cells by the chicken, beef and human blood and tissue mix that fed her cells and made them immortal? And what about the human papilloma virus contained in her cancer cells, which in the 1950s was not accepted as a cause of cervical cancer? Apparently there was no scientific concern about any of this contamination.

The HeLa cell contamination problem

HeLa cells proved so hardy that, when passed around the world to various laboratories over the next few decades, the immortal cells frequently contaminated

other tissue culture cell lines used in cancer and cancer virus research.

In 1974, cell culture expert Walter Nelson-Rees, PhD, discovered widespread contamination of cell lines with HeLa, using a light microscope and a special Giemsa cell stain which revealed the distinctive chromosomal aberrations typical of HeLa. As a whistleblower, he blew the lid off cancer research. Forty different human cell culture lines, used extensively in labs worldwide, were contaminated with HeLa. Millions of dollars' worth of published cancer research experiments were ruined.

...the immortal cells frequently contaminated other tissue culture cell lines used in cancer and cancer virus research.

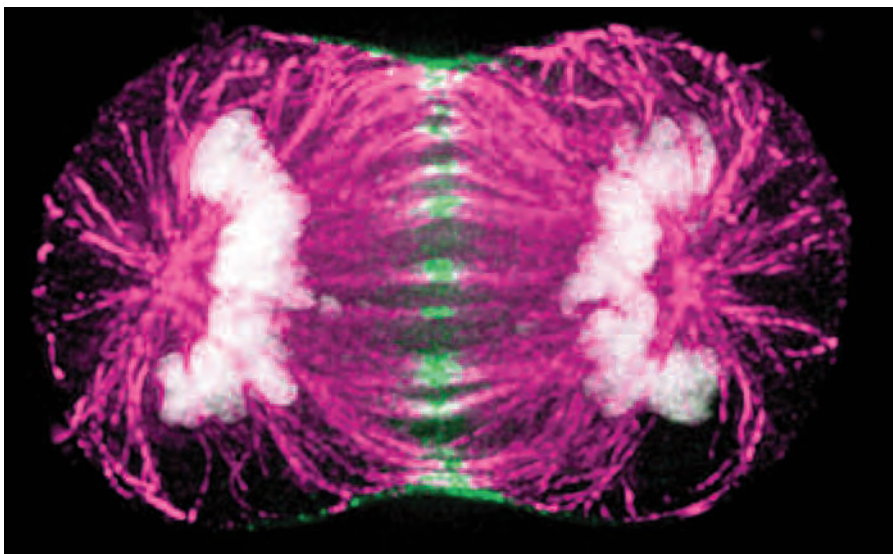

"Liver cells" and "monkey cells" used in cancer experiments turned out to be Henrietta's cervical cancer cells in disguise. Benign cells which "spontaneously transformed" into malignant cells were retrospectively found to be cell cultures which had been inadvertently contaminated with HeLa.

Even the iconic Dr Jonas Salk, who developed the Salk polio vaccine, was fooled when HeLa

cells contaminated his animal cell lines. Salk used HeLa cells to grow the polio virus and he tested the vaccine on HeLa cells before it was first used on humans in 1955. Years later, in 1978, before a stunned audience of cell biologists and vaccine-makers, he spoke about experiments he'd performed in the late 1950s on dying cancer patients. Salk injected these patients with a cell line of monkey heart tissue—the same cell line he used to harvest polio virus for his famous vaccine. He hoped the monkey cell injections would stimulate the immune system to fight cancer.

However, when abscesses developed at the site of injections, Salk began to suspect that he might be injecting HeLa cells rather than monkey cells and so he stopped the experiment.

Nelson-Rees, who also attended the 1978 conference, offered to test Salk's line if it was still available. Salk graciously agreed, and the monkey cells indeed proved to be HeLa cells which had invaded and taken over the monkey cell line. According to author Gold, Salk thought there were adequate ways to separate viruses from the tissue cell lines, so that it really didn't matter what kind of cells were used. Even if the vaccines weren't filtered, and even if whole cancer cells were injected directly into a human, Salk believed they would be rejected by

Divide and conquer: A HeLa cell splitting into two new cells. The green spots are chromosomes. (Image courtesy of Paul D. Andrews, from the *Popular Science* website, <http://www.popsci.com.au/>)

the body and cause no harm. In those days, doctors didn't much believe in cancer-causing viruses. Nowadays, no researcher would dare try injecting cancer cells into a human being. But in the 1950s, Salk had done it accidentally. He had injected cancerous HeLa cells into a few dozen patients and it hadn't bothered him a bit.

Nelson-Rees and his co-authors, in the paper "Henrietta Lacks, HeLa Cells, and Cell Culture Contamination" (*Archives of Pathology & Laboratory Medicine*, September 2009), concluded: "Despite the passing of nearly 50 years since the problem first surfaced of HeLa cell contamination of tissue cultures and despite the explosive advances in molecular biology, cell culture contamination remains an important issue for the scientific community. The problem extends far beyond HeLa cells, although they remain a culprit. In one study, 45 of 252 human cell lines (18%) supplied by 27 of 93 originators (29%) were contaminated... Fortunately, there was recently a call to action on preventing contaminated cell lines."

Wikipedia currently provides a long "List of contaminated cell lines".

Continuing cell line contamination in the 21st century

On 15 January 2010, BBC News reported that cell contamination is still a problem in cancer research and that dozens of cancer studies may be thrown into doubt by the discovery that researchers have inadvertently used the wrong type of cancer cells. The cell lines, according to a paper in the *Journal of the National Cancer Institute* (epub 14 January 2010), were supplied as samples of oesophageal cancer. However, tests show that they contained other types of tumour, including lung and bowel. The paper's authors, from the University Medical Centre in Rotterdam, noted that this could put major trials of drugs in doubt. They wrote: "Experimental results based on these contaminated cell lines have led to ongoing clinical trials recruiting patients, to more than 100 scientific publications, and to at least three cancer research grants and 11 US patents—which emphasises the importance of our findings." Widespread use of these cell lines could threaten the development of new treatments, they said.

On 31 January 2010, ABC News (USA) issued a glowing report on "How one woman's cells changed medicine". Microbiology professor Vincent Racaniello of Columbia University claimed that HeLa cells have led to some of

the greatest medical breakthroughs of the last 100 years. ABC reminds us that these immortal cells, trillions upon trillions of them, were first used in research that led to the polio vaccine; they helped in the development of medicines to fight cancer, influenza and Parkinson's disease and in the research that led to gene mapping and cloning. They were also used to test the effects of atomic radiation and were sent into outer space. "I think we owe a lot of gratitude for what Henrietta provided," Racaniello said. "There's absolutely no doubt about that."

On 5 February 2010, *Popular Science* Online declared Henrietta Lacks to be "the Most Important Woman in Medical History".

Cancer-causing monkey viruses and the polio vaccine

Scientists tell us that HIV is the first monkey virus to "jump species", causing the pandemic of AIDS. The rarely publicised truth is that a cancer-causing monkey virus jumped species into man more than a half-century ago when contaminated polio vaccines were given to millions of people in the 1950s, including half the US population of that era.

In the early 1960s, it was discovered that some lots of polio vaccines manufactured on rhesus monkey kidney tissue during the period 1955 to 1963 were contaminated with a monkey virus called Simian virus 40 (SV40). This primate virus was quickly proved to cause various cancers in experimental animals. However, to this day, government health officials still insist there is no absolute proof that SV40 causes cancer in humans.

Despite the denial, genetic and immunologic studies by independent researchers over the past decade indicate that SV40 is clearly associated with certain cancers, such as rapidly fatal cancers of the lung (mesothelioma), bone marrow cancer (multiple myeloma) and brain tumours in children.

According to a *Washington Times* report (21 September 2003): "Some of the polio vaccine given to millions of American children from 1962 until 2000 could have been contaminated with a monkey virus that shows up in some cancers, according to documents and testimony to be delivered to a House committee [on] Wednesday. The vaccine manufacturer said such claims 'don't have any validity', and the Centers for Disease Control and Prevention (CDC) agrees."

The rarely publicised truth is that a cancer-causing monkey virus jumped species into man more than a half-century ago when contaminated polio vaccines were given to millions of people in the 1950s...

More information on polio vaccine litigation and SV40 contamination can be found at www.sv40cancer.com.

For anyone who still thinks that vaccine-makers and government health officials are always your friends, I would highly recommend *The Virus and the Vaccine: The True Story of a Cancer-Causing Monkey Virus, Contaminated Polio Vaccine, and the Millions of Americans Exposed* (2004), by Debbie Bookchin and Jim Schumacher. The book explores the history of the polio vaccine, the contamination problems with SV40, the ensuing vaccine-related cancer problems and the government's cover-up of the problem.

Few people realise how dangerous vaccines can be and how complicated the process of vaccine manufacture really is, particularly when vaccines are made on living animal or human cells. Contamination with bacteria, mycoplasma and viruses and their elimination from the final product are constant problems during the development process. There are also suspicions that laboratory media used to feed cell cultures can be a source of contamination. For further details on the dangers of vaccines, see my article "Are Vaccines Causing More Diseases Than They Are Curing?", freely available on the Internet.

The vaccine connection to the origin of the AIDS epidemic

In my admittedly controversial view, HIV/AIDS is a man-made disease that was initially seeded exclusively into the US gay community via contaminated experimental hepatitis B vaccine programs conducted in the late 1970s. The details and evidence of the close relationship between the vaccine and the outbreak of the first AIDS cases in 1979 are explored in my books *AIDS and the Doctors of Death* and *Queer Blood*. One can easily Google "man-made AIDS" for numerous Internet articles on this taboo subject.

Since the publication of these books, a video has surfaced on youtube.com featuring Maurice Hilleman, PhD, one of the world's leading vaccine experts. He became famous at Merck pharmaceutical company for improving the Salk polio vaccine and for insisting that macaque kidney cells *not* be used to produce the vaccine because they were known to cause cancer in hamsters. His crowning achievement came in 1971 when he developed the MMR vaccine, the universally used measles, mumps and rubella vaccine that is the

cornerstone of paediatric health in the United States.

Dr Hilleman then turned his attention to the development of the hepatitis B vaccine. A series of experimental vaccine trials using gay men as guinea pigs took place in Manhattan, New York City, in 1978—and the first cases of AIDS were reported there a few months after the injections began.

In the video segment *Merck Chief Brings HIV/AIDS to America*, Hilleman is heard speaking with colleagues. He declares: "I brought African greens [monkeys] in. I didn't know we were importing AIDS virus at the time [i.e., between 1970 and 1974]." His colleagues are heard laughing. A male voice says: "It was you who introduced AIDS virus in the country." And a woman's voice giggles: "Now we know."

This stunning interview, conducted by Dr Edward Shorter for WGBH public television and Blackwell Science, was cut from the documentary *The Health Century* due to liability issues: no doubt it would have reflected poorly on Merck, which developed the vaccine that was injected into gay men. We are indebted to Leonard G. Horowitz, DMD, one of a handful of health professionals who is a whistleblower on man-made AIDS and vaccine issues, for uncovering and freely distributing this video segment.

As is often the fate of whistleblowers, Walter Nelson-Rees was driven out of his lab by powerful members of the scientific establishment, undoubtedly angered by the disruption to cancer research and all the money lost because of contaminating HeLa cells.

In 1999, British journalist Edward Hooper wrote a massive tome called *The River*, in which he

theorises that polio vaccines grown on primate tissue could have been contaminated with monkey viruses, thus giving rise to the outbreak of AIDS in Africa. This theory was uniformly rejected by scientists who attended the September 2000 "Origin of AIDS" conference in London. Hooper continues to allege that there's a conspiracy to silence all aspects of his hypothesis.

In the early part of 2000, Nelson-Rees, who was openly gay, took an avid interest in Hooper's extensive AIDS research. Along with Hooper, he spoke at the London conference where the polio vaccine connection to AIDS was rejected. Although retired from science, Nelson-Rees was still highly respected and was allowed to present his views.

As is often the fate of whistleblowers, Walter Nelson-Rees was driven out of his lab by powerful members of the scientific establishment, undoubtedly angered by the disruption to cancer research...

When Walter Nelson-Rees died in January 2009 at age eighty, Hooper wrote a moving obituary entitled "The Death of an American Hero" (available at www.aidsorigins.com). Hooper recalls: "Walter delivered an understated and yet powerful speech entitled 'Responsibility for Truth in Research', which pointed out that further cases of lab cross-contamination were still occurring, and went on to state that in his opinion there was no logical reason why chimp cells could not have been used to make the Congo vaccine, 'given the availability of these normal non-human cells and the prevailing custom in the 1950s of using cells about which little or nothing was known except that they could optimally support the growth of a given virus'."

The idea of man-made AIDS and contaminated vaccines is so explosive that it is routinely dismissed by the major media as "conspiracy theory". But the theory almost destroyed Barack Obama's bid for the White House in the 2008 election.

A Wikipedia entry on Dr Leonard Horowitz states: "On April 27, 2008, Barack Obama's former pastor, Jeremiah Wright, during questions and answers at the National Press Club in connection with the general controversy over his opinions, was asked by a moderator, 'In your sermon, you said the government lied about inventing the HIV virus as a means of genocide against people of color. So I ask you: Do you honestly believe your statement and those words?' Wright responded, 'Have you read Horowitz's book, *Emerging Viruses: AIDS and Ebola* ... whoever wrote that question?... I read different things. As I said to my members, if you haven't read things, then you can't ... based on this Tuskegee experiment and based on what has happened to Africans in this country, I believe our government is capable of doing anything."

For more discussion, view my article "Rev. Wright is right about man-made AIDS".

The creation of a new species

Due to their ability to replicate indefinitely (provided they are fed properly) and the development of a non-human number of chromosomes, immortal HeLa cells are now considered by some geneticists to be a contemporary creation of a new species. (A human cell has 46 chromosomes; a HeLa cell has a chromosomal number of 82.) The proposed name is *Helacyton gartleri*, in honour of geneticist Stanley Gartler, PhD, who, along with Nelson-Rees, called attention to the worldwide contamination of tissue cell cultures with HeLa.

Transformed by the cervical cancer-causing human

papilloma virus 18 and more than 50 years of continuing culture, the various strains of Henrietta's cells reproduce and spread on their own. Growing like weeds in many labs, they now appear more like amoeba-type cells than cells derived from a human. Amoebae are one-celled protozoa. There are several varieties found in humans that are not considered to be disease producers.

Twenty years ago, in *The Cancer Microbe*, I wrote about Wilhelm Reich, MD, the unfairly maligned and persecuted cancer researcher who was sentenced to a Federal penitentiary in February 1957...and was found dead in his cell on 3 November that year. He firmly believed that cancer is intimately associated with bacteria, which he called "T-bacilli". In cancer tumours artificially produced in animals, Reich observed the animal's cancer cells transforming into monster cells that greatly resemble tiny protozoa and amoebae.

Reich, in his time, was widely perceived as a menace and a crackpot. However, I'm sure he would not be surprised to learn that Henrietta's cancer cells have taken on a life of their own, much like the amoebae that he studied extensively.

The lab creation of new forms of life has not escaped the attention of the military, always on the lookout for potential agents useful for biological warfare development. The Defense Advanced Research

Projects Agency (DARPA) is an arm of the US Department of Defense. On 5 February 2010, Katie Drummond of *Wired.com* reported: "The Pentagon's mad science arm may have come up with its most radical project yet. Darpa is looking to re-write the laws of evolution to the military's advantage by creating 'synthetic organisms' that can live forever..."

"...The plan would assemble the latest bio-tech knowledge to come up with living, breathing creatures that are genetically engineered to 'produce the intended biological effect'. Darpa wants the organisms to be fortified with molecules that bolster cell resistance to death, so that the lab-monsters can 'ultimately be programmed to live indefinitely'."

Henrietta Lacks: "The Godmother of Virology"

At the end of January 2010, reviews began to appear of a new book entitled *The Immortal Life of Henrietta Lacks*, by Rebecca Skloot. The author spent 10 years researching the billion-dollar industry surrounding HeLa cells and extensively interviewed surviving family members. Lacks's family did not learn of Henrietta's "immortality" until more than 20 years after her death, when scientists investigating HeLa began using her husband and

Due to their ability to replicate indefinitely... immortal HeLa cells are now considered by some geneticists to be a contemporary creation of a new species.

children in research without informed consent. And though the cells have launched a multibillion-dollar industry that sells human biological materials, her family never saw any of the profits.

Eric Roston, reviewer for the *Washington Post* (31 January 2010), noted: "Nearly 60 years later, Lacks's tissue has yielded an estimated 50 million metric tons of HeLa cells. Scientific and medical researchers add about 300 HeLa-related studies a month to the library of 60,000 studies. Lacks's surviving family members have learned what was going on—and have become subjects of interest for researchers, too."

In a *New York Times* review (5 February 2010), Lisa Margonelli wrote: "After Henrietta Lacks's death, HeLa went viral, so to speak, becoming the godmother of virology and then biotech, benefiting practically anyone who's ever taken a pill stronger than aspirin... HeLa has helped build thousands of careers, not to mention more than 60,000 scientific studies, with nearly 10 more being published every day, revealing the secrets of everything from aging and cancer to mosquito mating and the cellular effects of working in sewers. "Deborah [Henrietta's daughter] becomes the book's driving force, as Skloot joins her in her 'lifelong struggle to make peace with the existence of those cells, and the science that made them possible'. To find the mother she never got to know, she read hundreds of articles about HeLa research, which led her to believe that her mother was 'eternally suffering' from all the experiments performed on her cells."

Horizontal gene transfer: gene swapping among life-forms

While HeLa cells were spreading around the world and contaminating cell cultures, there was little appreciation of how life-forms related to one another. Scientists now have a better knowledge of how viruses can "recombine" with other viruses. Viruses can also infect bacteria as well as human cells.

Over the past two decades, molecular scientists have become more and more aware of the back and forth gene-swapping between and among various species of life, from the smallest forms up to the largest. The process is known as "horizontal gene transfer". We are familiar with "vertical gene transfer", whereby the offspring of an organism inherits genes from its parent.

Horizontal gene transfer in cancer and vaccine research is a serious hazard because genetic engineering experiments allow the spread of dangerous transgenic DNA from species to species. This has tremendous implications for theories of evolution, as

well as for cancer virus research when viruses are moved between various species of animals and sometimes adapted to human cells. This is basically what scientists were doing in the War on Cancer throughout the 1970s, the period right before the AIDS epidemic erupted in 1981 (see my book *AIDS and the Doctors of Death*). For more information, simply Google the key words "dangerous lateral gene transfer".

HeLa cell research: science or scientific madness?

Having graduated from medical school a half-century ago, I am disillusioned with my chosen profession. I spent 40 years researching the bacterial cause of cancer and showing bacteria in cancer tissue, where, according to the cancer experts, there aren't supposed to be any. This research sparked little, if any, interest among my colleagues. I spent a quarter-century trying to alert people to the evidence that AIDS is a man-made disease, with no response from the AIDS experts who

educate people about HIV coming out of the African jungle to cause AIDS.

What do I really think about HeLa cells? HeLa cells are cancerous cells (infected with a known cancer-causing papilloma virus) to which was added the blood from a human placenta, ground-up beef cattle embryo and chicken plasma extracted from the blood of a live chicken heart. This is a concoction that I would expect

from someone practising witchcraft, not good science. To use HeLa cells as a foundation, a cornerstone, a template, upon which to base viral studies strikes me as viral voodoo.

How can an infected cell culture like HeLa possibly help in cancer and vaccine research? Except to spread the known and unknown viruses, mycoplasma, bacteria and God only knows what other potentially infectious agents are contained within Henrietta's cells and the new species *Helacyton gartleri*.

The legacy of Henrietta Lacks

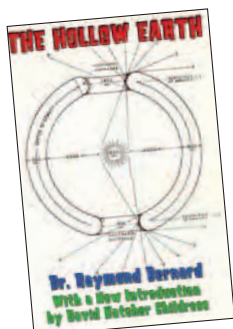

In all my research for this article, the one bit of reading that made more sense to me than any other was provided by an anonymous blogger who posted comments on the *Baltimore Sun* website (1 February 2010; reproduced here with minor editing) regarding Rebecca Skloot's new book:

"A complete and total injustice was done to her family to obtain these cells, and now some crazy cancer cells that KILLED her are IN US ALL. That's right: if you have ever gotten a vaccine, you got a little HeLa in you.

To use HeLa cells as a foundation, a cornerstone, a template, upon which to base viral studies strikes me as viral voodoo.

*NEW: Hollow Earth Classic - back in print -

THE HOLLOW EARTH (with a new introduction by David Hatcher Childress)

by Dr. Raymond Bernard

Yes, this classic book is back in print! Researcher and author David Hatcher Childress adds a lengthy but informative introduction, which basically reveals who Raymond Bernard (a pseudonym for Dr. Walter Siegmester) really was, and how he came about to writing this infamous book. Dr Bernard believed that in the hollow interior of the Earth lives a super-race which wants nothing to do with man on the surface. This mysterious race only launched their flying saucers after mankind started using A-bombs.

THE GIZA DEATH STAR

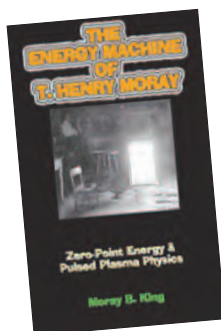

THE GIZA DEATH STAR

by Joseph P. Farrell

This is physicist Joseph Farrell's amazing book on the secrets of the Great Pyramid of Giza. Topics discussed: An Archaeology of Mass Destruction, Thoth and Theories; The Machine Hypothesis; Pythagoras, Plato, Planck, and the Pyramid; The Weapon Hypothesis; Encoded Harmonics of the Planck Units in the Great Pyramid; The Grand Gallery and its Crystals: Gravito-acoustic Resonators; The Other Two Large Pyramids, the "Causeways," and the "Temples." Also: • A Phase Conjugate Howitzer • Evidence of the Use of Weapons of Mass Destruction in Ancient Times • High Frequency Direct Current "Impulse" Technology • How the Giza Death Star worked - and more.

FREE ENERGY?

THE ENERGY MACHINE OF T. HENRY MORAY: Zero-Point Energy & Pulsed Plasma Physics

by Moray B. King

In the 1920s T. Henry Moray invented a "free energy" device that reportedly output 50 kilowatts of electricity. It could not be explained by standard science at that time. The electricity exhibited a strange "cold current" characteristic where thin wires could conduct appreciable power without heating. Moray suffered ruthless suppression, and in 1939 the device was destroyed. Frontier science lecturer and author Moray B. King explains the invention with today's science: Modern physics recognizes the vacuum contains tremendous energy called the zero-point energy. The purpose of this book is to inspire engineers and inventors so that a new energy source can become available to mankind.

MASS MIND CONTROL

MASS CONTROL: ENGINEERING HUMAN CONSCIOUSNESS

by Jim Keith

Conspiracy expert Keith's final book on mind control, Project Monarch, and mass manipulation. Keith says that here stands the New Man. From the first stirrings of the psychological and technological control of humanity at the turn of this century, to the creation of an education system intended to dumb students down rather than teach them. From the creation of the CIA and secret societies of the elite, to mass drugging of the population. From the use of subliminal persuasion, to the creation of cults of control. Finally, to the invention of top secret mind control devices with capabilities far beyond anything that the media has ever revealed to an unsuspecting public.

It's Your Body

You only get one body so look after it. The Melbourne Food Depot have been helping health conscious people, practitioners and major healthcare manufacturers since 1996. Our products are sourced, tested and re tested to maintain quality under our various certification systems.

Instructions

Photocopy or tear out this page and select the items you wish to purchase in section one. If you wish to order multiple items of the one thing just write the number required on the line next to the product. Fill in your address and payment method in section two. Be sure to include a daytime contact telephone number just incase we need to call you. Send in your order to us for fast processing, most orders will leave same day.

1. Select Your Items

	Price	# of bags	Cost
Potassium Citrate Powder 5 kg Bag - Reduces the acidity of urine & used in the treatment of gout.	\$77		
Xylitol Powder 5kg bag - Made in Finland from birch bark not in the lab in China.	\$200		
Citric Acid Granules 5kg bag - Used to activate MMS and as a buffering agent.	\$80		
L-Lysine Granules 5kg bag - This amino acid is used to control herpes and aid tissue repair.	\$250		
L-Taurine Powder 5kg bag - This amino helps in treatment of blood pressure and cardiovascular conditions.	\$260		
Beetroot Powder 5kg bag - Beetroot powder used to increase vitamin intake naturally.	\$190		
Garlic Granules 5kg bag - Anti bacterial, anti viral, and anti fungal activity also helps to prevent heart disease.	\$60		
Sodium Chloride Powder 5kg bag - Pure pharmaceutical grade salt.	\$36		
Magnesium Foot Bath Salts 5kg bag - Excellent source of magnesium for external applications.	\$39		
Malic Acid Powder 5kg bag - Boost immunity and flush your liver.	\$80		
Sodium Bicarbonate Powder 5kg bag - Aluminium free great for alkalising your body.	\$34		
Calcium Lactate Powder 5kg bag - Excellent source of easily adsorbed calcium, great for bones.	\$320		
Magnesium Chloride Flakes 5 Kg bag - The best way for your body to obtain magnesium from Japan.	\$115		
Psyllium Husk 95% 2.5Kg bag - Helps bowel function and lowers cholesterol.	\$50		
Fructose Powder 5Kg bag - Fructose, known a fruit sugar, manufactured from beet sugar in Europe.	\$50		
Total Amount due:		\$

AN OVERVIEW OF EARTH EXPANSION TECTONICS

Evidence from magnetic striping and age-dating of oceanic bedrock suggests that the Earth has been expanding throughout its geological history. The theory of Plate Tectonics must now be re-examined.

Part 1 of 2

by James Maxlow, PhD © 2010

Email:
contact@jamesmaxlow.com

Website:
<http://www.jamesmaxlow.com>

When I first started researching Expansion Tectonics, (the late) Professor Sam Warren Carey (Emeritus Professor of Geology, University of Tasmania) stated profoundly to me: "If 50 million believe in a fallacy, it is still a fallacy." The point he was making is that the validity of any theory does not depend upon the number of people believing it; hence, an accepted theory may still be fundamentally wrong regardless of how many people believe it is correct.

For instance, the Plate Tectonics interpretation of global data is based on the fundamental premise that the Earth's radius has remained constant, or near constant, throughout history. As will be outlined in this paper, this contrasts with an Expansion Tectonics interpretation of the same global data which is based on the fundamental premise that the Earth's radius has been steadily increasing throughout Earth history.

It should be appreciated from this statement that all modern and historical global data used to substantiate both Plate Tectonics and Expansion Tectonics theories are in fact identical. The only reason why Plate Tectonics theory won acceptance 50 years ago is because debate on whether or not the Earth's radius does or does not change with time was largely hypothetical, since it couldn't be convincingly verified or measured.

Since then, there has been a quantum leap in technology—from developments in computers, data-gathering and processing capabilities to advances in software, satellite technologies and media presentation—as well as in peoples' understanding of our physical Earth and global tectonics principles.

The timing of my initial research into Expansion Tectonics was both fortunate and critical. Completion of the published bedrock Geological Map of the World used in my model studies (figure 2) coincided with commencement of my research. Without this world mapping, Expansion Tectonics would have continued to remain in the dark ages. In addition, computer hardware and software technology has caught up with the need to present Expansion Tectonics Earth models and supporting time-constrained data on spherical Earth globes.

These are most important outcomes of my Expansion Tectonics research to date:

- Modelling of continental plate assemblages has now been completed for 100 per cent of Earth's geological history, ranging from the early Archaean Aeon to the present day. These assemblages have demonstrated a high degree of crustal-fit accuracy—most notably without the need to arbitrarily fragment continents or dispose of pre-existing crusts by subduction.
- A formula for the rate of change in Earth's radius has been established and modelling of physical data completed. This mathematical modelling demonstrates that Earth's radius has been increasing exponentially throughout time to a current rate of 22 millimetres per year.

- Ancient magnetic poles plus equators have been accurately located on all models constructed. Both poles plot as diametrically opposed north and south poles, enabling the ancient equators and climate zones to be established precisely.
- Geological, geographical and geophysical data have been investigated on all models. These data are shown to coincide precisely with expected polar and equatorial climatic and biotic constraints.
- Models have been animated in four dimensions, showing the increase in Earth radius throughout time along with global distribution of selected data sets.

GEOLOGY AND THE ROCK RECORD

Geology (from the Greek *gê*, "Earth", and *logos*, "speech") literally means to talk about the Earth, and it is defined as the science and study of the solid matter that constitutes the Earth. To me, this definition must go a step further and acknowledge that the rocks making up the Earth are in fact a record of the physical processes affecting the Earth throughout its entire history. It is like an open book waiting to be read. To understand and talk about the "rock record" preserved in rocks, you therefore need to understand the language of geology.

James Hutton is often viewed as the first modern geologist. In 1785, he presented a paper to the Royal Society of Edinburgh which was published in 1788 as "Theory of the Earth". In this paper he suggested that the Earth must be much older than previously supposed in order to allow enough time for mountains to be eroded and for sediments to form new rocks at the bottom of the sea, which in turn were raised up to become dry land. In 1795, Hutton published a two-volume version of his ideas.

Since then, our knowledge of geology has extended worldwide, with a vast amount of global geological, geographical and geophysical data stored and published for all to use and interpret. The primary concern during my early research into Expansion Tectonics was that this modern data had never been tested on models of an expanding Earth. Our perception of global tectonics principles was, and still is, severely biased towards Plate Tectonics at the expense of alternative theories.

HISTORICAL WAYS OF VIEWING THE EARTH

Many theories have come and gone throughout past millennia, in particular after the science of geology was formally recognised. The Flat Earth theory, popular in ancient times, is now largely historical but serves as a

useful starting point in understanding the progression of our knowledge about the Earth through history. This concept stems from the limited knowledge of the size and configuration of the Earth in ancient times and, of course, from the limited number of "scientists" or philosophers capable of gathering enough information to make meaningful sense of the knowledge available.

The suggestion that continents have not always been at their present positions was introduced as early as 1596 by the Flemish map-maker Abraham Ortelius. He suggested that, based on the symmetrical outlines of the Atlantic coastlines, the Americas, Eurasia and Africa were once joined and have since drifted apart "by earthquakes and floods", creating the modern Atlantic Ocean. As evidence, he wrote: "The vestiges of the rupture reveal themselves, if someone brings forward a map of the world and considers carefully the coasts of the three continents."

By 1915, Alfred Wegener was presenting serious arguments for the idea of "continental drift" in the first edition of his book *The Origin of Continents and Oceans*. He noted how the east coast of South America and the west coast of Africa look as if they were once attached. While Wegener wasn't the first to note this, he was the first to gather significant fossil and geological evidence to support this simple observation. His ideas, however, were not taken

seriously by most geologists of that period, who pointed out that there was no apparent mechanism for "continental drift", as it was then called. Specifically, they did not see how continental rock could possibly plough through the much denser rock that makes up oceanic crust.

It is interesting to note that for his presentation "The Tectonic Approach to Continental Drift" at a 1958 University of Tasmania symposium, Professor Sam Carey made scale models of the Earth. He demonstrated that "if all the continents were reassembled into a Pangaea configuration on a model representing the Earth's modern dimensions, the fit was reasonably precise at the centre of the reassembly and along the common margins of Northwest Africa and the United States east coast embayment, but became progressively imperfect away from these areas". Carey concluded from this research that the fit of these ancient continents "could be made much more precise in these areas if the diameter of the Earth was smaller at the time of Pangaea". With the acceptance of Plate Tectonics, Carey's basic physical observations and conclusions have been totally ignored.

During this same time, there were a number of

This mathematical modelling demonstrates that Earth's radius has been increasing exponentially throughout time, increasing to a current rate of 22 millimetres per year.

independent thinkers who instead considered that the opening of the oceans could be attributed to an increase in the Earth's radius. Roberto Mantovani, in 1889 and again in 1909, published a theory of "Earth expansion and continental drift". In this theory, he considered that a closed continent covered the entire surface on a smaller Earth. He suggested that thermal expansion led to volcanic activity, which broke the land mass into smaller continents. These continents then drifted away from each other because of further expansion at the "rip-zones", where oceans currently lie. This theory was followed by the pioneering work and publications of B. Lindemann in 1927, Ott Christophe Hilgenberg in the 1930s, Professor Sam Carey during the 1950s to late 1990s, Jan Kozier during the 1980s, and Klaus Vogel in the 1980s and 1990s.

These researchers all showed that if each of the continents were physically fitted together, they would neatly envelop the Earth with continental crust on a small Earth globe some 55 to 60 per cent of its present size. This coincidence led Hilgenberg, Carey and Vogel in particular to conclude that terrestrial expansion brought about the splitting and gradual dispersal of continents as they moved radially outwards during geological time.

The perceived failings and shortfalls of each of these theories, however, eventually led to the acceptance of Plate Tectonics theory in the 1960s. This theory is now credited to have arisen out of the hypothesis of continental drift, as first proposed by Alfred Wegener.

Most of us are now reasonably familiar with the concept of Plate Tectonics, whereby the Earth's outer crust is said to be made up of a series of large, rigid, plate-like crusts that randomly move over the Earth's surface under the influence of mantle convection currents. In the process of random migration, the crustal plates are said to rift, slide past one another and/or periodically collide to form mountains and subduct beneath continental crusts. The primary assumption and absolute basis of Plate Tectonics is that the radius of the Earth has remained constant, or near constant, throughout its 4,500-million-year life span.

CONTRIBUTIONS TO MODERN TECTONICS THEORY

In 1947, a team of scientists led by Maurice Ewing, utilising the Woods Hole Oceanographic Institution's research vessel *Atlantis*, confirmed the existence of a rise

in the level of the sea floor in the central Atlantic Ocean; this rise is now known as the "mid-ocean ridge". They also found that the floor of the seabed beneath the layer of sediments consisted of basalt—not granite, as previously assumed, which is one of the main constituents of continents. In addition, they found oceanic crust to be much thinner than continental crust.

All of these new findings raised important and intriguing questions about the way we perceive oceanic crust. The most important of these is that the ocean is not simply "oceanised" continental crust covered by sea water, as previously thought.

Beginning in the 1950s, scientists using magnetic

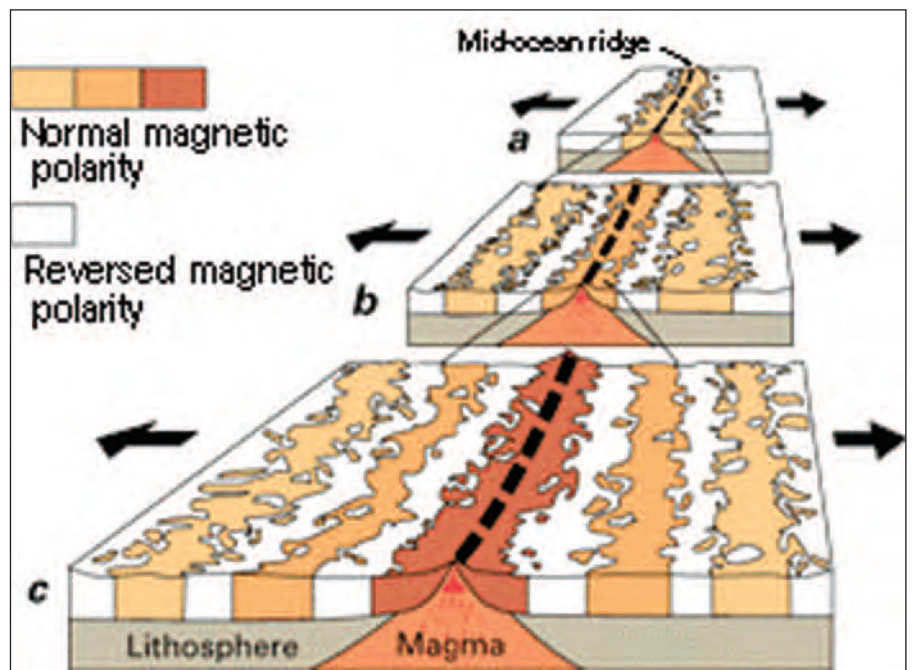

Figure 1: Symmetrical magnetic striping across part of the Atlantic Ocean mid-ocean ridge (Source: http://en.wikipedia.org/wiki/Plate_tectonics#Explanation_of_magnetic_striping)

instruments (magneto-meters), adapted from airborne devices developed during World War II to detect submarines, also began recognising odd magnetic patterns across the ocean floor. This finding, though unexpected, was not entirely surprising because it was known that basalt, the iron-rich volcanic rock making up the ocean floor, contains a strongly magnetic mineral called magnetite, which can cause local distortions in compass readings. More importantly, because the presence of magnetite gives the basalt measurable magnetic properties, these newly discovered magnetic sea floor patterns provided an important means to study the distribution of volcanic rocks throughout each of the ocean floors.

As more and more of the sea floor was mapped during the 1950s, it was discovered that the magnetic patterns were not random or isolated occurrences; instead, they revealed recognisable zebra-like stripes which were

symmetrical about the mid-ocean ridges. Alternating stripes of rock were shown to be laid out in parallel rows on either side of the mid-ocean ridge, one stripe with normal polarity and the adjoining stripe with reversed polarity. The overall pattern, defined by these alternating bands of normally and reversely polarised rock, became known as "magnetic striping".

The discovery of this symmetrical magnetic striping pattern suggested a close relationship between the mid-ocean ridges and the stripes. In 1961, scientists (most notably the American geologist Harry Hess) began to theorise that the mid-ocean ridges mark structurally weak zones where the ocean floor is being ripped apart lengthwise along the mid-ocean-ridge crest. It was suggested that new volcanic magma from deep within the Earth must rise through these weak zones and eventually erupt along the crest of the ridges to create new oceanic crust. This process, later called "sea floor spreading", operates over many millions of years and continues to form new ocean floor all along the 60,000-kilometre-long system of mid-ocean ridges now known to be present in all of the oceans.

This hypothesis is supported by several lines of evidence. At or near the crest of the mid-ocean ridges, the rocks are very young and they become progressively older away from the ridge crest. The youngest rocks at

the ridge crest always have present-day (normal) polarity. Stripes of rock parallel to the ridge crest were shown to have alternated in magnetic polarity (normal–reversed–normal, etc.), suggesting that the Earth's magnetic field has reversed many times throughout the planet's history.

By explaining both the zebra-like magnetic striping and the construction of the mid-ocean-ridge system, the sea floor spreading hypothesis quickly gained converts. Furthermore, the oceanic crust now came to be universally appreciated as a natural "tape recording" of the history of the reversals in the Earth's magnetic field.

Subsequent work by the Commission for the Geological Map of the World and UNESCO during the 1980s led to the publication in 1990 of the bedrock Geological Map of the World (figure 2). In this global map, the magnetic striping discussed above was taken a step further. By dating the ages of the ocean floor bedrock at regular intervals throughout each of the oceans and comparing these ages with the magnetic striping, scientists were able to display ocean floor crust according to the ages of the rocks.

What this means is that the yellow stripes in figure 2, for instance, located between the younger red stripes and the older orange stripes, represent volcanic rocks that erupted along the ancient mid-ocean ridges during

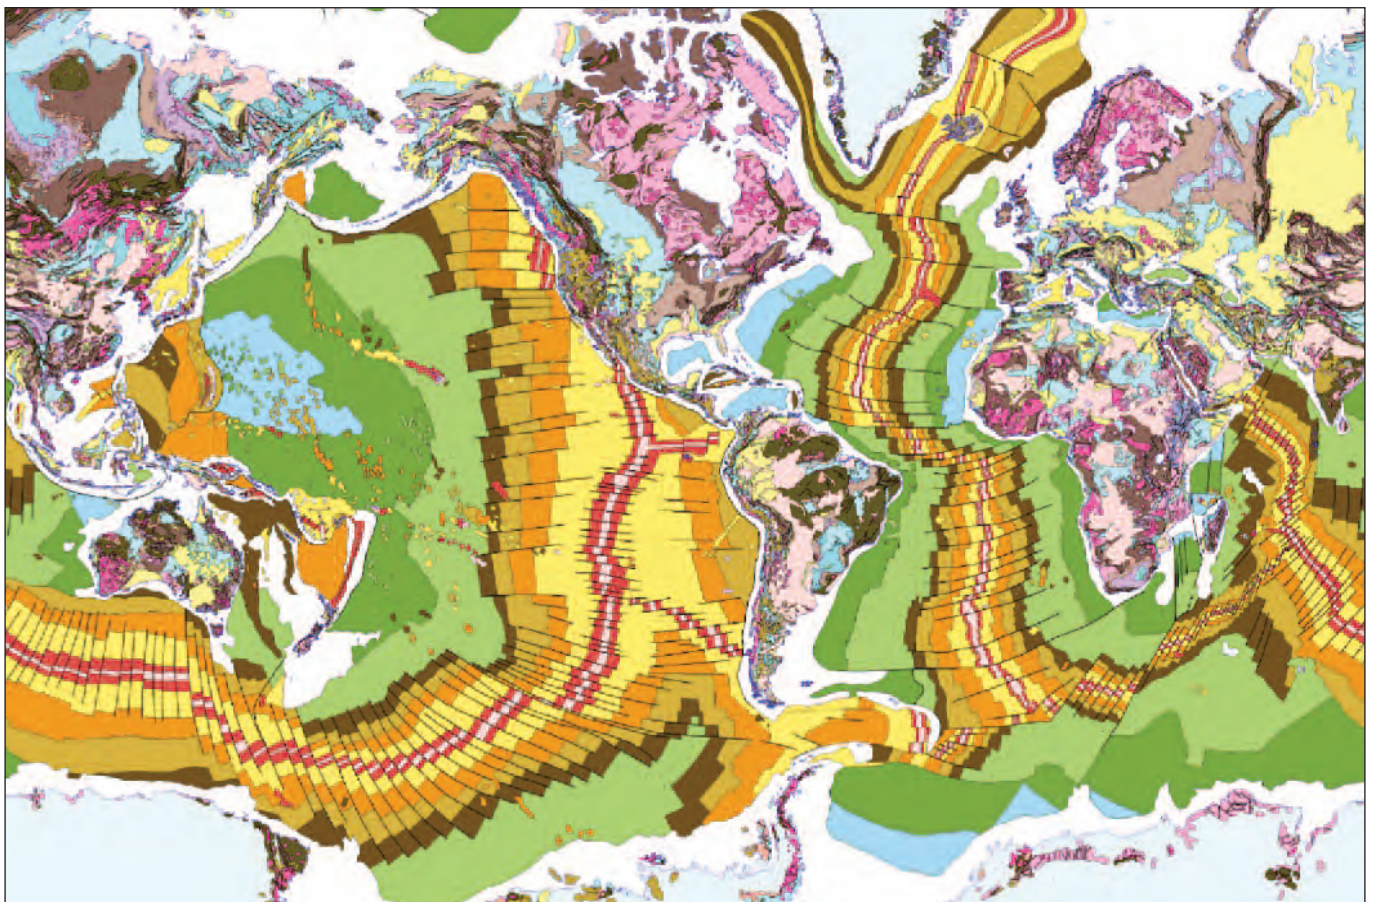

Figure 2: Geological Map of the World (Commission for the Geological Map of the World and UNESCO, 1990)

the Miocene Epoch, extending from six to 23 million years ago. At that time, the younger red and pink rocks did not exist and the two yellow Miocene stripes were joined together along their common mid-ocean ridge.

IMPORTANT CONSIDERATIONS

At this stage, there are a number of very important considerations about the crustal mapping shown in the above figures that must be fully appreciated.

- First, the striping shown in figure 2 shows that each of the oceans contain a mid-ocean ridge (currently centred below the pink stripes) and each ocean is increasing its surface area with time.

This increase in surface area is shown to be symmetrical within each ocean. The maximum age of exposed ocean floor crust is Early Jurassic—about 165 million years old (pale blue areas).

- Second, if it were possible to move back in time, each of the stripes shown in figures 1 and 2 must be successively removed and the corresponding edges of each coloured stripe must be moved closer together as we move back in time; that is, the volcanic rocks (and similarly the ocean waters) within each stripe must be returned to the mantle from where they originally came.

- Third, as we move back in time, each of the continents must move closer together in strict accordance with the striping evidence recorded on the map in figure 2, regardless of which tectonics theory is adhered to.

- Fourth, subduction of crusts beneath continents is an artefact of the basic Plate Tectonics requirement for a constant Earth radius. The symmetrical striping evidence shown does not support subduction, and subduction is not required if the Earth is increasing its radius.

It should also be appreciated that none, or very little, of this magnetic striping and age-dating evidence was available when Plate Tectonics theory was first proposed. The global distribution of the magnetic striping and age-dating was in fact completed later in order to quantify the plate motion history and therefore the Plate Tectonics history of each ocean.

EXPANSION TECTONICS VS PLATE TECTONICS

As previously stated, the primary global geological, geographical and geophysical evidence used to quantify both Plate Tectonics and Expansion Tectonics theories is identical. The difference between each theory simply

boils down to whether or not the presumed need for a constant Earth radius premise is true or false.

In Plate Tectonics theory, it is presumed that the radius of the Earth has remained essentially constant with time. As new volcanic rocks are injected along the mid-ocean-ridge spreading axes, the ocean floors widen allowing newer oceanic crust to form. To maintain a theoretical constant-radius Earth, an equal amount of pre-existing oceanic or continental crust must then be disposed of elsewhere and returned to the mantle by a theorised process called "subduction". This subduction process forms the basis for Plate Tectonics theory and consequently is essential for maintaining a static-radius Earth premise.

Alternatively, for an Expansion Tectonics Earth, the very same volcanic rocks injected along the mid-ocean-ridge spreading axes again widen and add to the surface area of ocean floor. For an Expansion Tectonics Earth, this increase in surface area of all ocean floors is a reflection of an increase in Earth radius, and therefore there is no requirement for any net disposal of excess crust by subduction processes.

For an Expansion Tectonics Earth, prior to about 200 million years ago the modern ocean basins did not exist. At that time, all continental crust was united to form a single supercontinent called Pangaea, enclosing the entire ancient Earth at about 52 per cent of the present Earth radius. Instead of the modern oceans, a network of relatively shallow seas covered low-lying parts of the Pangaeian supercontinent. All of

the relatively young ocean-floor volcanic crusts, as well as much of the ocean waters and atmosphere, were retained within the mantle where they originated.

While arguments can be given for and against both theories, it is emphasised that the exact same crustal fragments making up both the ancient supercontinents and the modern continents can be fitted together precisely, somewhat like a spherical jigsaw, on a smaller-radius Earth to form a single supercontinent. This is the question that must then be answered: is this empirical phenomenon fact or mere coincidence?

OVERVIEW OF EXPANSION TECTONICS

Acceptance of Expansion Tectonics as a viable tectonics process is currently envisaged by many researchers to be thwarted by major obstacles which supposedly "outnumber the evidence in favour".

At that time, all continental crust was united to form a single supercontinent called Pangaea, enclosing the entire ancient Earth at about 52 per cent of the present Earth radius.

These opinions are based on very outdated and arguably emotive and opinionated research carried out during the 1950s to 1970s, well before the advent of modern Plate Tectonics, computer technology, global data-gathering capabilities and multimedia communication. Unfortunately, these same outdated opinions are being carried through to recent literature without proper scientific investigation, regardless of new advances made in Expansion Tectonics research.

Expansion Tectonics theory simply removes one primary premise from current tectonics theory: namely, the assumption that the Earth's radius is constant. By removing this premise, we are then in a position to apply correct scientific principles to test whether the global data are in fact better explained on an Earth undergoing an increase in radius with time.

The completion of oceanic magnetic mapping and age-dating of the crust beneath all of the Earth's major oceans (figure 2) has provided a very important tool to quantify Expansion Tectonics. This ocean floor mapping has placed finite time constraints on the plate motion history shown in all the oceans extending back to before

the Early Jurassic Period (i.e., to about 200 million years ago). This mapping is used in Expansion Tectonics to quantify both plate reconstruction and the rate of crustal generation on small Earth models.

Four views of a set of 11 spherical models, extending from the Early Jurassic Period to the present, are shown in figure 3 below. These models have since been extended back in time to the early Archaean Aeon (about 4,500 million years ago), and one model has been projected to five million years into the future (not shown here).

To construct each of the models, successively older geological time stripes paralleling the mid-ocean spreading ridges (figure 2) are simply removed. Each crustal plate is then restored to a pre-spreading or pre-extension configuration at a reduced Earth radius along their common plate or continental margin respectively. By successively removing young oceanic crust and reuniting the continental and oceanic plates along their common mid-ocean ridges, each of the models shown in figure 3 demonstrates a better than 99 per cent plate fit-together.

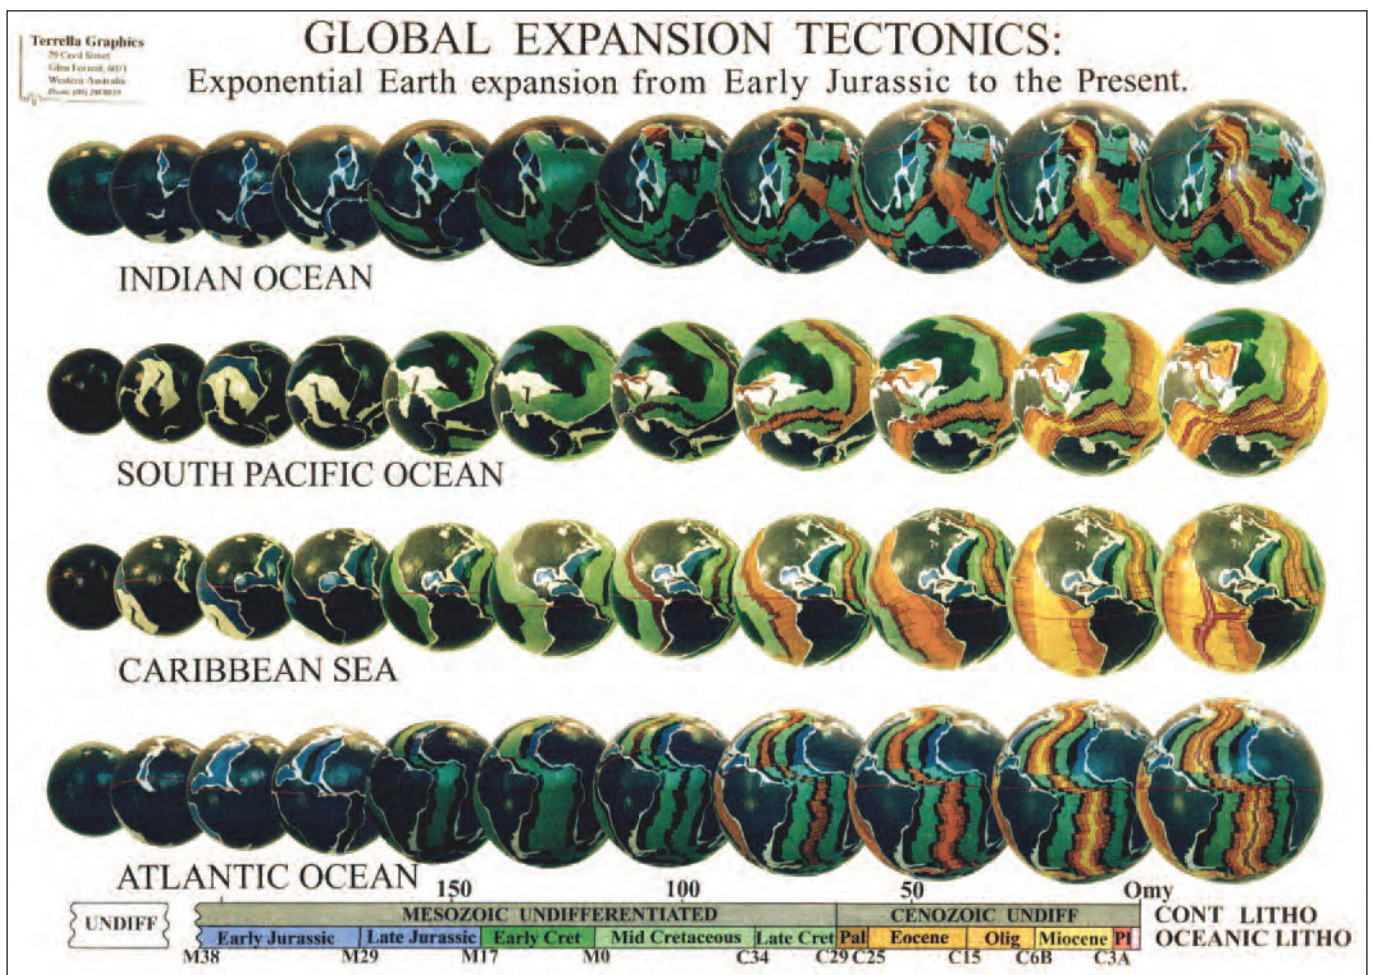

Figure 3: Spherical Early Jurassic to Present-day Expansion Tectonics models. Models show the relative increase in Earth radii during Earth history, and include basic continents plus oceanic geology. (Geology after the CGMW and UNESCO Geological Map of the World, 1990)

On these models, during the Triassic Period (the time period before the Jurassic) continental crust as well as sediments deposited around the continental margins are then shown to envelop the Earth as a complete continental shell at about 52 per cent of the present Earth radius. At that time, the sediments along the continental margins (shown as white in figure 3) formed a global network, representing the location of shallow seas surrounding and on-lapping the ancient continental lands.

This unique fit-together of the lands and ancient seas demonstrates that Expansion Tectonics is indeed a viable process. Modelling oceanic and continental crusts on a reduced-radius Earth model effectively removes the need to arbitrarily fragment continents to maintain a constant Earth radius. It also removes the need to dispose of excess oceanic crust by subduction when opening each of the modern oceans.

GEOLOGICAL, GEOGRAPHICAL AND GEOPHYSICAL EVIDENCE

All rocks contain an immense amount of geological, geographical and geophysical evidence which, to the trained eye, has a complex but variable history of formation, metamorphic change, chemical and erosive weathering, climatic influence, biotic activity and metallic worth to tell us. Using the models shown in figure 3, we now have a platform on which we can piece together this physical evidence so as to locate the ancient poles and equators, distributions of exposed lands, mountains, ice-caps, seas and shorelines, the distribution, dispersal patterns and extinction histories of flora and fauna, the ancient climatic zones ranging from polar ice-caps to equatorial zones, and the formation and distribution of metallic and hydrocarbon resources.

Ancient Magnetic Poles

The published ancient magnetic pole information (the location of ancient magnetic poles established from measuring the remnant magnetism in iron-rich rocks) in particular provides conclusive evidence in support of Expansion Tectonics. When this magnetic pole data is plotted on Expansion Tectonics models, it demonstrates that all pole data plot as diametrically opposed north and south poles for each model.

These models show that the ancient North Pole was located in eastern Mongolia–China throughout the Precambrian Superaeon and the Palaeozoic Era. As the continents slowly migrated south during subsequent increase in the Earth's radius, there was an apparent

northward polar wander through Siberia to the North Pole's present location within the Arctic Ocean. Similarly, the ancient Precambrian and Palaeozoic South Pole was located in western Central Africa, and as the continents slowly migrated north there was an apparent southward polar wander along the South American and West African coastlines to the South Pole's present location in Antarctica.

The locations of these magnetic poles, as well as the derived ancient equators, independently confirm the model reconstructions shown in figure 3 and again suggest that Expansion Tectonics is indeed a viable process.

Ancient Geography

The ancient geography of the Earth forms the basis for defining the interrelationships of exposed continents, intervening seaways, mountains and crustal movements, and it enables the conventional Pangaea, Gondwana, Laurentia, Baltica, Laurussia and Rodinia supercontinents to be quantified on an Expansion Tectonics Earth.

The ancient coastlines, when plotted on Expansion Tectonics models, show that the large Panthalassa, Tethys and Iapetus oceans are not required during reconstruction. This is because on an Expansion Tectonics Earth, all modern oceans are removed and continents are assembled as a single continental crust. These

inferred oceans are instead replaced by smaller Panthalassa, Tethys and Iapetus seas located on or between the ancient continents.

The early Panthalassa and Iapetus seas developed during the Early Permian to Early Jurassic periods (260 to 165 million years ago) as shallow sedimentary basins within the present western North Pacific Ocean and North Atlantic Ocean regions respectively. These then progressively opened and extended throughout the Mesozoic and Cenozoic eras to become the modern Pacific and Atlantic oceans. In contrast, the Tethys Sea had its origin during the early Precambrian Superaeon as a continental sea located within what is now Europe and Asia. This sea then progressively enlarged and extended in area during the Precambrian and the Palaeozoic and Mesozoic eras during crustal extension and subsequent opening of the modern oceans.

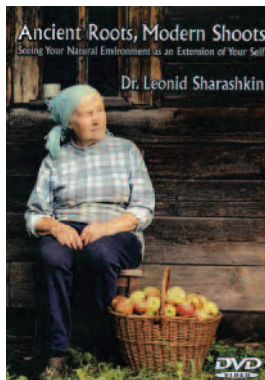

Changes in sea level on an Expansion Tectonics Earth are then shown to occur in response to climatic change as well as a shift in the distribution of continental seas, and to crustal movements, mountain building, erosion,

This unique fit-together of the lands and ancient seas demonstrates that Expansion Tectonics is indeed a viable process.

Working with current definitions of self-hypnosis, I have developed several postulates toward relating hypnosis to extrasensory perception (ESP). These include a mathematical formula on how to induce ESP via forms of self-hypnosis. A technique or method of induction is proposed which was challenged in a national tournament of experts; the results overwhelmed the competition by two orders of magnitude.

Studies in Paranormal Fields

In the late Fall of 1971, I was contacted by Ted Krueger of Seal Corporation in Amherst, Massachusetts. Seal Corp. was very interested in the ESP work being done by our Organization for the Advancement of Knowledge, Inc. (OAK, Inc.). By 1970, OAK had already developed into a "think-tank" for Boeing (also to include Battelle Pacific Northwest and Douglas United Nuclear). By 1972, it had grown into a large research group as a result of the Paraphysics (Natural Sciences) course I'd taught within the Experimental College at the University of Washington. OAK, Inc. developed out of that set of classes, with more than 450 people taking the Paraphysics course over a 12-week period. Other schools then offered this very popular course, including Evergreen Experimental College and three regional community colleges. From there, a number of the students wanted to go further and do some actual study in the paranormal field. Most of the members were graduate students or part of other think-tanks prior to OAK's invitation. By 1973, more than 25 scientists and six graduate students were working on various projects, primarily involving ESP and biofeedback studies.

So, Seal Corp. wanted to develop supermen with skills verging on the paranormal. Its first ESP project was to create a subjective screening questionnaire geared toward those whose ability with guessing (ESP) was beyond normal inference. (Also known as standard deviation, normal inference is defined as 50 per cent for guessing the flip of a coin.) The questionnaire was designed to help identify those individuals in the top two per cent (over normal inference) and worthy of possible further training.

The amount of data needed to confirm a strongly subjective questionnaire meant testing a tremendous number of subjects. The Good Samaritan Church of Seattle in the Highline District came to the rescue. More than 50 members (mostly housewives) helped test more than 25,000 individuals (mostly college students) during a one-year study. That group later became known as Sam-Psych, and it still exists as a study group in Seattle. It eventually helped develop other programs.

One of these later programs was Project Parafile, an artificially intelligent computer database on an IBM 360, developed for Mankind Research Unlimited (MRU). MRU was a front organisation for naval intelligence agencies in producing controversial research through think-tanks, grant-

making and other efforts. OAK's next assignment for Seal Corp. (which later evolved into the US Navy SEALs program) was to develop a model which could be used to train the top two per cent of individuals, discovered through the subjective questionnaire, and then fine-tune their abilities in guessing.

Around the same time, in 1973, because of OAK's ongoing work with ESP, Dr Milan Rýzl was brought into my home in Seattle for interviews and debriefing on his ESP work. Dr Rýzl was a biochemist at the Institute of Biology of the Czechoslovak Academy of Science in Prague and a pioneer in Czech parapsychics before he defected in 1967 to the United States. During that period of the Cold War, the Soviet Union supported and developed parapsychical research, seeking a new direction in weaponry that would exploit anomalous human potential.

In the late 1960s, a series of papers (including for the *Journal of Paraphysics*, published by the Parapsychical Laboratory in Downton, England) was being prepared on the state of parapsychics in the Iron Curtain countries of Europe. This series was part of the Symposium of Psychotronics, whose editorial board in those early years included such luminaries as B. Herbert (1967–70), Zdenek Rejdak (1971) and Victor Adamenko (1972). These papers comprised hundreds of pages and discussed such topics as telepathy, telekinesis and precognition as well as other areas commonly referred to as extrasensory phenomena (ESP for "inside the body" and PK, or psychokinesis, for "outside the body"). These papers can be viewed at www.earthpulse.com under the "Mind/Brain Effects" section. Sheila Ostrander and Lynn Schroeder reviewed these studies in their classic 1971 book *Psychic Discoveries behind the Iron Curtain*.

During the 1950s, Dr Rýzl tried to interest the Communist-ruled Czech government in supporting psychic research, and so, by the early 1960s, interest in parapsychology was at least tolerated. Dr Rýzl's studies involved hypnotic techniques for developing ESP subjects. To demonstrate these techniques, Rýzl used his psychic subjects to predict the winning numbers in the Czech public lottery; they were successful for three weeks in a row. The 1973 Seattle interviews with Dr Rýzl eventually led to the development of a series of protocols on how to fine-tune ESP ability to more than 400 times over natural inference.

In 1975, I received a challenge from Duke University's Foundation for Research on the Nature of Man in Durham, North Carolina, to demonstrate these protocols in a formal study.

The challenge was to be called the World's First Psychic Tournament. Llewellyn Publications, a noted publisher of occult books, sponsored this event, held on 21 September 1975 in Minneapolis, Minnesota, as part of its 5th Annual Gnosticon Festival. The Tournament was co-sponsored by the Foundation, which was originally set up to continue the pioneering ESP work of Dr J. B. Rhine at Duke University (it's now known as the Rhine Research Center Institute for Parapsychology). More than 20 well-known psychics participated in this event, including Jeane Dixon, Sybil Leek and John Pierrakos as well as James Hurtak (a recent contributor to NEXUS).

I was also invited to test the proposed models for inducing ESP ability using forms of self-hypnosis. I was/am relatively unknown for having any abilities in this ESP field, so it therefore seemed to hold some potential as a valid first study.

The clairvoyance test involved the use of 20 cards randomly pulled from 10 poker decks. Each participant had to guess the suit of each card. With one chance in four of guessing the correct suit, the average score for a run of 20 cards by someone with no ESP ability was five. Each participant was given five different runs. A final score determined the winner, with a total of 25 representing the norm (normal inference).

What happened is now history. More than 50 per cent of those participating showed normal scores ranging from 22 to 27 out of a possible 100, as would be expected in the general population. Most of the more well-known psychics showed some seemingly paranormal ability in clairvoyance, as expected, with total scores averaging between eight and 12 correct answers out of 20. One well-known psychic even had a score as high as 61 out of a possible total of 100.

Using my technique of ESP induction through forms of self-hypnosis, however, I did not have a single run less than 16 out of 20. My total score was 83 out of 100. This was more than two orders of magnitude greater probability than the scores of nationally recognised psychics. That first-place certificate still hangs on the wall in my home office.

So, just how did I wind up beating the best psychics in the nation at their own game? And, more importantly, how can you increase your own "Psi-Q"? I developed a set of self-consistent definitions and postulates relating self-hypnosis to ESP, both in theory and practice. They work so well that they were used for all Navy SEAL training, but they also work for anyone willing to put some effort into study and discipline.

This was more than two orders of magnitude greater probability than the scores of nationally recognised psychics.

Definitions and Postulates

The standard definitions claim that hypnosis is a borderline state between sleeping and waking. But any state characterised by an intense concentration of attention in one area, accompanied by a profound lack of attention in other areas, may also be considered to be hypnosis. According to this definition, everyone can be considered to be continuously in a light state of hypnosis.

The depth of hypnosis, which is an implied issue in this definition, may be defined as the difference between the intensity of concentration in one sphere or area and the depth of inhibition in others. Attention focused in one area creates a corresponding lacuna, or lack of attention, in other areas of the brain. Deeper states of hypnosis are created by centring the attention for prolonged periods.

With these technical definitions of hypnosis, a useful scientific model for relating hypnosis to extrasensory perception is now possible.

• **Postulate I:** *Focused attention/intensity. The conscious experience is associated with the nervous processes which take place outside of a certain critical level of awareness/alertness. This function, defined as I(c), or intensity of concentration, varies considerably in a state of hypnosis where attention is focused.*

• **Postulate II:** *Energy. Psi energy, arbitrarily defined as E(ψ), is an equivalent in the field of extrasensory phenomena of what, in our three-dimensional world, is called energy.*

Correlate A: *E(ψ) is not limited by time.*

Correlate B: *E(ψ) cannot be transformed into other known physical energies (for example, heat into light).*

Correlate C: *E(ψ) operates by manipulating the transformation of physical energies.*

• **Postulate III:** *Psi energy is responsible for extrasensory perception and psychokinetic (PK) phenomena.*

• **Postulate IV:** *Psi energy is the product of some aspect of the metabolic processes.*

(Physical data regarding the relationship between metabolic processes and extrasensory perception can be found in the book *Beyond Telepathy* by Andrija Puharich.)

• **Postulate V:** *The generation of psi energy rapidly decreases the level of alertness. This immediately explains:*

- 1) *why each conscious act has a limited duration;*
- 2) *why we experience a permanent train of changing thoughts;*
and

3) *why our attention permanently shifts from one object to the next.*

When we think, psi energy is created. The psi energy automatically decreases the level of alertness so that our attention shifts to something else.

• **Postulate VI:** *The intensity of conscious experience, I(c), depends on the time rate of the generation of psi energy. Mathematically, this is described as:*

$$dE(\psi) / dt = A(e) \times I(c)$$

What this means is that the rate of change of E(ψ) as a function of time [dE(ψ) / dt] is equal to some geographical constant, A(e), times the intensity of concentration, I(c).

More simply stated, psi energy, E(ψ), is equal to a geographical constant, A(e), times the intensity of concentration, I(c), times the amount of time, t, that the thought is held:

$$E(\psi) = A(e) \times I(c) \times t$$

If we cannot make any particular thought last long enough, it should be sufficient to repeat it again and again until the values of the individual brief periods add up to a sufficient value. The equation now becomes:

$$E(\psi) = A(e) \times I(c) \times [t(1) + t(2) + t(3) + \dots]$$

Extrasensory perception is often observed in hypnosis, a state characterised by a single intensive thought. Recurrent cases of psychokinetic phenomena, such as the haunted-house variety, are often reported to be connected with previous tragic events associated with intensity of concentration, I(c). The frequently reported cases of crisis telepathy—ESP contact between two persons, one of whom is dying or in grave danger—are necessarily associated with intense thought or concentration. The length of time experienced

depends entirely upon the circumstances.

The discovery of mental impregnation, known in the literature as psychometry, gave evidence that repeated identical thoughts increase the expected psychic effect. Wearing a ring for a long time will "imprint" memory of the wearer onto the ring, but just slipping a ring on and then off and handing it to a psychometrist will not generally reveal any memory of the wearer.

Religious tradition asserts that repeated prayers are more effective than a single one. In other words, the more you repeat the same prayer or the more you do a single ritual, the greater the effect. Along these lines, "tithing" might be seen as giving your time or attention, rather than the traditional meaning of giving money to

If we cannot make any particular thought last long enough, it should be sufficient to repeat it again and again until the values of the individual brief periods add up to a sufficient value.

the Church. Many eastern religions, for example, require more than 10 per cent of your life (2.5 hours each day) spent in meditation.

• **Postulate VII:** *The formation of psi energy, which is created by a mental act, preserves the semantic content of the thought which created it.*

In essence, your thought is uniquely distinct. If you deviate from your thought slightly, it is a different thought-form.

The stimulating action of psi formation on the brain may account for memory and, more particularly, active recollection. The influence of psi formation increases the level of awareness of the neurological patterns corresponding to the thought to be remembered. This corresponding semantic content is then consciously re-experienced.

Method of ESP Induction

When questioning or desirous thoughts are intense enough, last long enough or are repeated frequently enough, a unit of psi energy or thought-form [$dE(\psi) / dt$] is produced in sufficient intensity and structure to be able to produce a detectable effect in the physical world. This may occur in hypnotic states, in states of elated or fearful emotions, or when interest, motivation or desire is strongly increased.

Therefore, the ideal process of extrasensory perception works in this manner. We begin with a simple chart, with Level of Awareness plotted against Level of Alertness (figure 1). Anything below this line is not realised as a conscious thought, while everything above the line is consciously experienced.

We then form an intense desire or question in our conscious mind which we wish to occur, happen or know (that is, be given an answer to). This must first come into being as a normal, but intense, thought-form or

We then form an intense desire or question in our conscious mind which we wish to occur, happen or know (that is, be given an answer to).

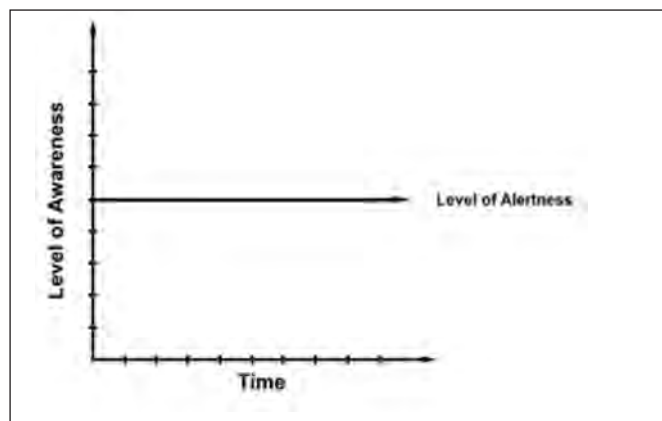

Figure 1

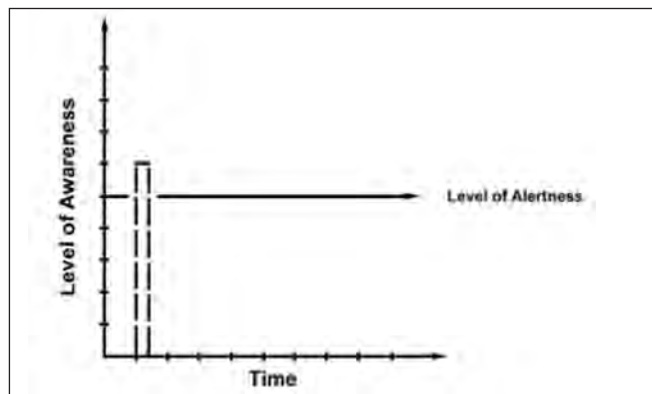

Figure 2

question. This is the individual confronting the continuum. It is this question or thought that creates a unit of psi energy (figure 2).

This can be described as a "lump" of information. Figure 2 shows that "lump" to be about a third of a unit of time. If the thought can be held for a more prolonged period, this will increase the intensity of concentration,

making the "lump" broader (more area under the curve) and, most importantly, above a critical level of awareness.

The sharpness of this thought is depicted by a square-edged "lump". This is where one thought-form varies from another. It also defines the precision of your request, or the difference between one set of psi energy production and another.

Consciousness is then dropped into a "blank mind" state (figure 3). Note that there is no conscious awareness in this state of mind. It is unique and quite different from the one used to create a unit of psi energy.

The actual visualisation aspect is to see this event as a "switch", going from the idea or the question itself to a specific void state. What eventually occurs is that this

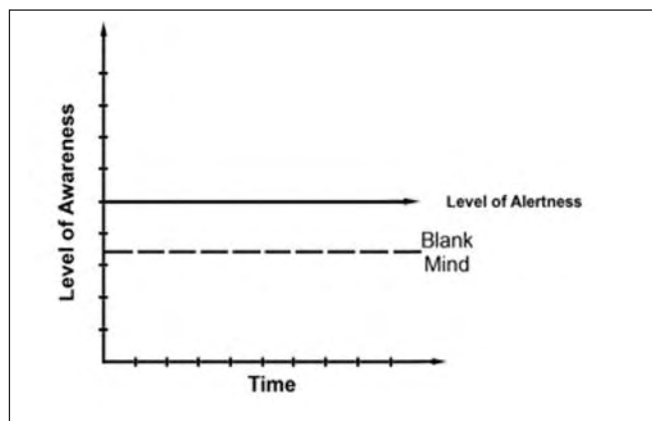

Figure 3

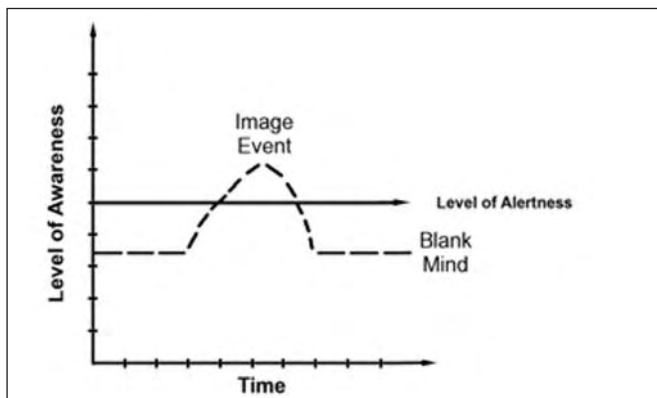

Figure 4

information is impressed onto consciousness as a vision or an event occurrence (figure 4).

This event, to the thinker, is independent of both space and time. The usual length of time for this to become clear and brought to awareness can be upward of two minutes or more, depending mostly on how clean the "blank mind" state is held.

In actuality, however, what occurs is that the question being asked is not intense enough to impress itself onto the unconscious mind (figure 5).

Lacking in intensity, the block of energy or, more precisely, the block of information that is created is small. Thus the psi energy output is minimal, if there's any at all (figure 6).

When you drop yourself into a trance state, you are generally not in a "blank mind" state. There are many subconscious thoughts going on, even as you are going down into the trance state.

All of these subconscious thoughts are on a subliminal level, not experienced in a conscious form. You may not even be aware of them, since most of us have no training or discipline to be able to hold onto

Higher forms of the trance state include the artistic or parataxic mode and the creative or syntactic mode.

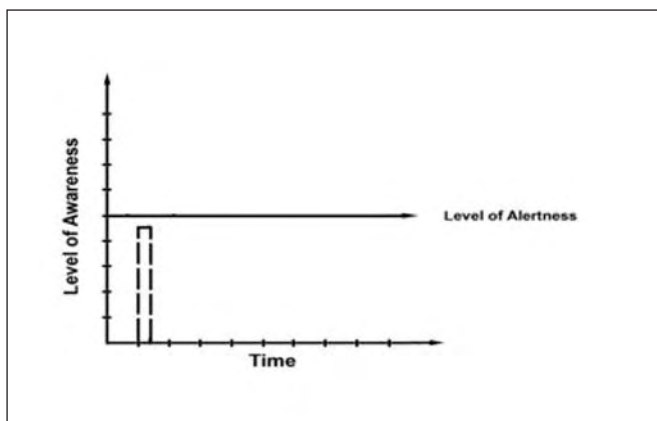

Figure 5

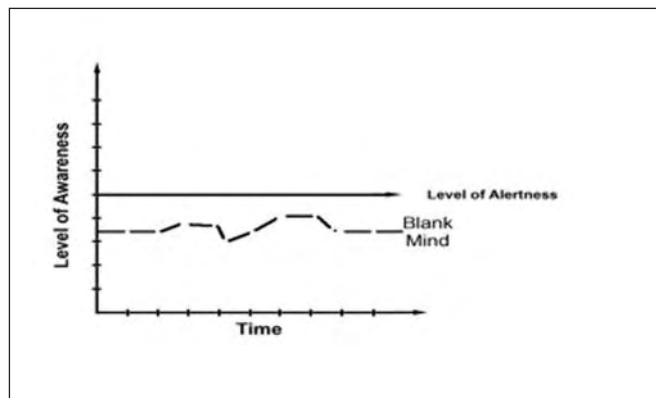

Figure 6

the "blank mind" state for any length of time. This is the Zen form of the "no mind" state. This is a place where most meditation, as a discipline, attempts to go.

The best way to begin to do this is by visualising a "white light" at the third eye (centre of the forehead). What happens next is that thoughts begin to disappear and a calming feeling sweeps over the body, not unlike

day-dreaming. One is not conscious of thoughts or forms. This state is often associated with light alpha brainwaves. Consequently, the information path becomes distorted and a weird pattern emerges.

This vision of information or event experience is distorted (figure 7).

Prototaxic or trance modes of consciousness are characterised by loss of ego. This egoless state is considered to be the

lowest state of awareness, as most who go into this place usually do not remember their experiences. It is often associated with shamanistic forms of consciousness. Deeper discussion of this subject can be found in my book *ESP Induction through Forms of Self-Hypnosis* and its sequel, *Power Tools for the 21st Century* (to be published in mid-2010).

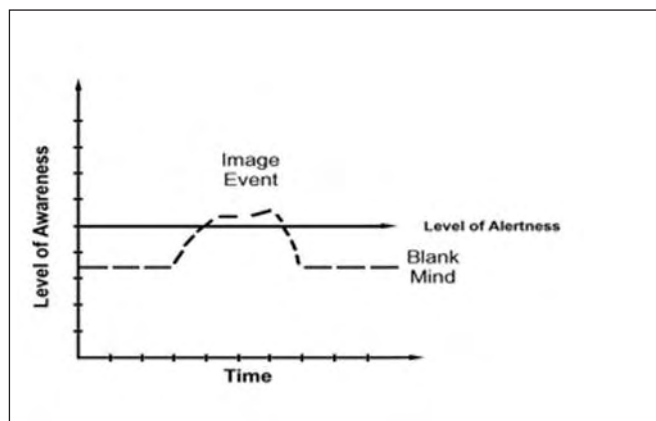

Figure 7

Higher forms of the trance state include the artistic or parataxic mode and the creative or syntactic mode. Parataxic experience consists of relationships with images whose meanings remain on the symbolic level. Syntactic experience occurs when the conscious ego cooperates willingly with the subconscious. Charles Honorton's term for this state was "syntactic", but John Curtis Gowan's ontology of mystical states of consciousness is more complete. Here, meaning is fully cognised with minimal distortion in the production of psi energy.

Older magical ceremonies such as the Banishing Ritual and the Middle Pillar Exercise can be seen as designed to facilitate higher forms of concentration (i.e., syntactic mode). Other ways of attaining this state include biofeedback, meditation, peak experience, the higher Jhana (Gowan's term) states of yoga, and so on. The Banishing Ritual provides protection from invading thoughts and distractions. Concentration during this form of ritual purification is intense, structured and prolonged. The magical concept of energised enthusiasm—arousing oneself emotionally—seems to be pertinent to facilitating telepathic reception.

Puharich believed that reception is improved by parasympathetic activation, in which there is an increase in the release of the brain neurotransmitter acetylcholine. He also held that the telepathic sending of information is easier when there is an increased amount of adrenaline in the system.

These metabolic processes need not be viewed as "causal" but as simultaneous or synchronous with the ESP experience. This way of viewing the body metaphorically is the basis for modern alchemy—the process of personal transformation. Psi meaning comes through intense visual, auditory and kinesthetic psychosensory experiences.

"Sir, the good news is that the last adult citizen in the country has been successfully secretly microchipped. The bad news is that Microsoft just changed the software and they're all obsolete..."

Do-It-Yourself ESP

A simple method for inducing extrasensory perception through forms of self-hypnosis is now given as follows:

- 1) Formulate the question.
- 2) Hold that thought for as long as possible.
- 3) Assume that the event has occurred.
- 4) Drop into a "blank mind" state and wait.

When questioning or desirous thoughts are intense enough, last long enough or are repeated frequently enough, psi is produced in sufficient intensity and structure to be detectable in the physical world. This may occur in hypnotic states, in states of intentionality, with elated or traumatic emotions, or when interest, motivation or desire is strongly increased.

The individual confronts the continuum with desire and prolonged concentration. The question being asked must be intense enough to impress itself on the unconscious. Lacking intensity, the signal will not be perceived. One's intent strengthens the signal path.

Consciousness is then dropped into a "blank" state, an empty state or a "beginner's mind". The actual visualisation is a switch from the concentrated point to the void. When this occurs, the information is impressed onto the consciousness, resulting in a psychophysical perceptual event which is independent of both space and time.

When you spontaneously fall into a trance state, you are generally not in a "blank mind" state of expectant emptiness. There is the chatter of subconscious thoughts going on, even as the process deepens toward sleep.

These thoughts are generated and go on automatically at a subliminal level, often without awareness. Consequently, the information or signal path becomes distorted and weird patterns emerge, much like those experienced in dreams. In a waking dream, distorted signals may be perceived as "spirit guides" or expressed as automatic handwriting or other autonomous related phenomena of trance states.

This research into ESP has yielded incredible results and has offered conclusions that are more far-reaching than might first be realised. It may well be that man is not looking into the future (via ESP) but, rather, is creating it with his own belief systems and values. To suggest that one could predict something 400 times beyond normal inference is also to suggest a more fundamental possibility.

The brain itself can be seen as a four-dimensional hologram of five-space. This concept is part of a holographic model of the universe and may suggest a non-local mind aspect not yet described in the literature. Rather than seeing the universe as quantised, we may in fact regard it as being about information and the resolution of information.

This is how a holographic universe might be constructed.

If we could determine what part of the brain is being used for conscious awareness, we might then find a way to gain access to other realities. By changing what part of the brain is being used at any given moment, this might allow a different "movie" to be experienced as real. The intensity of concentration and "blank mind" states suggest the possibility of a broader definition of "mind".

If we could understand how other states of consciousness could offer access to other realities, we might have a valuable tool toward the evolution of consciousness. The study of ESP is just a brief beginning journey toward the development of simple tools for the true transformation and evolution of human consciousness. ∞

About the Author:

Richard Alan Miller is a physicist and herbalist with expertise in growing and marketing botanicals. He is the author of diverse papers and books on metaphysics, parapsychology and alternative agriculture. His most recent book, *ESP Induction through Forms of Self-Hypnosis* (reviewed in this edition; see the Earthpulse Press website <http://www.earthpulse.com>), is part of a three-part series titled *Toward the Evolution of Consciousness*; it includes *Power Tools for the 21st Century* (due for release in mid-2010) and *The Non-Local Mind in a Holographic Universe* (available in late 2010).

Miller has contributed several articles to NEXUS (co-written with Iona Miller): "The Schumann's Resonances and Human Psychobiology" (10/03), "HAARP's Threat to the 'Voice of the Planet'" (10/04) and "From Helix to Hologram" (10/05). His most recent article, "The *Cordyceps sinensis* Medicinal Mushroom", was published in NEXUS 16/03. He was a speaker at NEXUS Conferences in Brisbane (2004) and Amsterdam (2005).

Richard Alan Miller can be contacted by email at rick@nwbotanicals.org. For more information, visit his websites <http://www.richardalanmiller.com> and <http://www.nwbotanicals.org>.

WHY MAGNESIUM TOPICALLY?

With ultra pure Ancient Minerals magnesium Chloride Oil, Gel and Bath Flakes from the Zechstein Sea:

- Raise magnesium levels 10 times faster & more efficiently
 - Calm overactive nerves & restless legs
 - Relieve muscle aches, pains & spasms
- Kiss cramps goodbye!

"In the entire world of alternative Medicine I have never run across such a pure powerful substance as Ancient Minerals"

- Mark Sircus, Ac., OMD,
author of Transdermal Magnesium Therapy

CLEANER HEALTHIER AIR

with PATENTED SWEDISH TECHNOLOGY

Compare all these incredible differences

- ✓ Cheaper to run than all other similar Air Purifiers.
- ✓ Winner of several EU DESIGN AWARDS.
- ✓ No ongoing costs for replacement filters or needles.
- ✓ No noisy fan that will eventually fail.
- ✓ Best Warranty in Australia.

Revolutionary and new to Australia
LightAir IonFlow 50 Air Purifier and Ioniser

Proven and tested to remove:

- airborne bacteria • dust mites • pet dander • viruses
- pollen allergens • airborne mould • smoke odours

STEORN OVER-UNITY TESTS

Steorn Ltd conducted an "over-unity demo" of its e-Orbo® technology on 30 January 2010 at the Waterways Ireland Visitor Centre in Dublin, Ireland, where it's had several copies of its electromagnetic devices on display since 15 December 2009 (minus a Christmas and New Year break).

Steorn CEO Sean McCarthy summarised the tests that have been done until now and then gave a final piece of evidence, live.

If Steorn's technology is what they say it is, it could provide a new, clean energy source that is affordable, available 24/7/365 and scalable to whatever size is needed, large or small, pulling inexhaustible energy from the environment.

One of the attributes McCarthy reviewed was the absence of back electromagnetic flux (BEMF) in the coils. This he illustrated with a videotaped presentation comparing the e-Orbo with a pulse motor of a more conventional arrangement, and then by presenting the oscilloscope readings that show the absence of BEMF in the e-Orbo and the existence of BEMF, as would be expected, in the conventional pulse motor.

McCarthy also reviewed a test that had just been completed, spanning the past week (live on streaming cameras), in which the gauss (magnetic field strength) of all the magnets was measured before and then measured again at the end of the week to show that there had been no degradation in the magnets. This was to show that the energy manifesting in the system was not a function of the components of the device giving up their energy and being degraded in the process.

Then McCarthy showed a scope shot comparing the electrical input energy to the electrical output energy, demonstrating a net gain in inductance or gain in energy (harvested from the environment somehow, in the tradition of Nikola Tesla). One curve represented the gain in output energy after each pulse, rising from left to right; and the other curve represented the sum of input energy during the same period. That curve was shown to be well below the output curve, hence yielding the conclusion of "over-unity".

McCarthy said that the data they had recently collected showed 327% more electrical energy being produced compared to the electrical energy being input. That number does not take into consideration other factors such as bearing and air friction as well as heat. He said that this data would be posted on Steorn's website (www.steorn.com) for review.

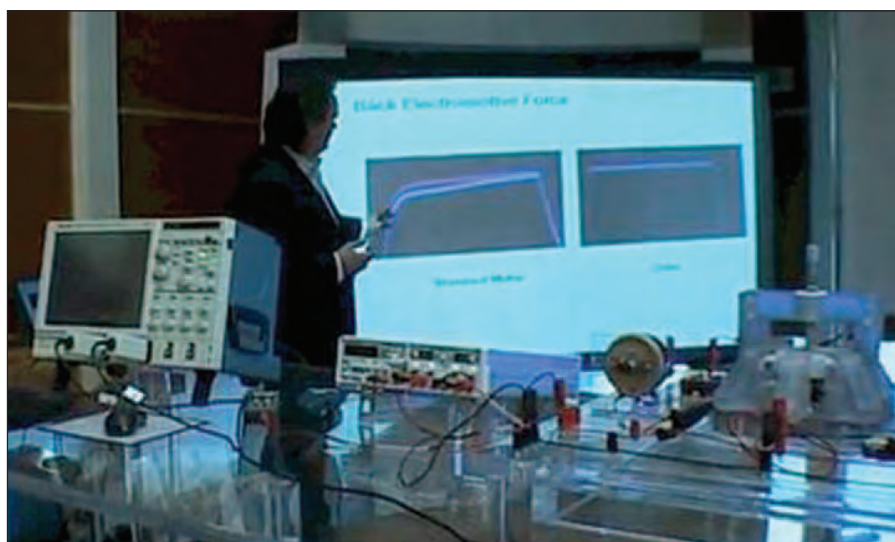

Meanwhile, in the first week of

February, Steorn is to open the SKDB (Steorn Knowledge Development Base) initiative for educating licensing parties in beginning the development process.

The presentation lasted about half an hour, with over 900 people watching live by the end of the webcast and probably at least 100 present at the Waterways building. McCarthy said there have been around 2,500 visitors so far since the 15 December demo launch.

The purpose of these e-Orbo demonstrations has been to interest development groups to get involved, under licence, to develop the technology for its myriad applications. McCarthy said that Steorn has made the licence fees low to encourage more development—with the hope that the more people who get involved in development, the faster the technology will arrive in the marketplace in practical embodiments.

Steorn CEO Sean McCarthy, during the January 30 2010 demonstration

BLOOM ENERGY LAUNCHES ADVANCED FUEL CELL

Bloom Energy Corporation, a Silicon Valley-based company, announced recently the availability of the Bloom Energy Server™, a patented solid oxide fuel cell (SOFC) technology that provides a cleaner, more reliable and more affordable alternative to today's electric grid as well as traditional renewable energy sources. The Bloom Energy Server provides distributed power generation, allowing customers to create their own electricity onsite efficiently.

Built using abundant and affordable materials, Bloom's fuel cell technology is fundamentally different from the hydrogen fuel cells that most people are familiar with. The Bloom Energy Server is distinct in four primary ways: it uses lower-cost materials, provides unmatched efficiency in converting fuel to electricity, has the ability to run on a wide range of renewable or traditional fuels, and is more easily deployed and maintained. Unlike traditional renewable energy technologies like solar and wind, which are intermittent, Bloom's technology can provide renewable power 24/7.

Each Bloom Energy Server provides 100 kilowatts (kW) of power

in roughly the footprint of a parking space. Each system generates enough power to meet the needs of approximately 100 average US homes or a small office building. For more power, customers simply deploy multiple Energy Servers side by side. The modular architecture allows customers to start small and "pay as they grow".

Customers announced at the launch include Bank of America, The Coca-Cola Company, Cox Enterprises, eBay, FedEx, Google and Walmart.

"Bloom Energy is dedicated to making clean, reliable energy affordable for everyone in the world," said Dr K. R. Sridhar, principal co-founder and CEO of Bloom Energy. "We believe that we can have the same kind of impact on energy that the mobile phone had on communications. Just as cellphones circumvented landlines to proliferate telephony, Bloom Energy will enable the adoption of distributed power as a smarter, localized energy source."

Solid Oxide Fuel Cells

For decades, experts have agreed that solid oxide fuel cells hold the greatest potential of any fuel cell technology. With low-cost ceramic materials and extremely high electrical efficiencies, SOFCs can deliver attractive economics without

relying on combined heat and power schemes. But until now, there were significant technical challenges inhibiting the commercialisation of this promising new technology. Bloom has solved these engineering challenges with breakthroughs in materials science and revolutionary new designs.

From Powder to Power

Founded in 2001, Bloom Energy can trace its roots to the NASA Mars space program. For NASA, Sridhar and his team were charged with building technology to help sustain life on Mars using solar energy and water to produce air to breathe and fuel for transportation.

They soon realised that their technology could have an even greater impact here on Earth and began work on what would become the Bloom Energy Server.

The Bloom Energy Server converts air and nearly any fuel source—ranging from natural gas to a wide range of biogases—into electricity via a clean electrochemical process rather than dirty combustion. Even running on a fossil fuel, the systems are approximately 67% cleaner than a typical coal-fired power plant. When powered by a renewable fuel, they can be 100% cleaner.

Each Energy Server consists of thousands of Bloom's fuel cells—flat, solid ceramic squares made from a common sand-like "powder".

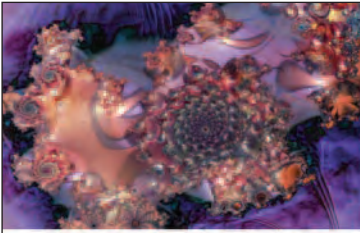

"Today we are witnessing something special," said John Doerr, partner at Kleiner Perkins Caufield & Byers and a Bloom Energy board member.

"This is a new kind of product announcement... For years, there have been promises of new energy solutions that are clean, distributed, affordable, and reliable; today we learn that Bloom, formerly in stealth, has actually delivered..."

Two 100-kilowatt Bloom Energy Servers, as the company calls them, at a site in California.

Trinifinity8

Revitalisation & Beauty System

- BALANCE ENERGY CENTRES
- RESTORE YOUR YOUTHFUL INNER GLOW

Trinifinity8 is based on **Mathematical Binary Codes** and formulations along with vibrational energies transmitting to the body, using **Fractals, Sacred Geometry Infusion, Pure Solfeggio Frequency Tones** and **Rapid Quartz Crystal Rods**.

For those who want to transform their world and take it into the realm of glowing youthfulness and vibrational change, Trinifinity8 helps create a feeling of inner peace, radiance and well-being.

Trinifinity8's advanced subtle energy technology and programming brings mind, body and spirit into greater alignment and balance, and helps stimulate you to a greater level of performance.

What does Trinifinity8 Offer?

- ENERGISING
- FACE AND BEAUTY
- BODY SCULPTING
- FEELING OF HAPPY HEART
- REVITALISES SKIN AND HAIR
- HELPS PREVENT APPEARANCE OF AGING

Nexus Conference not to be missed!!

Guest speaker - Dr. Kathy J. Forti PhD, creator of Trinifinity8.

The Bion Ring

Electro-magnetic Protection

-The Bion Ring, based on the design of an ancient ring discovered in the Valley of the Kings in Egypt in 1860
 -thought to have originated in Atlantis
 -utilizes geometric forms placed and balanced to a lost system of ancient knowledge.
 -The Bion Ring tunes the wearer's subtle energy fields creating a powerful barrier against electro-magnetic, psychic and other stressors

THE BION RING: REDUCED STRESS, RAPID HEALING, EMOTIONAL BALANCE, ENHANCED MIND FUNCTION AND JOY OF LIFE!

Bion ring design voted most potent human energy assist by one of Europe's leading health/consciousness magazines

The Bion Pendant

-increased neuro-peptides, increased happiness-naturally!

The Bion pendant provides additional protection and can be worn on its own or with the Bion ring for maximum effect, as well as for amplifying the properties of healing gems set within it.

LIFE FORCE SUBTLE ENERGY TECHNOLOGIES

Bion ring in pure silver: \$175
 Bion pendant (22ct gold/pure silver): \$350
 Please add \$10 shipping per order.
 Please send money order to: Life Force S.E.T.
 Box 916, Byron Bay, NSW, 2481, Australia
 Or order online with credit card from:
www.visionutopian.com.au
 ph. 0412-317421 email: mark@lis.net.au

Actual retouched photo showing invisible to the eye bion geometries

The Bion ring and Bion pendant neutralize most negative effects I have encountered. They also impart feelings of calmness, emotional balance and increased energy levels.

recommended by health professionals
 Dennis O'Connor
modlily@hotmail.com

Kinesiology, EAV, pulse diagnosis, kirlian and now new remarkable daylight photography confirm the Bion technologies to be potent bio-resonance tools promoting rapid healing, and consciousness activation/protection

Original ring

-a copy of the original ring was worn by Howard Carter during his excavations of King Tut's tomb

bio pendant with keshi pearl \$650
 Bion Bi-resonant 18ct gold/fine silver \$375
 Bion pendant with ruby and keshi pearl \$850
 Bion ring with yellow sapphires/18ct gold setting \$390
 Bion pendant 22 ct. gold/fine silver \$350

What Does He Know... that YOU Don't ?

The Remote Viewing Unit is giving an intensive 5 day Remote Viewing training course May 10 -14, 2010, in Perth Western Australia.

JOURNEY THROUGH THE LIGHT AND BACK

This account of an extraordinary life-after-death experience gives us inspiration to live in the knowledge that we are one with the universal Source and are co-creators on our explorations through Life.

by Mellen-Thomas Benedict
© 2010

Post Office Box 1898
Soquel, CA 95073, USA

Email:
info@mellen-thomas.com

From the web page:
<http://www.mellenthomas.com/stories.htm>

In 1982, I died from terminal cancer. The condition I had was inoperable, and any kind of chemotherapy they could give me would just have made me more of a vegetable. I was given six to eight months to live.

I had been an information freak in the 1970s, and I had become increasingly despondent over the nuclear crisis, the ecology crisis, and so forth. So, since I did not have a spiritual basis, I began to believe that nature had made a mistake and that we were probably a cancerous organism on the planet. I saw no way that we could get out from all the problems we had created for ourselves and the planet. I perceived all humans as cancer, and that is what I got. That is what killed me.

Be careful what your world view is. It can feed back on you, especially if it is a negative world view. I had a seriously negative one. That is what led me into my death. I tried all sorts of alternative healing methods, but nothing helped.

So I determined that this was really just between me and God. I had never really faced God before, or even dealt with God. I was not into any kind of spirituality at the time, but I began a journey into learning about spirituality and alternative healing. I set out to do all the reading I could and bone up on the subject, because I did not want to be surprised on the other side. So I started reading on various religions and philosophies. They were all very interesting, and gave hope that there was something on the other side. I ended up in hospice care.

I remember waking up one morning at home about 4.30 am, and I just knew that this was it. This was the day I was going to die. So I called a few friends and said goodbye. I woke up my hospice caretaker and told her. I had a private agreement with her that she would leave my dead body alone for six hours, since I had read that all kinds of interesting things happen when you die. I went back to sleep.

The next thing I remember is the beginning of a typical near-death experience. Suddenly I was fully aware and I was standing up, but my body was in the bed. There was this darkness around me. Being out of my body was even more vivid than ordinary experience. It was so vivid that I could see every room in the house, I could see the top of the house, I could see around the house, I could see under the house.

There was this Light shining. I turned toward the Light. The Light was very similar to what many other people have described in their near-death experiences. It was so magnificent. It is tangible; you can feel it. It is alluring; you want to go to it like you would want to go to your ideal mother's or father's arms. As I began to move toward the Light, I knew intuitively that if I went to the Light I would be dead. So as I was moving toward the Light I said: "Please wait a minute, just hold on a second here. I want to think about this; I would like to talk to you before I go." To my surprise, the entire experience halted at that point. You are in control of your life-after-death experience. You are not on a roller-coaster ride.

So my request was honoured and I had some conversations with the Light. The Light kept changing into different figures, like Jesus, Buddha, Krishna, mandalas, archetypal images and signs. I asked the Light: "What is going on here? Please, Light, clarify yourself for me. I really want to know the reality of the situation." I cannot really say the exact words, because it was sort of telepathy.

The Light responded. The information transferred to me was that during your life-after-death experience your beliefs shape the kind of feedback you are getting before the Light. If you were a Buddhist or a Catholic or a Fundamentalist, you'd get a feedback loop of your own stuff. You have a chance to look at it and examine it, but most people do not.

As the Light revealed itself to me, I became aware that what I was really seeing was our Higher Self Matrix.

We all have a Higher Self, or an oversoul part of our being. It revealed itself to me in its truest energy form. The only way I can really describe it is that the being of the Higher Self is more like a conduit. It did not look like that, but it is a direct connection to the Source that each and every one of us has. We are directly connected to the Source. So the Light was showing me the Higher Self Matrix. I was not committed to one particular religion. So that is what was being fed back to me during my life-after-death experience.

As I asked the Light to keep clearing for me, to keep explaining, I understood what the Higher Self Matrix is. We have a grid around the planet where all the Higher Selves are connected. This is like a great company, a next subtle level of energy around us—the spirit level, you might say.

Then, after a couple of minutes, I asked for more clarification. I really wanted to know what the Universe is about, and I was ready to go at that time. I said: "I am ready; take me."

Then the Light turned into the most beautiful thing that I have ever seen: a mandala of human souls on this planet. Now I came to this with my negative view of what was happening on the planet. So as I asked the Light to keep clarifying for me, I saw in this magnificent mandala how beautiful we all are in our essence, our core. We are the most beautiful creations.

The human soul, the human matrix that we all make together, is absolutely fantastic, elegant, exotic, everything. I just cannot say enough about how it changed my opinion of human beings in that instant. I said: "Oh, God, I did not know how beautiful we are." At any level, high or low, in whatever shape you are in, you are the most beautiful creation, you are.

The revelations coming from the Light seemed to go on and on. Then I asked the Light:

"Does this mean that mankind will be saved?" Then, like a trumpet blast with a shower of spiralling lights, the Great Light spoke, saying: "Remember this and never forget: you save, redeem and heal yourself. You always have. You always will. You were created with the power to do so from before the beginning of the world."

In that instant, I realised even more. I realised that *we have already been saved*, and we saved ourselves because we were designed to self-correct like the rest of God's Universe. This is what the Second Coming is about. I thanked the Light of God with all my heart. The best thing I could come up with were these simple words of total appreciation: "Oh dear God, dear Universe, dear Great Self, I Love My Life."

The Light seemed to breathe me in even more deeply. It was as if the Light was completely absorbing me. The Love Light is, to this day, indescribable. I entered into another realm, more profound than the last, and became aware of something more, much more. It was an enormous stream of Light, vast and full, deep in the Heart of Life. I asked what this was.

The Light responded: "This is the River of Life. Drink of this manna water to your heart's content."

So I did. I took one big drink and then another. To drink of Life Itself! I was in ecstasy.

As the Light revealed itself to me, I became aware that what I was really seeing was our Higher Self Matrix.

Then the Light said: "You have a desire." The Light knew all about me, everything past, present and future. "Yes!" I whispered.

I asked to see the rest of the Universe—beyond our solar system, beyond all human illusion. The Light then told me that I could go with the Stream. I did, and was carried through the Light at the End of the Tunnel. I felt and heard a series of very soft sonic booms. What a rush! Suddenly I seemed to be rocketing away from the planet on this stream of Life. I saw the Earth fly away. The solar system, in all its splendour, whizzed by and disappeared. At faster-than-light speed, I flew through the centre of the galaxy, absorbing more knowledge as I went. I learned that this galaxy, and all of the Universe, is bursting with many different varieties of Life. I saw many worlds. The good news is that we are not alone in this Universe!

As I rode this Stream of Consciousness through the centre of the galaxy, the stream was expanding in awesome fractal waves of energy. The superclusters of galaxies with all their ancient wisdom flew by. At first I thought I was going somewhere; actually travelling. But then I realised that, as the Stream was expanding, my own consciousness was also expanding to take in everything in the Universe! All creation passed by me. It was an unimaginable wonder! I truly was a Wonder Child, a babe in Wonderland!

Into the Void

At this point, I found myself in a profound stillness, beyond all silence. I could see or perceive Forever, beyond Infinity. I was in the Void. I was in pre-creation, before the Big Bang. I had crossed over the beginning of time/the First Word/the First Vibration. I was in the Eye of Creation. I felt as if I was touching the Face of God. It was not a religious feeling. Simply, I was at one with Absolute Life and Consciousness.

When I say that I could see or perceive forever, I mean that I could experience all of creation generating itself. It was without beginning and without end. That's a mind-expanding thought, isn't it?

Scientists perceive the Big Bang as a single event which created the Universe. I saw during my life-after-death experience that the Big Bang is only one of an infinite number of Big Bangs creating Universes endlessly and simultaneously. The only images that even come close in human terms would be those created by supercomputers using fractal geometry equations.

The ancients knew of this. They said God had periodically created new Universes by breathing out, and recreated other Universes by breathing in. These epochs are called Yugas. Modern science calls this the Big Bang. I was in absolute, pure consciousness. I could see or perceive all the Big Bangs or Yugas creating and recreating themselves. Instantly I entered into them all simultaneously. I saw that each and every little piece of creation has the power to create. It is very difficult to try to explain this. I am still speechless about this.

It took me years after I returned from my near-death experience to assimilate any words at all for the Void experience. I can tell you this now: the Void is less than

nothing, yet more than everything that is! The Void is absolute zero; chaos forming all possibilities. It is Absolute Consciousness; much more than even Universal Intelligence.

The Void is the vacuum or nothingness between all physical manifestations. It is the *space* between atoms and their components. Modern science has begun to study this space between everything. They call it *zero point*. Whenever they try to measure it, their instruments go off the scale...or to infinity, so to speak. They have no way, as of yet, to measure infinity accurately. There is more of the zero space in your own body and the Universe than anything else!

What mystics call the Void is not a void. It is so full of energy, a different kind of energy that has created everything that we are. Everything since the Big Bang is vibration, from the first Word, which is the first vibration. The biblical "I am" really has a question mark after it. "I am—what am I?" So, creation is God

exploring God's Self through every way imaginable, in an ongoing infinite exploration through every one of us.

I began to see during my near-death experience that everything that is, is the Self, literally; your Self, my Self. Everything is the Great Self. That is why God knows even when a leaf falls. That is possible because wherever you are is the centre of the Universe. Wherever any atom is, that is the centre of the Universe. There is God in that, and God in the Void.

As I was exploring the Void during my life-after-death experience and all the Yugas or creations, I was completely out of time and space as we know it. In this expanded state, I discovered that creation is about Absolute Pure Consciousness, or God, coming into the Experience of Life as we know it. The Void itself is devoid of experience. It is pre-Life, before the first vibration.

The Light then told me that I could go with the Stream. I did, and was carried through the Light at the End of the Tunnel. I felt and heard a series of very soft sonic booms. What a rush!

Godhead is about more than Life and Death. Therefore, there is even more than Life and Death to experience in the Universe! When I realised this, I was finished with the Void and wanted to return to this creation, or Yuga. It just seemed like the natural thing to do.

Getting Back Home

Then I suddenly came back through the second Light, or the Big Bang, hearing several more velvet booms. I rode the Stream of Consciousness back through all of creation, and what a ride it was! The superclusters of galaxies came through me with even more insights. I passed through the centre of our galaxy, which is a black hole. Black holes are the great processors or recyclers of the Universe.

Do you know what is on the other side of a black hole? We are; our galaxy, which has been reprocessed from another Universe. In its total energy configuration, the galaxy looked like a fantastic city of lights. All energy this side of the Big Bang is light. Every sub-atom, atom, star, planet, even consciousness itself is made of light and has a frequency and/or particle. Light is living stuff. Everything is made of light, even stones. So everything is alive. Everything is made from the Light of God; everything is very intelligent.

As I rode the stream on and on, I could eventually see a huge Light coming. I knew it was the First Light, the Higher Self Light Matrix of our solar system. Then the entire solar system appeared in the Light, accompanied by one of those velvet booms. I could see all the energy that this solar system generates, and it is an incredible light show! I could hear the Music of the Spheres. Our solar system, as do all celestial bodies, generates a unique matrix of light, sound and vibratory energies. Advanced civilisations from other star systems can spot Life as we know it in the Universe by the vibratory or energy matrix imprint. It is child's play. The Earth's Wonder Children (human beings) make an abundance of sound right now, like children playing in the backyard of the Universe.

The Light explained to me that there is no death. We are immortal beings. We have already been alive forever! I realised that we are part of a natural living system that recycles itself endlessly. I was never told that I had to come back. I just knew that I would. It was only natural, from what I had seen during my life-after-death experience.

I don't know how long I was with the Light, in human time. But there came a moment when I realised that all my questions had been answered and my return was near. When I say that all my questions were answered on the other side, I mean to say just that. All my questions have been answered. Every human has a different life and set of questions to explore. Some of our questions are universal, but each of us is exploring this thing we call Life in our own unique way. So is every other form of Life, from mountains to every leaf on every tree. And that is very important to the rest of us in this Universe. Because it all contributes to the Big Picture, the fullness of Life. We are literally God exploring God's Self in an infinite Dance of Life. Your uniqueness enhances all of Life.

As I began my return to the life cycle, it never crossed my mind, nor was I told, that I would return to the same body. It just did not matter. I had complete trust in the Light and the Life process. As the Stream merged with the Great Light, I asked never to forget the revelations and the feelings of what I had learned on the other side. There was a "Yes". It felt like a kiss to my soul.

Then I was taken back through the Light into the vibratory realm again. The whole process reversed, with even more information being given to me. I came back home, and I was given lessons from my near-death experience on the mechanics of reincarnation. I was given answers to all those little questions I had: "How does this work? How does that work?" I knew that I would be reincarnated.

The Earth is a great processor of energy, and individual consciousness evolves out of that into each one of us. I thought of myself as a human for the first

time, and I was happy to be that. From what I have seen, I would be happy to be an atom in this Universe. An atom. So to be the human part of God...this is the most fantastic blessing. It is a blessing beyond our wildest estimation of what blessing can be. For each and every one of us to be the human part of this experience is awesome, and magnificent. Each and every one of us, no matter where we are, screwed up or not, is a blessing to the planet, right where we are.

I went through the reincarnation process expecting to be a baby somewhere. But I was given a lesson on how individual identity and consciousness evolve. I was so surprised when I opened my eyes. I do not know why, because I understood it, but it was still such a surprise to

As the Stream merged with the Great Light, I asked never to forget the revelations and the feelings of what I had learned on the other side. There was a "Yes". It felt like a kiss to my soul.

be back in this body, back in my room with someone looking over me crying her eyes out. It was my hospice caretaker. She had given up an hour and a half after finding me dead. My body was stiff and inflexible. She went into the other room. Then I awakened and saw the light outside. I tried to get up to go to it, but I fell out of the bed. She heard a loud "clunk", ran in and found me on the floor.

Miracles and Memories

When I recovered, I was very surprised and yet very awed about what had happened to me during my near-death experience. At first, all the memory of the trip that I have now was not there. I kept slipping out of this world and kept asking, "Am I alive?" This world seemed more like a dream than that one.

Within three days I was feeling normal again, clearer, yet different than I had ever felt in my life. My memory of my near-death experience came back later. I could see nothing wrong with any human being I had ever seen. Before that, I was really judgemental. I thought a lot of people were really screwed up; in fact, I thought that everybody was screwed up but me. But I got clear on all that.

About three months later, a friend said I should get tested, so I went and got the scans and so forth. I really felt good, so I was afraid of getting bad news. I remember the doctor at the clinic looking at the before and after scans, saying: "Well, there is nothing here now." I said: "Really, it must be a miracle."

He said: "No, these things happen; they are called spontaneous remission." He acted very unimpressed. But here was a miracle, and I was impressed, even if no one else was.

During my near-death experience I had a descent into what you might call Hell, and it was very surprising. I did not see Satan or evil. My descent into Hell was a descent into each person's customised human misery, ignorance and darkness of not knowing. It seemed like a miserable eternity. Yet each of the millions of souls around me had a little star of Light always available, but no one seemed to pay attention to it.

They were so consumed with their own grief, trauma and misery. But, after what seemed an eternity, I started calling out to that Light, like a child calling to a parent for help.

Then the Light opened up and formed a tunnel that came right to me and insulated me from all that fear and pain—which is what Hell really is. So what we are doing is learning to hold hands, to come together. The doors of Hell are open now. We are going to link up, hold hands and walk out of Hell together. The Light came to me and

turned into a huge golden angel. I said: "Are you the angel of death?" It expressed to me that it was my oversoul, my Higher Self Matrix, a super ancient part of ourselves. Then I was taken to the Light.

Science and Spirit

Soon our science will quantify spirit. Isn't that going to be wonderful? We are coming up with devices now that are sensitive to subtle energy or spirit energy. Physicists use these atomic colliders to smash atoms to see what they are made of. They have got it down to quarks and charm, and all that. Well, one day they are going to come down to the little thing that holds it all together, and they are going to have to call that...God. We are just beginning to understand that we are creating, too, as we go along. As I saw Forever, I came to a realm during my near-death experience in which there is a point where we pass all knowledge and begin creating the next fractal, the next level. We have that power to create as we explore. And that is God expanding itself through us.

Since my return, I have experienced the Light

**Yet each of the millions
of souls around me
had a little star of Light
always available,
but no one seemed
to pay attention to it.**

spontaneously, and I have learned how to get to that space almost any time in my meditation. Each one of you can do this. You do not have to die or have a near-death experience to do this. It is within your equipment; you are wired for it already. The body is the most magnificent Light Being there is. The body is a Universe of incredible Light. Spirit is not pushing us to dissolve this body. That is not

what is happening. Stop trying to become God; God is becoming you. Here.

I asked God: "What is the best religion on the planet? Which one is right?" And Godhead said, with great love: "I don't care." That was incredible grace. When Godhead said, "I don't care," I immediately understood that it is for us to care about. It is important, because we are the caring beings. It matters to us and that is where it is important. What you have is the energy equation in spirituality. Ultimate Godhead does not care if you are Protestant, Buddhist or whatever. It is all a blooming facet of the whole. I wish that all religions would realise it and let each other be. It is not the end of each religion, but we are talking about the same God. Live and let live. Each has a different view. And it all adds up to the Big Picture; it is all important.

I went over to the other side during my near-death experience with a lot of fears about toxic waste, nuclear missiles, the population explosion, the rainforests.

I came back loving every single problem. I love nuclear

'THE BIG BANG'

A SHIFT IN CONSCIOUSNESS

A Seminar with Autori

Autori – one of the most powerful and instructive teachers of the human potential movement today is coming to Sydney, Australia in April 2010 for this one dynamic seminar you will not want to miss!

"The purpose of this - YOUR lifetime is to expand consciousness by and with the Light, which is how one becomes illuminated on all levels; physically, emotionally and mentally." *Autori*

During the course of the week-end discover and understand: The Cosmic Tree of Life and the current expansion of light consciousness within this solar system and how this can help you...

- Release your creative and abundant power to unlock your highest potential
- Understand the shifting consciousness of Mother Earth - the changes above and below
- Learn how to direct your life through your super-consciousness
- Receive and manifest more light and therefore more love in your life

Saturday April 10th & Sunday April 11th from 10am to 5pm

Venue: Uniting Church Hall, Holterman Street, Crows Nest

Investment: AU \$395:00

**Enquiries: Contact Lily 0411 107 069 or Penelope 0417 417 356
or email: lilydechalain@bigpond.com**

*Please note: Autori will be available for personal & business consultations April 7th & 8th, sessions 1hr.
(Personal \$155 * Business \$295). Early bookings are advised due to demand and limited spaces.*

About Autori: Autori is a spiritual teacher, writer, healer and consultant and has published three books and several meditation & healing CD's which are bestsellers in Europe. As well as conducting seminars and personal/business consultations on an international level, Autori takes groups on sacred journeys through lands such as Egypt, France & Israel which have transformed the lives of many.

Testimonials: *"Incredibly rewarding on all levels well planned with a loving enthusiastic energy. A very rare experience, it's unforgettable!" Lena Karisson, Sweden*

"There is something about you that makes you stand out. I say in all sincerity Autori, I have not been impacted by any other workshops much as yours have. Your presence in Encinitas initiated many changes within the lives of the workshop participants. Thank you!" Lacey Chess, San Diego USA

Awesome Eyewitness Reports from the USS *Milius* in the Arabian Gulf

On the morning of 12 April 2009, I was amazed to receive the following email from the Commander of the US guided missile destroyer USS *Milius* (see figure 1), on deployment in the Arabian Gulf (also known as the Persian Gulf):

"Hello,

"I am the Commanding Officer of a US Navy ship currently deployed in the Arabian Gulf. On the 11th of April, 2009, we witnessed the Lightwheel phenomena [*sic*]. It was incredible! In our efforts to figure out what we witnessed, one of our sailors located your report on the Internet. Thanks!"

The Commander went on to say that 50 of his crew had been astounded and stunned to witness an "incredible", enormous and lengthy occurrence of the Marine Lightwheel phenomenon,^{1, 2, 3, 4} though at the time they hadn't realised what it was that they were seeing.

This report came to me under nearly the same circumstances as another spectacular sighting of this same phenomenon—one that is little-known, but is "mythic" among those who have heard of it. This sighting, in May 2007 in the Strait of Hormuz, was from another US Navy ship. Several astonished crewmembers did Internet searches immediately after their experiences, attempting to learn the nature of the incredible geometric "light show" they'd witnessed which spanned the sea to the horizon. They found my articles and email address and then contacted me to report the event. Soon afterwards, I wrote and tried to disseminate an article documenting this sighting.⁵

On the morning of 12 April 2009, as had been the case in May 2007, one of the crew of the USS *Milius* searched the Internet, found my published writings on the Marine Lightwheel phenomenon and emailed me. The crewmember said that my articles describe exactly what they had seen, and that they then understood that an incredible Marine Lightwheel event was what they had witnessed. The ship's Commander sent the first enquiring email, which I immediately replied to, and that was followed shortly afterwards with his and other witnesses' accounts, including a full report of the event by the ship's Navigator.

The first article that I wrote about this exotic phenomenon was published in NEXUS in 1997 [vol. 4, no. 3], and since then I've received a handful of additional sightings reports that were not in the records when I first researched and wrote about the subject. Some reports were actually brought to my attention as a result of the article's publication, and some followed my discussing the subject on widely broadcast radio programs on which my husband and research partner, Ed Sherwood, were guests. Some of these sightings are documented in my previous articles (see endnotes) and are mainly from single or double witnesses. None of those few sightings had occurred more recently than 1997. However, never before have so many

Figure 1: USS *Milius* (DDG69) at sea, displaying battle ensign. (Source: Public domain image from USS *Milius* website, <http://www.milius.navy.mil/default.aspx>)

electromagnetically related planetary force that discharges as far as the eye can see in geometrically configured shapes, such as huge rimless rotating wheels, expanding and imploding concentric rings and spinning spirals.

The electromagnetic energy of a source, which is open to speculation, causes the bioluminescent organisms to fluoresce with a light-greenish-blue glow, revealing the rapidly moving shapes of the vortically spinning energy systems that are agitating them to fluoresce. The displays can "stretch to the horizon", moving like "an underwater disco light show" at speeds "close to the speed of sound"—all made visible by the agitated bioluminescent micro-organisms that

credible witnesses reported encountering this phenomenon so spectacularly and under such compelling circumstances as they did in 2009.

The witnesses include the then Commander of the USS *Milius*, CDR Kendall Gennick, his Executive Officer and his Navigator, along with around 50 of his crew. The senior officers provided riveting eyewitness documentation and impressively solid evidence of a phenomenon that is still largely unexplained and is generally unrecognized by the scientific community.

I hope this new evidence speaks for itself in further documenting the mysterious reality of this long-told wonder that historically has been dismissed as merely a "wild sailors' tale".

Bioluminescence and Spiralling Energy Discharges

I have described the Marine Lightwheel phenomenon in detail in previous articles [see endnotes], so I'll only briefly outline it here for those who haven't read or heard of it and because the excellent eyewitness accounts of the *Milius* crew provide a vivid description.

Basically, it seems to be a nearly unbelievable sight to witness, according to those who've been fortunate enough to have experienced it.

It is a rare phenomenon that can only be seen in waters rich in bioluminescent plankton-type organisms that are apparently agitated in a massive area of the water by an

fill the water where the what-would-otherwise-be-invisible, seemingly electromagnetic and wide-ranging "energy discharges" occur (see figure 2).

There is evidence to support my suspicion that the phenomenon may ultimately be found to be associated with fluctuations in local geomagnetic activity and also connected to solar activity and related geophysical forces and their interactions.⁶

Milky Seas Observations

There is another enigmatic, long-reported—and until only recently called "mysterious"—phenomenon known as Milky Seas. The strange, white, glowing waters of Milky Seas have been seen in some areas where Lightwheels have also been consistently observed, and these reports go back many centuries as well. They are not at all the same phenomenon, though both are associated with the presence of high levels of certain, but different, bioluminescent organisms that can be found at varying times and in varying densities in the waters where both phenomena have been reported.

CONDITIONS

Time: 2030-2130 D April 11, 2009
 Position: 26 59.4N 051 39.5E in the Central Arabian Gulf
 Wind: 22 KTS from 081 degrees true
 Temperature: 72 F/ 22 C
 Sea Temp: 75 F/ 24 C
 Pressure: 29.76
 Cloud Cover: 3/8
 Moonrise: 2051 D
 Illumination: 95%*
 * Actual visible illumination was much less due to cloud cover.

Commander Gennick continued with this:

"My description to my family:

"Imagine standing on the bridge wing of a ship on a dark moonless overcast night, looking down at the water from a height of about 50 feet [15.24 m]. Just above the surface of the sea appears to be waves of white light (low intensity) pulsating out of nowhere with a synchronized rhythm. Outward-expanding circles, inward-implosion circles, waves, moving snakes and boomerangs!

"The waves of light appear to be traveling at or near the speed of sound and reach as far out on the horizon as the eye can see. With each pulse, the sea explodes with millions of tiny green lights that appear as emeralds on the surface of the water (bioluminescent). It was incredible and *almost* unbelievable.

"It would be hard for me to believe if I had not seen it myself. The light show continued for about 40 minutes before we steamed out of the area and it faded in our wake.

"It is something I will remember the rest of my life!"

Milky Seas were presumably first photographed from space in 2005 off the upper east coast of Somalia in the Arabian Sea, but the only on-site accounts of direct observations of Milky Seas in the same area as the 2005 image are from a 1995 ship's report.⁷

I am not fully convinced that it couldn't have been a Lightwheel occurrence that was captured from space in 2005, given the lack of direct evidence and the fact that I think it possible that, considering the reported near-speed-of-sound motion of the massive geometric Lightwheel displays, both phenomena might possibly appear similar from space in an extended time exposure. Even the Milky Seas experts have said it's only their speculation that the Milky Seas phenomenon is what is seen in the 2005 satellite images. The 11 April 2009 sighting occurred in approximately the centre of the Arabian/Persian Gulf, above the Strait of Hormuz (see figures 3 and 4).

Testimony from USS *Milius* Crew

Following are the amazing eyewitness accounts, vividly told by the USS *Milius* Commander and two of his crew, of their 11 April 2009 Marine Lightwheel sighting.⁸

• The Commander

Commander Kendall Gennick provided the following details about the conditions at the time of the sighting, as well as his personal description which he'd sent home to family members before the crew found my article and discovered what it was that they had seen.

Figure 4: Arabian Gulf and Strait of Hormuz
(Satellite image courtesy of NASA)

• The Executive Officer

The Executive Officer of the USS *Milius* wrote the following description to his family:

"Last night the ship passed through a bizarre natural phenomenon. Don't know what it was and have never read about anything like it. There was energy hovering and spinning just above the water. It was pulsating. A little like glowing mist but it spun and moved faster than the waves and made circles and other patterns. It sped out as far as you could see and lasted over 20 minutes.

"Like the northern lights but on the surface of the water and not in the sky. There was also lightning in the air and tons of fluorescent plankton in the water, and maybe that had something to do with it but not really sure. It was definitely something like St Elmo's fire or ball lightning, and I suspect I will never see it again."

• The Navigator

This detailed report is from the ship's Navigator, who witnessed the entire event:

"I assumed the watch as Officer of the Deck with all conditions normal. As the ship's Navigator, I had previously plotted a track that would take us from a day- time operating area to our assigned night area. Tankers, dhows and other sea traffic made it apparent that we would have a much easier transit by altering course to the north, maintaining a comfortable distance from a previously discovered uncharted oil platform and eventually maneuvering to the west to assume our new station. After a quick call to the Captain, our plans had been changed to do just that.

"At approximately 2030, just as I [was] passing the closest point of approach with the oil platform, I glanced out to the starboard bridge wing and noticed what appeared to be strong waves hitting us directly on our beam. The ship had less than a single degree of list and virtually no roll, so I went out on the bridge wing for a closer look. The first look at this light did not indicate that any swirls or circles were involved. Just long straight waves traveling from the horizon, spanning out to the left and right as far as the eye could see. I was very impressed by the speed and consistency of the waves. The distance between the waves was about the same width as the waves themselves (on the order of ten to twenty feet [~3.5 to 6.1 m]), but it was very difficult to measure the size or the speed.

"Looking at the speed and pattern...I assumed that it was sound. It was obviously slower than light but much quicker than anything that I had ever seen caused by wind or waves."

"I pointed them out to the other bridge watchstanders and we stood there in awe. Theories and possible explanations started immediately...could it be our radars?"

"It became obvious that I would need to call the Captain; what was not obvious was exactly what to tell him. Obviously the USN does not have a standard report format for this situation. 'Captain, this is the Officer of the Deck. We have a...strange light phenomenon occurring up here that I can't really explain. It's...', as I remember it. His response: 'I'll be right up!'

"When the Captain arrived on the bridge, the light patterns had begun to change. One of the most difficult things for me to determine was whether the patterns themselves were shifting or if we were simply driving into a different section of the phenomenon.

"As we progressed toward what I believe was near the center, I distinctly remember seeing central points that circles of light originated at and grew in 360 degrees. This reminded me of the impact of a drop of water hitting the surface of a calm body of water, except that this wave traveled much faster.

"My scientific side kicked in. I did suspect that bioluminescence was at least partially responsible for the light show at hand. Generally this is caused when the ship's wake disturbs species. It tends to glow in a bright green color, much like that of a phosphorescent light stick. It usually splits like a giant V from the ship's hull as we pass through the water. If something biological was being disturbed, then what was causing it? Looking at the speed and pattern...I assumed that it was sound. It was obviously slower

than light but much quicker than anything that I had ever seen caused by wind or waves.

"That theory was quickly put to rest when the spirals began. It wasn't as if something was producing the light at the center and it was following the spiral by growing. More like if you had a giant light that had a spiral cutout blocking part of it and then rotated it. Like something that belonged on a dance floor. The centers of these spirals passed directly down our ship's beam. You could pinpoint the exact center. I couldn't believe or begin to explain what I was seeing.

"The Captain had me call the Executive Officer and he soon after invited the crew to the bridge. His description to the crew was similar to the one I had

previously given the Captain. About fifty of our crewmembers began filing into the pilot house. Their reaction and the environment it created reminded me of watching a fireworks display on the fourth of July...for the first time. Very fun and exciting, certainly not what I had expected for my after-dinner watch.

"As we transited at about seven knots, the light began to fade. I thought that maybe it was over. The Captain had us turn to a reciprocal course and after a few minutes of back-tracking the light was back. This was happening in an area that I believe was only a few miles in diameter.

"Having the deck, I didn't have a chance to grab my own camera, and, as far as I know, none of the pictures taken actually display what we were seeing. The Executive Officer thought that maybe it was St Elmo's fire. A quick Internet search disproved that theory when someone discovered the link www.cropcircleanswers.com.

"The description of the Marine Lightwheels was spot on. The only difference that I might point out between the sketches and what I witnessed was that I didn't see the patterns overlap at any point.

"I'm left with a mixed of feeling of being happy that I was lucky enough to see this and a real confusion about the 'force' that activates the light. The closest comparison that I can draw is to magnetism. But even lines of flux do not take on such perfect symmetry. I truly hope but somehow doubt that I will witness this again."

• The Commander

CDR Gennick added the following note:

"Other observations: The light waves were unaffected by wind. They traveled at the same speed upwind and downwind. The further the light waves got from the ship, they began to appear as just waves [versus] geometric designs. There was thunderstorm and lightning activity in the region that night."

Sightings Confirm Reality of Marine Lightwheels

I cannot adequately express my amazement and elation at having learned of this highly significant event, nor my gratitude to these dedicated US Navy officers who shared their extraordinary experiences and observations with me—someone who has long sought to document this mysterious Marine Lightwheel phenomenon and help bring it into the light of serious scientific inquiry and ultimately, hopefully, to recognition of its reality and a much wider understanding.

This amazing 2009 sighting together with the

spectacular sighting by 30 crewmembers of another US Navy ship in the Strait of Hormuz, as documented in my 2007 article, means that an unprecedented total of 80 naval personnel in two years have witnessed such awesome performances of this particular type of Earth's "natural magic". The sightings provide intensely compelling and highly credible evidence of the reality of a long-told-of marine phenomenon, thought by most to be an outlandish maritime legend. ∞

*NEW: 2012 & THE SHIFT OF AGES

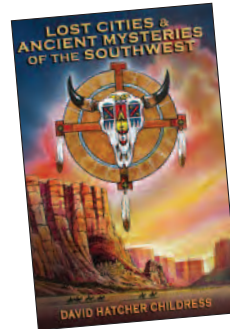

2012 AND THE SHIFT OF AGES A Guide to the End of the World by Alexander Price

Many people in the ancient world saw human life as deeply connected with the great cycles of nature: the rising and setting of the sun, the changing of the seasons, the death and rebirth of vegetation. In the same way that other patterns in nature repeat at regular intervals, they believed that human history also goes through cycles in which significant events repeat, and are likely to happen again in the future at predictable times. A penetrating study into the history of astrology, ancient religion, secret societies and the evolution of consciousness, 2012 and the Shift of Ages: A Guide to the End of the World is sure to be an invaluable resource in navigating a time of difficult transitions.

*NEW - Lost Cities

LOST CITIES & ANCIENT MYSTERIES OF THE SOUTHWEST by David Hatcher Childress

Popular Lost Cities author David Hatcher Childress takes the road again in search of lost cities and ancient mysteries. This time he is off to the American Southwest, traversing the region's deserts, mountains and forests investigating archeological mysteries and the unexplained. Join David as he starts in northern Mexico and searches for the lost mines of the Aztecs. He continues north to west Texas, delving into the mysteries of Big Bend, including mysterious Phoenician tablets discovered there and the strange lights of Marfa. In Arizona he investigates tales of Egyptian catacombs in the Grand Canyon, and in Nevada and California he checks out the rumors of mummified giants and weird tunnels in Death Valley.

AMAZING COINCIDENCES

Life is full of coincidences, some very minor but occasionally extraordinary. Following is a list of 15 of the more extraordinary coincidences.

Childhood Book Discovery

While American novelist Anne Parrish was browsing bookstores in Paris in the 1920s, she came upon a book that was one of her childhood favorites: *Jack Frost and Other Stories*. She picked up the old book and showed it to her husband, telling him of the book she fondly remembered as a child. Her husband took the book, opened it, and on the flyleaf he found the inscription: "Anne Parrish, 209 N. Weber Street, Colorado Springs". It was Anne's very own book.

Poker Luck

In 1858, Robert Fallon was shot dead—an act of vengeance by those with whom he was playing poker. Fallon, they claimed, had won the

\$600 pot through cheating. With Fallon's seat empty and none of the other players willing to take the now-unlucky \$600, they found a new player to take Fallon's place and staked him with the dead man's \$600.

By the time the police arrived to

"It made my hair stand on end when I heard the two were brothers, and identical twins at that. It came to mind that perhaps someone from upstairs had a say in this."

investigate the killing, the new player had turned the \$600 into \$2,200 in winnings. The police demanded the original \$600 to pass on to Fallon's next of kin—only to discover that the new player turned out to be Fallon's son, who had not seen his father in seven years!

Twin Deaths

In 2002, seventy-year-old twin brothers died within hours of one another after separate accidents on the same road in northern Finland.

The first of the twins died when he was hit by a lorry while riding his bike in Raahe, 600 kilometres north of the capital, Helsinki. He died just 1.5 km from the spot where his brother was killed.

"This is simply a historic coincidence. Although the road is a busy one, accidents don't occur every day," police officer Marja-Leena Huhtala told Reuters. "It made my hair stand on end when I heard the two were brothers, and identical twins at that. It came to mind that perhaps someone from upstairs had a say in this," she said.

Poe Coincidence

In 1838, the famous horror writer Edgar Allan Poe had his only novel published: *The Narrative of Arthur Gordon Pym of Nantucket*. It was about four survivors of a shipwreck who

were in an open boat for many days before they decided to kill and eat the cabin boy whose name was Richard Parker.

Some years later, in 1884, the yawl *Mignonette* foundered with only four survivors, who were in an open boat for many days. Eventually, the three senior members of the crew killed and ate the cabin boy. The name of the cabin boy was Richard Parker.

Royal Coincidence

In Monza, Italy, King Umberto I went to a small restaurant for dinner, accompanied by his aide-de-camp, General Emilio Ponzia-Vaglia. When the owner took King Umberto's order, the king noticed that he and the restaurant owner were virtual doubles in face and in build. Both men began discussing the striking resemblances between each other and found many more similarities.

1. Both men were born on the same day of the same year, 14 March 1844.

2. Both men were born in the same town.

3. Both men married a woman with same name, Margherita.

4. The restaurateur opened his restaurant on the same day that King Umberto I was crowned King of Italy.

5. On 29 July 1900, King Umberto was informed that the restaurateur had died that day in a mysterious shooting accident, and as he expressed his regret he was then assassinated by an anarchist in the crowd.

Falling Baby in Luck

In 1930s Detroit, a man named Joseph Figlock was to become an amazing figure in a young (and, apparently, incredibly careless) mother's life.

As Figlock was walking down the street, the mother's baby fell from a high window onto Figlock. The baby's fall was broken and Figlock and the baby were unharmed.

A year later, the selfsame baby fell from the selfsame window, again falling onto Mr Figlock as he was passing beneath. Once again, both of them survived the event.

Mysterious Monk

In 19th-century Austria, a near-famous painter named Joseph Aigner

attempted suicide on several occasions. During his first attempt to hang himself at the age of eighteen, Aigner was interrupted by a mysterious Capuchin monk. And again, at age twenty-two, he was prevented from hanging himself by the very same monk. Eight years later, he

was sentenced to the gallows for his political activities. But again, his life was saved by the intervention of the same monk.

At age sixty-eight, Joseph Aigner finally succeeded in suicide, using a pistol to shoot himself. Not surprisingly, his funeral ceremony was conducted by the very same Capuchin monk—a man whose name Aigner never even knew.

Photographic Coincidence

A German mother who photographed her infant son in 1914 left the film to be developed at a store in Strasbourg. In those days, some film plates were sold individually. World War I broke out and, unable to return to Strasbourg, the woman gave up the picture for lost.

Two years later, she bought a film plate in Frankfurt, over 100 miles away, to take a picture of her newborn daughter. When developed, the film turned out to be a double exposure, with the picture of her daughter superimposed on the earlier picture of her son.

Through some incredible twist of fate, her original film, never developed, had been mislabelled as unused and was eventually resold to her.

Unexpected Book Find

In 1973, actor Anthony Hopkins agreed to appear in the film *The Girl from Petrovka*, based on the novel by George Feifer. Unable to find a copy of the book anywhere in London, Hopkins was surprised to discover one lying on a bench in a train station.

It turned out to be George Feifer's own annotated copy, which Feifer had lent to a friend and which had been stolen from his friend's car.

Lives of Twins

Twin brothers, Jim Lewis and Jim Springer, were separated at birth and

"There's a new series starting tonight: a female vampire meets a wolfman on an island, they marry, then tour the world as celebrity dancing chefs."

adopted by different families. Unknown to each other, both families named the boys James. Both Jameses grew up not knowing of the other, yet both of them sought law-enforcement training, had abilities in mechanical drawing and carpentry, and married women named Linda.

Both of them had sons, one of whom was named James Alan and the other named James Allan. The twin brothers also divorced their wives and married other women—both named Betty. And they each owned dogs which they named Toy.

Revenge Killing

In 1883, Henry Ziegland broke off a relationship with his girlfriend who then, out of distress, committed suicide. The girl's enraged brother hunted down Ziegland and shot him. Believing he had killed Ziegland, the brother then took his own life. In fact, however, Ziegland had not been killed. The bullet had only grazed his face, lodging into a tree. It was a narrow escape.

Years later, in 1913, Ziegland decided to cut down the same tree, which still had the bullet in it. The huge tree seemed so formidable that he decided to blow it up with dynamite. The explosion propelled the bullet into Ziegland's head, killing him.

Golden Scarab Dream

From Carl Jung's *The Structure and Dynamics of the Psyche*:

"A young woman I was treating had, at a critical moment, a dream in which she was given a golden scarab. While she was telling me this dream, I sat with my back to the closed window.

"Suddenly I heard a noise behind me, like a gentle tapping. I turned round and saw a flying insect knocking against the window pane from outside. I opened the window and caught the creature in the air as it flew in. It was the nearest analogy to the golden scarab that one finds

in our latitudes, a scarabaeid beetle, the common rose-chafer (*Cetonia aurata*), which contrary to its usual habits had evidently felt an urge to get into a dark room at this particular moment.

"I must admit that nothing like it ever happened to me before or since, and that the dream of the patient has remained unique in my experience."

Taxi Deaths

In 1975, while riding a moped in Bermuda, a man was accidentally struck and killed by a taxi.

One year later, this man's brother was killed in the very same way. In fact, he was riding the very same moped. And to stretch the odds even further, he was struck by the very same taxi driven by the same driver—and even carrying the very same passenger!

Hotel Discoveries

In 1953, American newspaper columnist and TV reporter Irv Kupcinet was in London to cover the coronation of Queen Elizabeth II. In one of the drawers in his room at the Savoy, he found some items that by their identification belonged to a man named Harry Hannin. Coincidentally, Harry Hannin—a basketball star with the famed Harlem Globetrotters—was a good friend of Kupcinet.

But the story has yet another twist. Just two days later, and

before he could tell Hannin of his lucky discovery, Kupcinet received a letter from Hannin. In the letter, Hannin told Kupcinet that, while staying at Hôtel Le Meurice in Paris, he found in a drawer a tie—with Kupcinet's name on it.

Historical Coincidence

The lives of Thomas Jefferson and John Adams, two of America's founding fathers, had some interesting connections. Jefferson crafted the Declaration of Independence, showing drafts of it to Adams who (with Benjamin Franklin) helped to edit and hone it. The document was approved by the Continental Congress on 4 July 1776.

Surprisingly, both Jefferson and Adams died on the same day, 4 July 1826, exactly 50 years after the signing of the Declaration of Independence. ∞

DARK INTRUSIONS

by Louis Proud

Anomalist Books, Texas, USA, 2009
ISBN 978-1-9336654-4-3 (278pp tpb)
Available: AnomalistBooks.com

This is a gripping book about sleep paralysis (SP), a phenomenon which affects 25–40% of people at least once, and around 1% regularly, and has no cultural barriers.

Louis Proud (author of the Lightning article last edition) was an ongoing sufferer of SP from 2001 when he was seventeen. After years as a victim as well as a keen researcher of the subject, Proud realised he had to do more to rid himself of the incorporeal entities that would visit him during these SP states—entities that ranged from the harmless and the mischievous to the downright dangerous if not evil. He was not alone in his experiences, and in his book he relates stories from many sources as well as his own.

It was a revelation to Proud when he discovered his soul through this SP phenomenon and realised that he could explore the spirit realm firsthand. In recent years, he has used the SP experience as a portal to

paranormal realms by inducing lucid dreaming and out-of-body states.

Proud reflects on cultural and historical contexts and his own experiences in the light of spiritism, channelling, shamanism, alien abductions and more. He broadens the astral landscape with reference to the work of Stan Gooch on the hypnagogic state, Dion Fortune on psychic attack, Robert Monroe on OBEs and Trevor James Constable on etheric organisms in the sky.

A profound book by a young researcher wise beyond his years.

SOUNDING THE MIND OF GOD

by Lyz Cooper

O Books, Ropley, Hants, UK, 2009
ISBN 978-1-84694-211-2 (190pp tpb)
Available: www.o-books.net

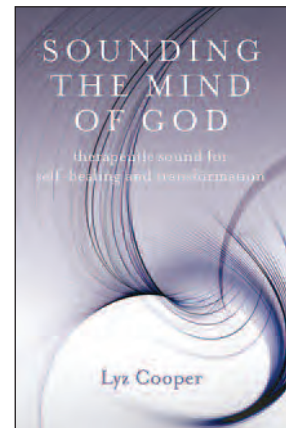

The mind of God is Sound, and we need to align all levels of Self—physical, emotional, mental and spiritual—with this Source if we're to have good health and well-being, says sound healer Lyz Cooper in her practical, holistic guidebook.

Cooper began investigating sound therapy in the early 1990s when she found that certain sounds had a beneficial effect on a debilitating illness afflicting her, and by 1997 she had started her own Soundworks outfit, sharing her therapeutic

techniques with other healers as well as patients. By 2000 she had formed the British Academy of Sound Therapy, the first school in the UK to offer professional training courses.

Cooper takes us through exercises to aid alignment by working with sympathetic resonance and entrainment, identifying expansion and contraction, feeling the aura and chakras, and much more. Next, she explores sound as a means for self-healing and personal transmutation, via the voice as well as instruments such as singing bowls and drums.

Her guidelines help us to design our own sounding sessions and open communication channels between Self and Source. The exercises expand the energy field and kindle our life-transforming potential.

REVIEWS

THE RIFE HANDBOOK OF FREQUENCY THERAPY with a Holistic Health Primer by Nenah Sylver, PhD

O Books, Ropley, Hants, UK, 2009
ISBN 978-1-84694-211-2 (190pp tp)
Available: www.o-books.net

As Dr Nenah Sylver acknowledges in the introduction to the second edition of her *Rife Handbook*, people are hungry for information about Royal R. Rife's groundbreaking anti-cancer technology of the 1920s–30s and the frequencies it employed.

Since the first edition in 2002 (see review in 9/05), Dr Sylver has had considerable input from "Rifers" working in diverse fields—physics, microbiology, naturopathy, chiropractic, medical practice and more—and so her voluminous new edition adds to the knowledge base.

Starting off with the politics of medicine and natural health, Dr Sylver gives an overview of the history of pleomorphism and Rife's inventions and then proceeds with a comprehensive section on therapies that promote holistic health. She also includes a detailed frequency directory for specific disease conditions. Moreover, everything you've ever wanted to know about Rife equipment and therapy sessions is answered herein.

In closing, Dr Sylver considers alternative approaches to living and dying that could create "a better world, inside and out". The appendices include resources and information on legal implications as well as electromedicine and sound therapies. A must-have book for practitioners and the public alike.

CANCER IS NOT A DISEASE: IT'S A SURVIVAL MECHANISM by Andreas Moritz

Ener-Chi Wellness, USA, 2009, 3rd ed.
ISBN 978-0-976794424-X (231pp tpb)
Available: www.ener-chi.com

After receiving feedback from many of our readers, we obtained a copy of *Cancer is Not a Disease* for review. The author, Andreas Moritz, is a medical intuitive and practitioner of Ayurvedic medicine who has developed an approach called Sacred Santémomy, which helps transmute the emotional, psychological and spiritual causes of ill health.

It is Moritz's contention that cancer is not an actual disease but is part of the body's complex survival responses, a desperate final attempt by the body to stay alive for as long as circumstances allow. To treat cancer successfully requires healing its root causes, and that means restoring the person's well-being on

all levels. It does not mean using treatments like chemotherapy and radiotherapy, which destroy healthy cells and in any case have very poor success rates. Moritz maintains that cancer does not arise unless there is a strong undercurrent of emotional uneasiness and deep-seated frustration; when it does, it's a sign of unresolved inner conflict.

Moritz explains that we need to take a quantum physics perspective: that we, as consciousness, soul or spirit, are the only true source of the energy and information that run the body. What we do, eat, drink, feel and think determines how well our genes can control and sustain our physical existence. His approach encourages us to trust in the body's innate wisdom and intelligence.

REVIEWS

CONTACTEES: A History of Alien-Human Interaction by Nick Redfern

New Page Books, NH, USA, 2010
ISBN 978-1-60163-096-4 (248pp tpb)
Available: www.newpagebooks.com

Bound up in the history of the UFO phenomenon in the early years of the modern era are the stories of people who claimed to have made contact with extraterrestrial beings and even to have been invited aboard their spaceships. Well informed to give a perspective on this period is US-based British researcher/author Nick Redfern (*Strange Secrets*, 11/01).

The most famous "contactees" of this 1950s-60s heyday include George Adamski, George Hunt Williamson, George van Tassel and George King (what is it about all these Georges, eh?), and their encounters often featured Venusians. As Redfern explains, many of them developed cult followings but most of their members drifted away in time, disillusioned with the lack of real evidence for alien visitations.

Many of these contactees claimed to be passing on messages from the Space Brothers and Sisters about the importance of living in peace and the dangers of nuclear power/warfare, but Redfern wonders whether they merely latched onto a new way of expressing

dire warnings for humanity.

Particularly fascinating are the FBI files on Adamski and van Tassel, who were regarded as security risks for promoting the idea of "Communist ETs", among other things. And then there are the tales of sexual encounters with irresistible Blond alien females...and more besides.

Redfern includes interesting contextual asides in his narrative, such as comments on this period by veteran ufological observer Jim Moseley of *Saucer Smear* fame.

This is essential background for honing your understanding of the UFO phenomenon and its history.

YETIS, SASQUATCH & HAIRY GIANTS

by David Hatcher Childress
AUP, Kempton, IL, USA, 2010
ISBN 978-1-931882-98-9 (384pp tpb)
Avail: adventuresunlimitedpress.com

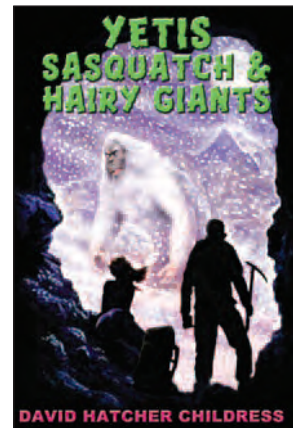

Recent eyewitness accounts and photographs of yetis in the Himalayas and "Bigfoot", sasquatch and "skunk apes" in North America suggest these phenomenal creatures are not just the stuff of legend.

First off, though, in his new book, David Childress focuses on the giants of yore, quoting from Old Testament and Greek writings about Titans and Cyclopean giants and recounting

reports from European explorers in far-flung places like Patagonia. He searches for giant skeletons in North American caves and relates stories of "hairy wildmen" who featured in mediaeval tales and drawings. He asks us to ponder whether a "giant" genetic heritage is alive in us today.

Childress has amassed numerous photos and interviews here, and he can speak of many people who have *not* gone public with reports of encounters with anomalous beasts lest they be ridiculed. All he asks of the reader is to keep an open mind. Yet he acknowledges that there have been too many reports for them all to be hoaxes or misidentifications.

If he's right, we can take heart that there are still mysteries in our world. It's up to us to keep up our curiosity.

BETTER HEALTH FOR YOU AND YOUR PET

Metabolic Syndrome, or Syndrome X is Sweeping the World. Are you at Risk?

Levolar Forte is a supplement specifically formulated to assist in maintaining healthy blood sugar levels.

Levolar Forte, now with Chromium, Cinnamon extract and Salcia is made from a combination of several species of specially grown Cordyceps mushrooms and Super Concentrated Maitake extract, along with a full 200 mgmg of Chromium Polynicotinate per caplet. These ingredients have all been shown to help balance blood sugar metabolism. The new Levolar Forte formula has been improved for even greater effectiveness. See www.alohamedicinals.ca.

K9 Immunity for Cancer in Dogs

Now in use around the world, Immuno-Modulation Therapy is a new approach to treating cancer in dogs. Offering greater hope than any previous therapy, it targets the immune system dysfunction that allows cancers to grow. **K9 Immunity** is formulated to trigger a healthy immune response, so your dog is able to deal with cancer as it would any other wound, and heal it, leaving behind scar tissue. See www.dogcancer.ca.

These and many other effective medicinal mushroom-derived products can be ordered directly from our web sites. We ship world-wide.

REVIEWS

THE 8 CALENDARS OF THE MAYA: The Pleiadian Cycle and the Key to Destiny
by Hunbatz Men

Bear & Company, Rochester, VT, 2010
ISBN 978-1-59143-105-3 (119pp tpb)
Available: BearandCompanyBooks.com

Who better than an indigenous Mayan daykeeper to teach us the purpose and meaning of the Mayan calendars? Hunbatz Men is a Mayan ceremonial leader and an authority on Maya chronology. His 1983 book, originally published in Spanish, has been updated and expanded for this 2010 English-language edition.

The ancient Maya developed many calendars, each marking cycles of various systems in the cosmos and serving to synchronise human lives with cosmic rhythms. Among them are the four seasons calendar incorporated into the Pyramid of Kukulcán, the 52-year Tunben K'ak' calendar, and the K'altun calendar of 13 cycles of 20 years, or 260 years. Each has an intimate connection with the Pleiades—the seven-star system that's at the core of Mayan cosmology. The calendar that most occupies Hunbatz Men's attention is the Tzek'eb, which marks a great cycle of 26,000 years—the time it takes for the Sun to revolve around Alcyone, the central star of the Pleiades.

The Maya also tracked time through their pyramids, designed to transform energy in line with the cosmic cycles, Hunbatz says. In explaining the four Pleiadian eras, or suns, he reminds us that this knowledge is sacred and

asks that the calendars be respected and used for the benefit of all.

2012: SCIENCE OR SUPERSTITION
by Alexandra Bruce

The Disinformation Co., NY, 2009
ISBN 978-1-934708-28-6 (334pp tpb)
Available: disinfo.com; 2012sos.net

In the last few years, such a plethora of books about 2012 and the end of the Mayan Long Count calendar have been published that it's hard to sort the wheat from the chaff. Alexandra Bruce has come to the rescue in her analytical overview of the research and opinions out there, and she smashes a few myths in the process.

It's the companion book to the same-named documentary film produced by The Disinformation Co. in New York City. Prominent researchers of this doomsday-or-not scenario are highlighted in the film, and their viewpoints and those of many others are expanded upon in the book. The studies of John Major Jenkins, Graham Hancock, Daniel Pinchbeck, Michael Cremo, Carlos Barrios, Paul LaViolette, Anthony Aveni, Carl Johan Calleman, Gregg Braden and many more are covered.

Bruce puts forth detailed descriptions of Mayan cosmology, the precession of the equinoxes, "world ages" doctrines from diverse cultures, apocalypse science, the history of the "2012 meme" itself, and ancient and modern prophecies about so-called "end times". Her conclusion is that 2012 is not about the Mayan Long Count calendar: the meme has evolved beyond debate about the calendar's relevance and is really about us on planet Earth now—a time when our sense of urgency about our unsustainable way of life is coming to the fore on many levels.

Readers who are "awakening to the immanence that's all around us and within us" should find the extensive glossary, resources and bibliography section extremely useful for research.

Bruce proposes that 2012 could well bring a new awakening of human consciousness—if we want it to.

A totally new ESOTERIC approach to Numerology

THE LIFE DIAMOND

TAKES NUMEROLOGY A QUANTUM LEAP FORWARD

USE IT AS A SELF-GUIDANCE TOOL TO.....

• EXPOSE YOUR PAST, PRESENT & FUTURE DIRECTIONS

• MASTER YOUR DESTINY

• BE ALL THAT YOU WERE BORN TO BE!

The Yearly Diamond available June 2010

The Life Diamond - Your Mini Map to Life introduces a DIY, cutting-edge, approach to numerology. It synthesises numerology, tarot, the Qabalah, Sacred Geometry and occult philosophies, to reveal your tailored gifts, lessons, specialities, karma and dharma.

This unique, approach exposes numbers from 0 to 99 which *individualise* spiritual and everyday guidelines as never before!

Use these inspired methods to know yourself, capabilities and Life Purpose in unprecedented depth and detail.

ESP INDUCTION THROUGH FORMS OF SELF-HYPNOSIS

by **Richard Alan Miller**
Earthpulse Press, Alaska, USA, 2009
ISBN 978-1-890693-30-5 (207pp tpb)
Available: www.earthpulse.com

Richard Alan Miller is an unsung pioneer whose name should be writ large in the annals of metaphysical and paranormal exploration. He deserves enormous credit for his part in developing the holographic universe theory that came to the fore in the early 1970s. And, as readers will discover in his article in this edition, he's also responsible for helping US government intelligence agencies develop protocols for training personnel to utilise extrasensory perception (ESP)—having been involved in intel ops during the 1960s. He's dedicated his working life to understanding the occult world from a scientific perspective as well as to developing alternative agriculture pursuits, proving his inventiveness here as well.

Miller, a perceptive soul with an eccentric bent, introduces us to the world of ESP with a new take on reality. In his latest book, he reprints his famous questionnaire that screens for ESP ability, and he gives specific details on tests for inducing ESP via self-hypnosis. He instructs on biofeedback, dreamscaping, grounding and relaxation techniques, remote viewing, belief systems, trance states and more.

Above all, Miller entices us into a

world where we can discover our latent intuitive abilities and transform ourselves as part of the next evolutionary step for humanity.

PATTERNS OF ETERNITY: Sacred Geometry and the Starcut Diagram

by **Malcolm Stewart**
Floris Books, Edinburgh, UK, 2009
ISBN 978-086315-712-7 (279pp tpb)
Available: www.florisbooks.co.uk

Our understanding of sacred geometry takes a new leap with Malcolm Stewart's analysis of the so-called Starcut diagram in his landmark book *Patterns of Eternity*. This diagram as well as designs like the Tetraktys, the Tree of Life of the Kabbalists and the mandalas of the Buddhists are not just beautiful patterns; they are mnemonics—memory aids that encode information for their viewers on the path to spiritual enlightenment. That information can include keys to language, logic, number, geometry, music, harmony, astronomy and, indeed, to the cosmos itself, as demonstrated even in the simplest of the Platonic solids, the tetrahedron.

Stewart, a stained glass designer, geometer, lecturer and former priest, is informed in his approach by his detailed study of the geometry and proportion encoded in ancient and Renaissance structures, artefacts and symbols as well as in the human form. Here he presents many of his findings, richly illustrated with colour photographs and diagrams. He speculates that the Starcut diagram, set up on a 60 x 60 grid with nodes governing direct vertical and horizontal divisions by 3, 4 and 5, contains within its measures the ancient sexagesimal number system that was used in architecture and construction in antiquity.

With acknowledgement to the author Hermann Hesse, Stewart has come up with his own Starcut Glass Bead Game which he describes in the appendix. Euclid, Plato and Pythagoras would surely approve of Stewart's profound and original work.

Did You Know?

Everybody worldwide is infected by at least 12 of over 100 parasites, bacteria, fungi and viruses that can infect humans.

Get rid of them with the ZA-PET™

Our Bioelectronic therapy is based originally on Dr Hulda Regehr Clarks research. She claimed that specific bodily parasites and viruses, often combined with certain toxins may be responsible for a wide range of common diseases. Her protocol of dealing with disease was confirmed at the Albert Einstein College of Medicine by scientists in 1990 resulting in a patent (U.S.#5,188738).

A follow up clinical trial by Prof Henry Lai at the University of Washington confirmed that the zipper selectively kills Cancer cells. (research article at www.drclark.net)

SHADOW MASTERS

by Daniel Estulin

Trine Day LLC, Waltherville, OR, 2010
ISBN 978-0-979988615 (357pp tpb)

Available: www.TrineDay.com

An astute observer of Bilderberg Activities for many years, Daniel Estulin goes deeper into the club's machinations in *Shadow Masters*, following on from his best-selling book *The True Story of the Bilderberg Group* (reviewed in 15/04; see articles in 12/05 and 14/05). Estulin applies his gift for dogged research and connecting the dots, and utilises his many contacts behind the scenes for this gripping exposé of the shadowy players that pull the strings of nation-states worldwide to gain ever more power and profit.

Estulin is a conspiracy *realist* who gets to the nitty-gritty of global trafficking in drugs, diamonds, guns and enriched uranium, money laundering by bankers and mafiosi, political assassinations, media spin-doctoring, links between intelligence/security agencies and terrorists, covert funding of wars and the overthrowing of governments.

He focuses on specific cases, from the killing of former Russian KGB agent Alexander Litvinenko and the manipulation of Russia's economy by globalist interests to the support of Kosovo as a drug-trafficking route and the farcical trial of arms trafficker Victor "Merchant of Death" Bout in Thailand. He reveals a mind-boggling web of intrigue, corruption and deception that is subverting

justice and freedom. Among the shocking revelations is that mini-nukes have been used at least 50 times since the end of World War II.

Estulin provides extensive references and documentation to support his claims in this important work of investigative journalism.

SPONTANEOUS EVOLUTION: OUR POSITIVE FUTURE

by Bruce H. Lipton, PhD, and Steve Bhaerman

Hay House, London, UK, 2009
ISBN 978-1-4019-2580-2 (402pp hc)
Available: www.hayhouse.co.uk

This is a powerful, wise and witty collaborator. Cell biologist Dr Bruce Lipton (*The Biology of Belief*; see 12/04 and article in 13/02) contributes knowledge of the new biology, while social activist Steve Bhaerman (aka Swami Beyondananda, the "cosmic comic") brings experience of the body politic. They propose that humanity is on the verge of a great evolutionary advance, but first we must reassess who we are and where we're going as individuals and adopt new ways of seeing, believing and reasoning.

Just as medical patients can have "spontaneous remissions" of disease, so too can we "humanifest" a "spontaneous re-mission" of society where we focus on the survival of our species. The problems that we face as a collective are not being solved by current belief systems and outmoded ways of thinking. By combining frontier science concepts with a true love for ourselves and humanity, we have the means to step into new evolutionary possibilities. Everything is interconnected, just as the quantum physicists say, and by becoming "planetary stem cells" we can support the health and growth of our world and everyone in it.

Lipton and Bhaerman suggest "we are the leaders we've been waiting for". We are cellular souls who, once awakened, can create a "coherent loving field" that empowers the voice of the human superorganism. It's all one big love song, folks!

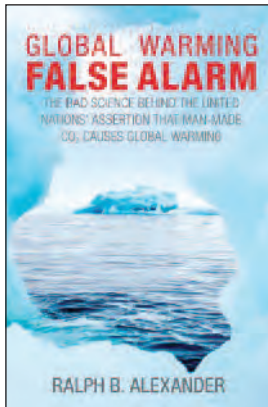

REVIEWS

GLOBAL WARMING FALSE ALARM

by **Ralph B. Alexander**

Canterbury Publishing, USA, 2009
ISBN 978-0-9840989-0-3 (178pp tpb)
Avail: Canterbury Publishing, PO Box 1731, Royal Oak, MI 48068-1731, USA

Carbon dioxide has little to do with global warming, according to US-based physicist and environmental market analyst Dr Ralph Alexander. The UN IPCC's assertion that man-made CO₂ emissions are causing global warming is based on deceptive manipulation of climate data and flawed computer modelling, he says. Dr Alexander's intention in his book is to highlight the science over the politics, and to defend the "honour of science" as well as the climate researchers who really are trying to make sense of the Earth's climate.

Dr Alexander exposes temperature data fudging with the "hockey stick" graph and IPCC "dirty tricks". He analyses failed models of Arctic and Antarctic ice melting as well as of atmospheric and sea surface warming. He also explains what's wrong with the man-made global warming hypothesis, and looks at the role of the Sun in natural climate cycles and at the action of the Pacific Decadal Oscillation. In addition, he considers the evidence for global cooling, a trend that's been evident since 2002, and he warns that the IPCC and other alarmists may be crying wolf over the much-hyped projected rise in sea levels. Finally, he points out that with all this bad

science, the carbon-cap initiatives that governments want to enact will be prohibitively costly and will do nothing to affect any global warming.

Dr Alexander writes with clarity in a way that laypersons, scientists and policy-makers can understand.

THE REAL GLOBAL WARMING DISASTER

by **Christopher Booker**

Continuum, London & NY, 2009
ISBN 978-1-4411-1052-7 (368pp hc)
Available: www.continuumbooks.com

The promotion of man-made global warming scenarios is based more on bad politics than good science, says commentator and UK *Sunday Telegraph* columnist Christopher Booker. In his book *Scared to Death* (see 15/03), he and co-author Dr Richard North devoted a substantial chapter to the anthropogenic global warming "consensus" and how its history has echoed a pattern as seen with other scares such as BSE, bird flu and the Millennium Bug. In *The Real Global Warming Disaster*, Booker expands on this pattern.

Although his book went to press before the "Climategate" scandal of November 2009 (see our article last issue), Booker exposes much manipulation that was *already* going on in data-collecting centres such as the Climate Research Unit at the University of East Anglia. Amazingly, some key historical data had already been "lost" prior to the scandal.

Booker documents the "consensus-forging" years from 1972 to 1997 and the arrival of the UN IPCC on the scene. Next, he examines the period to 2007 with reference to the now-debunked "hockey-stick" graph and Al Gore-led hysteria. He then covers the start of the crumbling consensus from 2007 to 2009 as temperatures plummeted in the worst northern-hemisphere winters in decades.

In the lengthy epilogue, rich in historical context and revelations of corruption, Booker asks who really benefits from perpetuating the man-made global warming agenda.

DVDs

Compiled by Duncan Roads

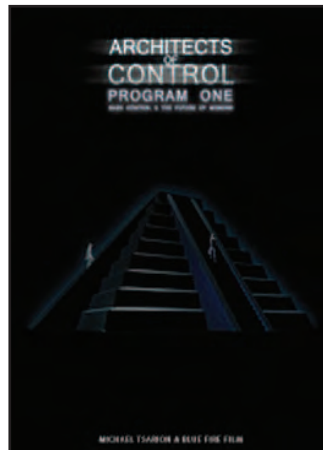

ARCHITECTS OF CONTROL Program One: Mass Control & The Future of Mankind

Michael Tsarion, Blue Fire Film © 2008
Avail: www.architectsofcontrol.com

Program One of *Architects of Control* explores humankind's future and the post-human world. Will the "perfect" human be a dumbed-down, regimented inhabitant of a cyber-purgatory created by unseen elites? Will the children of tomorrow be smiling depressives of a technocratic dystopia?

These questions are thoroughly explored with conversational commentary interspersed with well-chosen clips and examples. Some great archival footage is included.

Issues of control and manipulation of the masses via subliminals, mind control, advertising, religion and beliefs are at the core of this film. The "architects" understand us better than we understand ourselves, hence it becomes essential to reconnect to who we are in order to change.

CROSSING THE EVENT HORIZON: Rise to the Equation

A workshop symposium with
scientist Nassim Hamein

Crossing The Event Horizon © 2007
(4-DVD set, 6 hours)

Available: The Resonance Project
Foundation, PO Box 764, Holualoa, HI
96725, USA, tel (808) 325 0070,
www.theresonanceproject.org

Nassim Hamein's lifelong journey into the geometry of space-time has led to a coherent understanding of the fundamental structure of the Universe.

In this four-DVD presentation, Nassim takes us on a journey through our evolution, exposing the changes necessary to produce an all-encompassing unified physics that

takes in not only the four forces of nature but also evolution and the rise of consciousness.

Demonstrating parallels between this theory and ancient codes found in documents and monuments, Nassim weaves a tale which could prove to be one of the most important discoveries of our time.

Are you curious about the mysteries of ancient Egypt? What about the mystery of crop circles? These DVDs explore all of the above and more.

The coverage includes:

- **DVD 1:** Search for the Fundamental Pattern Dimensions of Geometry, Chemistry, Scaling Law, Biology, Principle of Unification and Pyramids;

- **DVD 2:** From Micro to Macro: Unifying the Field Geometry; Structure of the Vacuum; Crop Circles;

- **DVD 3:** Everything is a Black "Whole" Ancient Egypt; Archaeology; Black Wholes/White Wholes;

- **DVD 4:** Unlocking the Mystery; Arc of the Covenant; Knights Templar; Kabbalah: Tree of Life Decoded.

Each disc has a series of special features to expand understanding of this impressive body of work.

MUSIC

Reviewed by Richard Giles

LE MARIGOT CLUB DAKAR

by Daby Balde

Riverboat Records/World Music Network, UK, 2009 (59mins)
Distributors: **Australia**—The Planet Company; **UK**—World Music Network, www.worldmusic.net

Daby Balde is from southern Senegal and his musical style is based on the Fula traditions. In 1994 he started performing with the Kolda Regional Orchestra as lead vocalist. Appearing at the Flanders Ethno Festival in Belgium in 1995 brought him to European notice. In 2005 he released his first solo album, and in 2006 and 2007 he performed at WOMAD and other festivals and clubs in the UK. The sounds of Daby Balde are smoothly hypnotic and are backed by kora, balafon and acoustic guitar.

SONGHAI BLUES: Homage to Ali Farka Touré by Samba Touré

Riverboat/WMN, UK, 2009 (68mins)
Distributors: **Australia**—The Planet Company; **UK**—World Music Network, www.worldmusic.net

Ali Farka Touré was one of the finest guitarists of all time and a musical/cultural ambassador for Africa. He gave Samba Touré an opportunity to join his band for a 1997 tour, and this solidified the young guitarist's passion to continue

his mentor's mission. Ali Farka Touré's legacy is cemented through Samba's tribute, cycling through songs from Malian and other African traditions. Samba Touré's Niger River blues guitar blends with traditional instruments to speak of the bonds of family and community. This is music with a message. Recommended.

FELA: The Best of The Black President by Fela Kuti

Kalakuta Sunrise/Knitting Factory Records, USA, 2009 (2CDs, 156mins)
Distributors: **Australia**—The Planet Company; **USA**—Knitting Factory Records, www.knittingfactoryrecords.com/artists/fela-kuti

Fela Kuti (1938–1997) was Africa's revolutionary genius and musical pioneer. Afrobeat, his gift to the world, is a modern form of danceable music that's a crossbreeding of funk, jazz, salsa and calypso with juju, highlife and other African percussive patterns. It was a political weapon for Fela, as it confronts complacency and calls for transformation. An inspiring album that's the first in a series of long-awaited reissues.

FANFARE CIOCARLIA LIVE by Fanfare Ciocarlia

Asphalt Tango Records, Germany, 2009 (CD/DVD, 50/150mins)
Distributors: **Australia**—Fuse Music, tel (02) 9699 7555; **Germany**—Asphalt Tango Records, tel +49 (0)30 285 8528, www.asphalt-tango.de

Fanfare Ciocarlia is the "fastest, fuzziest and most endearing brass band" in town—the Gypsy village of Zece Prajini ("Ten Fields"), where they've played at weddings, funerals, christenings and whatever other excuse for a party that came up. If you've seen the movie *Borat*, Fanfare Ciocarlia is the brass band that tore through "Born to be Wild" on the soundtrack. This a two-disc CD/DVD package with footage of early concerts and the film *Iag Bari* ("Brass on Fire"). Wild Romanian gypsy sounds.

FREE CD, valued at \$37, and Special Report Reveal... "How to Meditate INSTANTLY!"

If you'd like to meditate as deeply (actually more deeply) than a Zen monk, literally at the touch of a button, this may be one of the most important messages you will ever read. Here is why...

Based in part on Nobel Prize-winning research on how "complex systems" (human beings, for instance) evolve to higher levels of functioning, a mental improvement program has been created utilising a powerful audio technology called Holosync®.

A precise combination of audio signals gives the brain a very specific stimulus that creates states of *deep* meditation — and causes the creation of new *mind-enhancing* neural connections between left and right brain hemispheres.

Now a New CD and Report Reveal ...

- The scientific evidence proving how Holosync® increases the production in the brain of many vital neuro-chemicals that can slow ageing.
- How to achieve super-deep meditation, at the touch of a button.
- How to dramatically reduce stress.
- How to create remarkable emotional changes at the deepest level.
- How to improve your emotional health.
- How to heighten your creativity and problem solving ability.
- How to have more restful sleep.
- How to boost your intelligence.
- How to increase your focus, concentration and learning ability.
- How to enhance your memory.
- How to increase your motivation and confidence.
- How to have more happiness and "flow" in your life.
- How to heal emotional blocks.

The complete report on this amazing new technology and Holosync® CD, worth \$37, are FREE to *Nexus* readers for a limited time.

The Earth Has Been DESTROYED

That was front-page news around 3100 BC! So-called "primitive" tribes, speak of their ancestors destroying the world with their science. Tales of the earth tumbling, stars changing position, the earth reversing its rotation, poles switching, & even the continents moving around, are found in ancient history. Historians are finding these curious ancient "myths" difficult to ignore. Ancient monolithic building sites around the earth all ceased construction suddenly & inexplicably. All around the earth are huge rocks called "erratics" that came from hundreds & often thousands of miles away. In this light, the demise of "mythical" Atlantis, Mu and Lemuria becomes crystal clear.

It's said, man or the 'gods' caused this destruction. Today we can kill the entire population of the earth many times over with our technology, and we are affecting the earth's environment in irreversible ways. Perhaps the headline above is true for us even today.

Obviously the earth is still here & hasn't been 'destroyed', but when comparing geological evidence with ancient records, something is vastly different from what was before, & the change was for the worse; devastating & permanent, resulting in what we now consider to be 'normal'.

Geologic experts speak of the earth in the distant past as being a universal green house...but in a good way. Yet no theoretical rearranging of the continents can account for the earth's ancient climate. Well known & oft ignored accounts, speak plainly about what once was. Whatever the cause, the earth has rapidly diminished its capacity to support life in recent millennia. Analyzing ancient records and artifacts reveals man was far superior to us today. This isn't a popular theory to be sure, but the evidence is there nevertheless and is presented in this work.

Man and the earth are disintegrating at an alarming rate, with the earth becoming more hostile to man, apparently due to his own doing. This book shows what man and his technology was like just a few millennia ago & what happened to cause a vast decline in man & the earth he lives in. In the process we solve many ancient & ongoing mysteries.

Find out what happened...before it happens again! Read...

The Health Risks from Corn and Agave Sweeteners

Continued from page 14

calories. For a diet of 2,500 calories per day, that's less than three tablespoons of honey, maple syrup or dehydrated cane sugar juice or several pieces of fruit. And many people do best by avoiding sweeteners completely.

The lack of standards in the health food world comes as depressing news; but let this news encourage you to consume more pure and unrefined foods and sweetener sources. Good health depends on wise food choices, and wise food choices depend on constant vigilance. ∞

Authors' Note:

The authors are grateful for the information provided by Russ Bianchi, Managing Director and CEO of Adept Solutions, Inc., a global product creation, development, conversion and stabilisation company based in Soquel, California, USA.

This article first appeared in the Spring

2009 edition of *Wise Traditions in Food, Farming, and the Healing Arts*, the quarterly magazine of The Weston A. Price Foundation.

About the Authors:

• **Sally Fallon Morell** is the author of *Nourishing Traditions: The Cookbook that Challenges Politically Correct Nutrition and the Diet Dictocrats* (with Mary G. Enig, PhD), a guide to traditional foods with a startling message: animal fats and cholesterol are not villains but vital factors in the diet, necessary for normal growth, proper function of the brain and nervous system, protection from disease and optimum energy levels. She joined forces with Dr Enig again to write *Eat Fat, Lose Fat*, and has authored numerous articles on the subject of diet and health (including with Dr Enig in NEXUS 6/01-02, 7/03 and 9/05).

The President of The Weston A. Price Foundation and founder of A Campaign for Real Milk, Sally Fallon Morell is also a journalist, chef, nutrition researcher, community activist and homemaker. She raised her four healthy children on whole

foods including butter, cream, eggs and meat.

• **Ramiel Nagel** is a father who cares about the way we affect each other, our children and our planet through our lifestyle choices. His health background is in hands-on energy healing, Hatha and Bhakti yoga, and Pathwork. He is the author of several website health resources: www.healingourchildren.net, www.preconceptionhealth.org, www.curetoothdecay.com and www.yourreturn.org. His article "Healing Tooth Decay with Natural Nutrition" was published in NEXUS 15/03, and his book *Cure Tooth Decay* was reviewed in the same edition.

Immortal HeLa Cells and Viral Voodoo

Continued from page 30

"The cancer killed her, and, anyway, these are not normal cells, they are CANCER CELLS; and if you ask a science dude HOW OR WHY her cells are STILL ALIVE, they don't know, but they kept it a secret because at the time whites would have objected to having cancer cells that killed a black woman INJECTED INTO THEIR CHILDREN'S BODIES. I am an African-American; to me, her story is fascinating and tragic, like many stories of people who have been ripped off.

"Look at it this way: if her family had to be paid every time her cells were used, there would be some record of who got them. The rates for cancer have gone through the roof in the last 40 years; her cells have been found in places where it was impossible for them to have been—and still the scientists do not know why her cells are 'Immortal'...

"If her family had been informed,

possibly more care would have been taken with these cells that KILLED THEIR MOTHER, and, for all we know, could be killing people now because we don't know how they work."

Postscript

There is an excellent free video available on the Internet entitled *The Way of All Flesh*, produced by British television documentarian Adam Curtis. It tells the story of Henrietta Lacks as the "woman who will never die".

The film received the Golden Gate Award at the 1997 San Francisco International Film Festival.

HeLa cell research helped influence and originate US President Richard Nixon's War on Cancer, eventually causing chaos between American and Russian virologists during the Cold War in the 1970s when widespread laboratory contamination with HeLa was discovered.

The video is available at the web page <http://video.google.fr/videoplay?docid=8448974573505946013#>. ∞

An Overview of Earth Expansion Tectonics

Continued from page 39

and opening of the post-Permian modern oceans and production of new water at the mid-ocean ridges. These changes all modified the ancient coastal outlines and resulted in a change in the exposed continental land areas. This is confirmed by the distribution of climate-dependent sedimentary rocks such as limestone reefs and of climate-dependent marine and terrestrial fossil species.

Reconstructions of the conventional Pangaea, Gondwana and Rodinia supercontinents and smaller sub-continents on an Expansion Tectonics Earth demonstrate that, instead of being the result of random dispersion-amalgamation or collision events, each continental assemblage is progressive and represents an evolutionary crust-forming process. The distinguishing feature of continents constructed on each

Expansion Tectonics model is the interrelationship of continental sedimentary basins, the network of continental seas and the network of crustal movements. The variation of each of these in time has resulted in changes to the distribution of exposed continental land. Supercontinent configuration is then defined by a progressive extension of continental sedimentary basins, by ongoing crustal movements and by changes in sea levels as the modern oceans opened and rapidly increased in area to the present day.

About the Author:

Dr James Maxlow was born in England in 1949 and migrated to Australia in 1953. He has a degree in geology (1971) from Royal Melbourne Institute of Technology and a Master's degree in geology (1995) followed by a PhD in geology, specialising in global tectonics (2002), from Curtin University of

Technology, Perth, Western Australia. He has over 25 years' experience working as an exploration and mine geologist throughout much of Australia. Since his academic studies, Dr Maxlow has been actively involved in spreading the merits of Earth Expansion, with conferences in Japan, Greece and Australia to his credit. He is involved with production of software and DVDs to promote Earth Expansion Tectonics as a viable alternative to currently accepted Plate Tectonics theory.

Dr Maxlow has contributed several articles to NEXUS (see 7/06, 8/03, 13/01). He is the author of the book *Terra Non Firma Earth* (see review in 13/01; book available for purchase from TerrellaPress@bigpond.com, and e-book from <http://www.oneoffpublishing.com>). He was a speaker at the 2005 NEXUS Conference in Brisbane.

Dr Maxlow can be emailed at contact@jamesmaxlow.com. For more information, visit his website <http://www.jamesmaxlow.com>.

Are you buying Nutritional & Herbal Ingredients but want to buy in bulk and receive savings?

Trading Hours:
Monday - Friday, 9am- 4pm

If you can't make it to our store then go to www.eternalyouth.com.au to see what products we have online.

NAZI SECRET WEAPONS

REICH OF THE BLACK SUN

Nazi Secret Weapons & the Cold War Allied Legend

by Joseph P. Farrell

Why were the Allies worried about an atom bomb attack by the Germans in 1944? Why did Hitler in 1945 insist that holding Prague could win the war for the Third Reich? Why did US General George Patton's Third Army race for the Skoda works at Pilsen in Czechoslovakia instead of Berlin? Why did the US Army not test the uranium atom bomb it dropped on Hiroshima? Why did the Luftwaffe fly a non-stop round trip mission to within twenty miles of New York City in 1944? Arguing that Nazi Germany actually won the race for the atom bomb in late 1944, this book explores the even more secretive research the Nazis were conducting into the occult, alternative physics and new energy sources.

Journey through the Light and Back

Continued from page 57

waste. I love the mushroom cloud; this is the holiest mandala that we have manifested to date, as an archetype. It, more than any religion or philosophy on Earth, brought us together all of a sudden, to a new level of consciousness. Knowing that maybe we can blow up the planet 50 times, or 500 times, we finally realise that maybe we are all here together now.

For a period, they had to keep setting off more bombs to get it into us. Then we started saying: "We do not need this any more." Now we are actually in a safer world than we have ever been in, and it is going to get safer.

So I came back from my near-death experience loving toxic waste, because it brought us together. These things are so big. As [futurist] Peter Russell might say, these problems are now "soul size". Do we have soul-size answers? Yes!

The clearing of the rainforests will slow down, and in 50 years' time there will be more trees on the planet than in a long time. If you are into ecology, go for it; you are that part of the system that is becoming aware. Go for it with all your might, but do not be depressed. It is part of a larger thing.

Earth is in the process of domesticating itself. It is never again going to be as wild a place as it once was. There will be great wild places, reserves where nature thrives. Gardening and reserves will be the thing in the future.

Population increase is getting very close to the optimal range of energy to cause a shift in consciousness. That shift in consciousness will change politics, money, energy.

After dying, going through my near-death experience and coming back, I really respect life and death. In our DNA experiments, we may have opened the door to a great secret. Soon we will be able to live as long as

we want to live in this body.

After living 150 years or so, there will be an intuitive soul sense that you will want to change channels. Living forever in one body is not as creative as reincarnation, as transferring energy in this fantastic vortex of energy that we are in. We are actually going to see the wisdom of life and death, and enjoy it. As it is now, we have already been alive forever.

This body, that you are in, has been alive forever. It comes from an unending Stream of Life, going back to the Big Bang and beyond.

This body gives life to the next life, in dense and subtle energy. This body has been alive forever already. ∞

About the Author:

Mellen-Thomas Benedict's two books *Journey Through The Light and Back* and *The Hitchhiker's Guide to The Other Side* are soon to be published. For more information, visit the author's website <http://www.mellen-thomas.com>.

How to Survive 2012

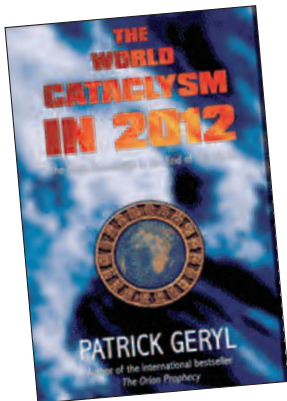

HOW TO SURVIVE 2012

by Patrick Geryl

Geryl urges mankind to prepare and endure. The Outlook is bleak, but the obstacles are not insurmountable. In this book, Geryl provides the blueprint for those wishing to survive the disaster to prepare themselves and prevail. He explains in detail the myriad problems survivors will encounter, and the precautions that need to be taken to overcome them.

CATAclySM 2012?

WORLD CATAclySM IN 2012: Maya Calendar Countdown by Patrick Geryl

In this book the author reveals the millennia-old codes of the Maya and the Old Egyptians, which refer to a coming super-disaster. The Dresden Codex of the Maya contains secrets of the sunspot cycle, and the conclusions are staggering—at a certain moment, when the sun's magnetism reaches a crucial point, the sun's surface will be subjected to immense storms, causing a super-catastrophe on earth.

A Must Read!!

HIDDEN TRUTH: FORBIDDEN KNOWLEDGE

by Steven M. Greer MD

From his sighting of a UFO at an early age, to his amazing near-death experience at age 17, to his unraveling of the secret cabal running the illegal transnational energy and UFO-related projects, to his meetings with a CIA Director, US Senators, heads of state and royalty – you will be moved, shocked and enlightened as you read through this memoir. Journey with Dr Greer as he takes you into the corridors of secret power – beyond the government as we know it—to a shadowy cabal of power-mad controllers, and their hidden agenda.

CONTACT:

Countdown to
Transformation

by Steven M. Greer, MD

This book goes far beyond the usual accounting of objects seen in the sky and takes the reader into a universe of higher states of consciousness, remote viewing and direct Contact with civilizations that interface with thought and awareness as easily as we talk on cell phones. Journey with the CSETI team as they go beyond the veil of light and the resonant frequency of matter and enter into close contact with numerous ET civilizations who eagerly await the coming Transformation on Earth. The accompanying DVD shows the images, sights and sounds of Contact, as it has evolved over the past 17 years. You will learn how this Contact has been made - and how you, too, can become an Ambassador to the Universe!

UFO DISCLOSURE

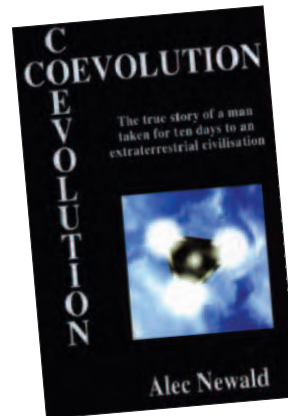

DISCLOSURE

by
Steven M. Greer MD

For the first time ever, over five dozen top-secret military, government, intelligence and corporate witnesses to secret projects tell their true stories which disclose the greatest covert program in world history. This explosive testimony by actual government insiders proves that UFOs are real, that some are of extraterrestrial origin and that super-secret programs have energy and propulsion technologies that will enable humanity to begin a new era.

A true story!

*The true story of a
man taken for ten
days to an
extraterrestrial
civilisation*

by Alec Newald

Alec Newald set off on what should have been a 3-hour drive from Rotorua to Auckland in New Zealand. He arrived in Auckland feeling tired and confused, but was even more confused to learn that Monday was now Thursday ten days later, and that he had no idea of what had happened in the meantime! When Alec did retrieve his memories of those missing ten days, he realised his life had changed forever.
